| Tutor & Room:           |  |

"If you are not willing to learn, no one can help you.  
If you are determined to learn, no one can stop you."

# How to use your 100% book of Knowledge Organisers and Quizzable Organisers

## Knowledge Organisers

Year 7 Term 1 Science/Chemistry : Topic:TOP Particles

**What are we learning this term?**

- A. Matter
- B. Changing States
- C. Melting
- D. Evaporation/Condensation

**5 Key Models for this term:**

1. Matter
2. Particle
3. Melting
4. Condensation
5. Freezing
6. Evaporation
7. Solid
8. Liquid
9. Gas
10. Solvent

**A. What is particle theory?**

The theory that all matter is made up of particles.

**B. Describe the arrangement and movement of particles in the three states of matter.**

**Solid:** In a regular pattern. Particles are vibration in a fixed position.

**Liquid:** Particles are arranged randomly. Particles are free to move. Particles can slide past each other and move around.

**Gas:** Particles are apart and are arranged randomly. Particles carry a lot of energy and they move in all directions in a high speed.

**A. What is the law of conservation of mass?**

The Law of Conservation of Mass states that mass cannot be created or destroyed.

**B. What are the different changes of state?**

**Freezing:** Change of state from liquid to solid

**Evaporation:** Change of state from liquid to gas

**Condensation:** Change of state from gas to liquid

**C. What is the difference between a pure substance and an impure substance?**

**Pure:** A material that is made up of only one type of particle.

**Impure:** A material that made up of more than one type of particle.

**Diagram:**

Gaining energy → solid → liquid → gas → losing energy

## Quizzable Knowledge Organisers

**A. What is diffusion?**

The movement of particles from a higher concentration to a lower concentration.

**B. What happens to the temperature of a substance when it changes of state?**

During the change of state, the temperature will stay the same until the change of state is complete.

**A. What is particle theory?**

The movement of particles from a higher concentration to a lower concentration.

**A. Describe the arrangement and movement of particles in the three states of matter.**

**Solid:** Particles are arranged in a regular pattern.

**Liquid:** Particles are arranged randomly.

**Gas:** Particles are apart and are arranged randomly.

**A. What is the law of conservation of mass?**

**B. What are the different changes of state?**

**Melting:**

**Freezing:**

**Evaporation:**

**Condensation:**

**Diagram:**

solid → liquid → gas

Knowledge Organisers contain the essential knowledge that you **MUST** know in order to be successful this year and in all subsequent years.

They will help you learn, revise and retain what you have learnt in lessons in order to move the knowledge from your short-term memory to long-term memory.

These are designed to help you quiz yourself on the essential Knowledge.

Use them to test yourself or get someone else to test you, until you are confident you can recall the information from memory.

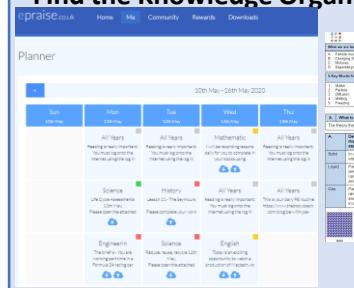

### Top Tip

Don't write on your Quizzable Knowledge Organisers! Quiz yourself by writing the missing words in your prep book. That way you can quiz yourself again and again!

## Expectations for Prep and for using your Knowledge Organisers

1. Complete all prep work set in your subject prep book.
2. Bring your prep book to every lesson and ensure that you have completed all work by the deadline.
3. Take pride in your prep book – keep it neat and tidy.
4. Present work in your prep book to the same standard you are expected to do in class.
5. Ensure that your use of SPAG is accurate.
6. Write in blue or black pen and sketch in pencil.
7. Ensure every piece of work has a title and date.
8. Use a ruler for straight lines.
9. If you are unsure about the prep, speak to your teacher.
10. Review your prep work in green pen using the mark scheme.

# How do I complete Knowledge Organiser Prep?

| Step 1  | Step 2  | Step 3  |
|---|---|---|
| <p>Check Epraise and identify what words /definitions/facts you have been asked to learn. Find the Knowledge Organiser you need to use.</p>  <p><b>Knowledge Organiser:</b></p> <p><b>What is particle theory?</b><br/>The theory that all matter is made up of particles.</p> <p><b>What is the law of conservation of mass?</b><br/>The Law of Conservation of Mass states that mass cannot be created or destroyed.</p> <p><b>Describe the arrangement and movement of particles in the three states of matter.</b></p> <ul style="list-style-type: none"> <li><b>Solid:</b> Particles are arranged in a regular pattern. Particles vibrate in a fixed position.</li> <li><b>Liquid:</b> Particles are arranged randomly but are still touching each other. Write the missing words from your quizzable Knowledge organiser in your prep book.</p> <p><b>Self quizzing</b></p> <p><b>Arrangement/movement of matter</b></p> <p><b>Solid:</b> regular pattern</p> <p><b>Liquid:</b></p> <p><b>Gas:</b></p> | <p>Check your answers using your Knowledge Organiser. Repeat Steps 3 to 5 with any questions you got wrong until you are confident.</p> <p><b>Particle theory:</b> all matter is made of particles</p> <p><b>Solid:</b> regular pattern, particles vibrate in fixed position</p> <p><b>Liquid:</b> particles are arranged randomly but are still touching each other, Particles can slide past each other and move around.</p> <p><b>Gas:</b> Particles are far apart and are arranged randomly, Particles carry lots of energy</p>                             |

Make sure you bring in your completed Prep notes to demonstrate that you have completed your prep.

# ENGLISH –A Christmas Carol- Traditional

## 1. Context

**Writer:** Charles Dickens (1812-1870)  
**Dates:** First published in 1843  
**Genre:** Allegorical; a ghost story.  
**Era:** Victorian  
**Set:** Victorian London  
**Structure:** The novella is divided into 5 staves (chapters).

**Christmas:** Dickens grew concerned that, due to capitalism, society had lost sight of traditional values (Christian morals, forgiveness, charity). He felt that Christmas was the perfect time to reconnect with these values and used his novella to do this. He also knew that Christmas would be a popular topic so it would sell well – therefore enabling his message to reach a wider audience.

**The Poor Law, 1834**  
In order to deter poor people from claiming financial help, the government made claimants live in workhouses: essentially, prisons for the poor.  
Dickens hated this law. He spent 1843 touring factories and mines in England and wished to highlight the situation facing poor people. A Christmas Carol was published soon after – in December 1843.

**The Supernatural:** Victorian society was fascinated by the supernatural, including mediums, ghosts, and spiritualism. However, this belief in the supernatural was also heavily influenced by the church, with the belief that ghosts were souls who were trapped in purgatory (a place of suffering where the souls of sinners were trapped).

## Biography of Dickens

- Born in Portsmouth in 1812
- When Dickens was 12, his father was sent to debtors' prison as he was unable to pay his bills.
- His mother and youngest siblings were sent with him, whilst Dickens stayed with a family friend. In order to help his family, Dickens had to leave school and work in a factory sticking labels on bottles.
- Dickens dedicated his life to writing works that revealed the horrors of life in Victorian London for those living in poverty.

## London and inequality:

Dickens juxtaposes scenes of middle-class comfort and poverty to emphasise the close proximity and contrast of the different classes. It highlights the Christian concept of 'love thy neighbour'. The urban setting allows Dickens to exercise his fondness for hyperbole, with the exaggerated extremes of poverty adding to the effect of the 'plight of the poor'.

## 2. Key Characters

**Ebenezer Scrooge:** The protagonist is initially established as an archetypal villain who dismisses the goodwill and generosity associated with Christmas. After being forced to transform, he feels remorse for his avarice and becomes a symbol of Christmas spirit. Scrooge embodies the relentless capitalist spirit of the time, but also demonstrates that everyone has the capacity to reform.

**Bob Cratchit:** Bob is Scrooge's downtrodden but loyal employee. His family are a symbol of Victorian poverty, cheerfulness in adversity, togetherness and Christmas Spirit. Bob shows pity for Scrooge, and provides a contrast to Scrooge's isolation and meanness. His son, Tiny Tim, is an emblem for noble poverty; he accepts his disability without complaint.

**Fred:** Fred juxtaposes the character of Scrooge and epitomises the concept of goodwill and forgiveness, refusing to be discouraged by his uncle's misery. People speak highly of Fred and his generosity, in contrast to how they speak of Scrooge. Fred shows that Scrooge has chosen isolation and shows forgiveness to Scrooge, welcoming him in Stave Five.

**Marley's Ghost:** Marley's ghost is the spiritual representation of Scrooge's potential fate. The chains that drag him down symbolize the guilt caused by his failure to help people in need. Marley's ghost warns Scrooge that he too will experience the same guilt if he continues to deny people help.

**The ghosts:** The Ghost of Christmas Past is a symbol of childhood, truth and enlightenment. The Ghost of Christmas Present represents goodwill, plenty and the festival of Christmas. The Ghost of Christmas Yet to Come symbolises a catastrophic future for mankind.

**Belle:** The woman that Scrooge was engaged to when he was a young man. Belle's role is crucial in Scrooge's transformation, as the scenes show Scrooge what he might have had in his life if he had not been so avaricious. Through the character of Belle, Dickens sets emotional love directly against Scrooge's love of money and suggests that avarice can lead to a deprivation of kindness, love and empathy.

## 3. Central Themes

**Social injustice** Dickens highlights the unfairness within society through the juxtaposition of the poor and wealthy. Through Scrooge's refusal to give to charity and his exclamation that the poor should be in workhouses or die, Dickens illustrates the selfishness of the higher classes and the injustice of wealth distribution in Victorian society. The children, Ignorance and Want, personify the dangerous consequences of allowing poverty to continue.

**Transformation and redemption** By establishing Scrooge as an archetypal villain, Dickens is able to emphasise the idea that everyone is capable of transformation and redemption. From starting as a greedy, avaricious miser, Scrooge is able to reflect upon his actions and to understand that he must live his life helping others to avoid Marley's fate.

**Social responsibility** Dickens felt that every individual had a responsibility for those around them. Marley's Ghost conveys the message of the novella when he cries, 'Mankind was my business' demonstrating that the proper 'business' of life is not about seeking financial reward but having concern for others. Dickens highlights the importance of trying to make a difference- whether that be large financial contributions (Scrooge), smaller contributions (Fezziwig) or simply showing compassion and kindness to one another.

## 4. Key Vocabulary

|                      |   |
|----------------------|---|
| <b>Avarice</b>       | Extreme greed of possessions or money   |
| <b>Salvation</b>     | Saving someone from harm or destruction   |
| <b>Miserly</b>       | someone who is greedy and does not like spending money  |
| <b>Callous</b>       | Mean or cruel   |
| <b>Antithesis</b>    | The exact opposite of something   |
| <b>Epiphany</b>      | A moment of sudden understanding  |
| <b>Redemption</b>    | The act of being saved or freed from sin or error   |
| <b>Benevolence</b>   | Kind and helpful towards others   |
| <b>Philanthropic</b> | Showing concern for others by being charitable  |
| <b>Misanthropic</b>  | Someone who has a hatred for other people   |
| <b>Penitence</b>     | sincere regret for wrong or evil things that you have done  |
| <b>Remorse</b>       | a strong feeling of sadness and regret about something wrong that you have done   |
| <b>Deprivation</b>   | When someone is unable to have the things they need or want   |
| <b>Despotism</b>     | exercising power in a cruel and controlling way   |
| <b>Capitalism</b>    | A political system in which property, business, and industry are owned by private individuals and not by the government |

## 5. Key Terminology, Symbols and Devices

|                            |  |
|----------------------------|--|
| <b>Stave</b>               | Chapters in the novella, but we normally associate staves with music, as if the <b>book</b> is a Christmas carol, and each chapter is part of the song. As Christmas carols are repetitive and easy to remember, it links to how Dickens' wishes his message to be remembered. |
| <b>Intrusive Narrator</b>  | A narrator who interrupts the story to provide a commentary to the reader on some aspect of the story or on a more general topic. In 'A Christmas Carol' the narrator helps to shape our impressions of Scrooge.   |
| <b>Circular structure</b>  | Circular narratives cycle through the story one event at a time to end back where the story originated.  |
| <b>Allegory</b>            | A story that can be interpreted to reveal a hidden meaning, typically a moral or political one.  |
| <b>Allegorical figures</b> | An <b>allegorical figure</b> is a <b>character</b> that serves two purposes: first, they are an important person in the story in their own right, and, second, they represent abstract meanings or ideas.  |
| <b>Foreshadowing</b>       | Foreshadowing is a literary device in which a writer gives an advance hint of what is to come later in the story.  |
| <b>Didactic</b>            | A type of literature that is written to inform or instruct the reader, especially in moral or political lessons.   |
| <b>Semantic Field</b>      | A set of words that are related in meaning. Dickens frequently uses semantic fields of warmth and coldness that are associated with the characters.  |

## T3 P3 – Particle model of matter

| State  | Pattern                  | Energy and movement            | Forces between particles        |
|--------|--------------------------|--------------------------------|---------------------------------|
| Solid  | Ordered and all touching | Vibrate around fixed positions | Strong forces between particles |
| Liquid | Random and touching      | Move around randomly           | Weaker than in a solid          |
| Gas    | Random and far apart     | Move around randomly           | Weak forces of attraction       |

| Models                                    | +   | -   |
|---|---|---|

### Density

Density is mass per  $\text{cm}^3$

It can be calculated using:

$$\text{Density} = \text{mass} \div \text{volume}$$

$$\rho = m \div V$$

**Required practical – measuring the density of different materials.**

**For regular solids :**

Mass measured by **top pan balance**

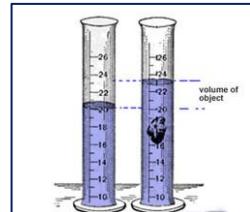

Volume measured by measuring length  $\times$  breadth  $\times$  height

**For irregular solids:**

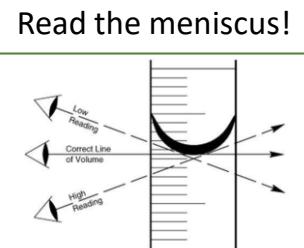

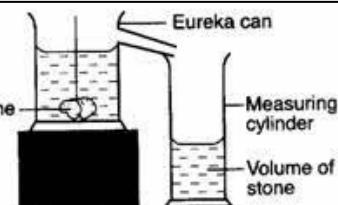

Mass measured by **top pan balance**

Volume measured by **displacement of water**

**This means putting the object into water and measuring the volume of water 'pushed out'**

Measure the volume of larger objects by putting them into a full eureka can and catching and measuring the water that is displaced

### **Required practical continued : Density of liquids**

- Find the mass of an empty measuring cylinder using a top pan balance.
- Pour a known volume (100ml) of liquid into the measuring cylinder.
- Use the meniscus to measure the volume of the liquid accurately. This is the volume.
- Now measure the mass of the measuring cylinder + the liquid combined.
- Subtract the mass of the empty measuring cylinder and this is the mass of the liquid.

$$\text{Density} = \text{mass} \div \text{volume.}$$

### Particle model

1. Describe the arrangement of the particles in a solid, a liquid and a gas
2. Describe the movement of the particles in a solid, a liquid and a gas
3. In which state of matter are the forces between the particles the weakest?
4. In which state of matter are the forces between the particles the strongest?
5. Give one advantage of using particle diagrams to show the different states of matter
6. Give three disadvantages of using particle diagrams to show the different states of matter
7. Give two advantages of using kinetic models to show the different states of matter
8. Give one disadvantages of using kinetic models to show the different states of matter

### Density

1. Give the formula that links density, mass and volume?
2. Give a unit for density
3. Which piece of equipment is used to measure mass of an object?
4. What type of error is it if a balance reads 0.03g when nothing is resting on it?
5. What term is used to describe when water is pushed out of the way by a solid object?
6. Name two pieces of equipment that could be used to measure the volume of an irregular object
7. What three measurements do you need to calculate the volume of a regular object?

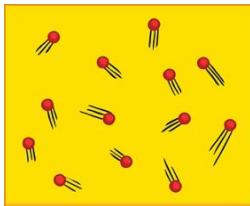

## Internal energy

The temperature of any substance is related to the average speed of its particles.

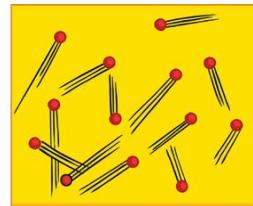

The internal energy of a system is the total kinetic energy and the potential energy of the particles

The particles in a system **vibrate** or **move around** because they have energy in their **kinetic energy stores**

The faster a particle moves, the greater its **kinetic energy store**

Low Temperature

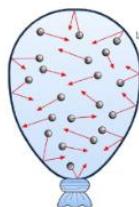

High Temperature

The particles also have energy in their **potential energy stores** due to their position.

As particles **move further apart**, their potential energy stores **increase**

## Gas pressure

The particles in a gas are in constant random motion  
They collide with the walls of their container  
This exerts a force **on the container**.

The more energy the particles have, the higher the temperature.

An increase in temperature of a gas causes the particles to move further apart.

If this is not possible, because of the container, then there is an increase in pressure.

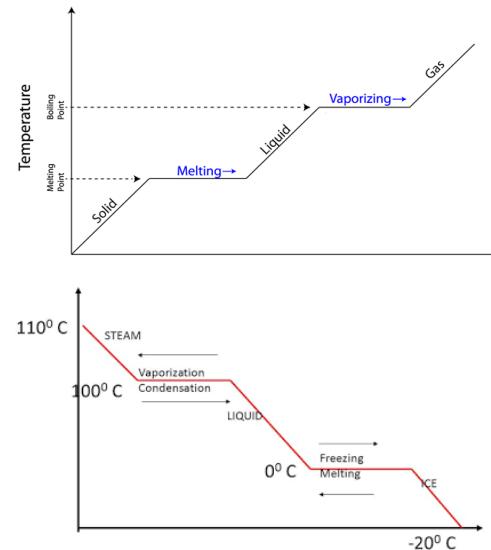

## Heating and cooling

When the internal energy of a substance changes, then either :

- The temperature of the substance changes
- The state of the substance changes

This can be seen by plotting the temperature change during **heating** or **cooling**.

Heating a solid would give us a graph that looks like this:

- The **temperature stays the same**.
- This is when a change of state is happening – for example melting.
- The energy transferred is not increasing the mean particle speed – it is increasing the potential energy of the particles.

When the line is increasing (heating) or decreasing (cooling)

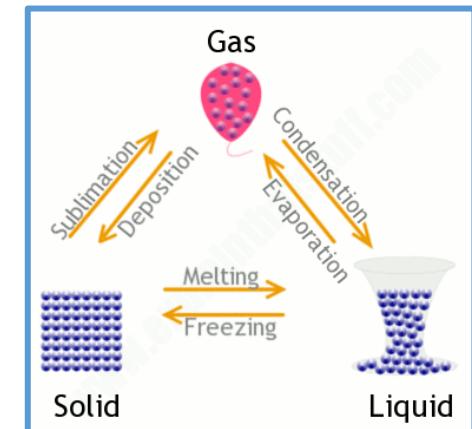

- The temperature is increasing / decreasing
- The kinetic energy store is increasing /decreasing
- Average particle speed is increasing /decreasing

## Specific latent heat

Specific latent heat is the amount of energy needed to **change 1kg of a substance from one state to another** without changing the temperature.

Specific latent heat will be different for different materials.

- Energy needed to change 1kg of Solid → liquid - **specific latent heat of fusion**
- Energy needed to change 1kg of Liquid → gas - **specific latent heat of vaporisation**

The amount of energy needed to change 1Kg of a material is found by the equation:

$$\text{Energy} = \text{mass (kg)} \times \text{specific latent heat (L)}$$

$$E = m L$$

## Specific heat capacity

This is the amount of energy needed to change the temperature of 1Kg of a substance by  $1^{\circ}\text{C}$

It is calculated by:

$$E = \text{specific heat capacity} \times \text{mass} \times \text{temp change}$$
$$E = \text{SHC} \times m \times \theta$$

## Internal energy

1. What two stores of energy make up internal energy?
2. Which energy store is linked with particle movement?
3. Which energy store increases if the particles in a substance move further apart?
4. What happens to the temperature when the kinetic store of the particles increases?

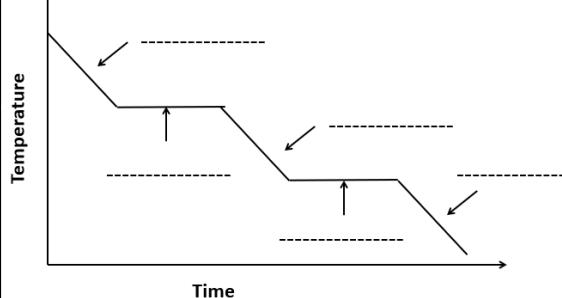

## Gas pressure

1. What causes gas pressure?
2. What happens to the temperature of a gas if the kinetic energy store of the particles increases?
3. What happens to the space between particles in a gas as it heats up?
4. If the volume of the gas is kept constant, what happens to the pressure?

## Heating and cooling

1. What two things can happen to a substance when the internal energy changes?
2. Label the graph below using the words given:

liquid, gas, solid, condensing, freezing

3. What is happening to temperature when the line is flat on a heating or cooling curve?

4. What is happening to the substance when the line is flat?

## Specific latent heat

1. What is specific latent heat?
2. What is the term given to the amount of energy needed to change 1kg of a liquid into a solid?
3. What is the specific latent heat of vaporisation?
4. Label the changes of state below
  - a.
  - b.
  - c.
  - d.
5. Draw the particle diagrams in the boxes

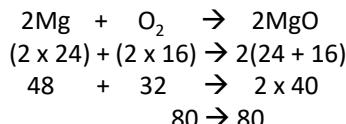

# C3 – Quantitative Chemistry

## Conservation of Mass

- Atoms cannot be created or destroyed during reactions.
- **Mass of reactants = mass of products.**

To show mass is conserved in a reaction:

$M_r$  on the left-side must be same as the right side.

## Reacting masses

Use conservation of mass to predict masses:

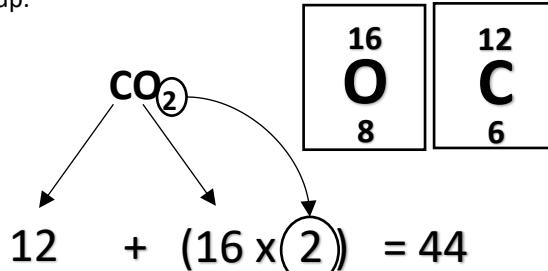

8g ? 10g

Both sides need to be equal:  
 $10g - 8g = 4g$  of oxygen

## Atomic mass ( $A_r$ ) and Relative Formula Mass ( $M_r$ )

- Atomic mass ( $A_r$ ) is the mass number – ie the mass of one atom
- Relative formula mass ( $M_r$ ) = all the **relative atomic masses** ( $A_r$ ) of the atoms in a compound or molecule added up.

### Example

## Percentage Mass

- Percentage mass of an element in a compound

$$\frac{\text{Mass of the element in compound}}{\text{Total mass of compound}} \times 100$$

### Example Question:

Find the percentage mass of oxygen in magnesium oxide (MgO).

$A_r$  of magnesium = 24       $A_r$  of oxygen = 16

$M_r$  of MgO = 24 + 16 = 40

$$\% \text{ mass} = \frac{A_r}{M_r} = \frac{16}{40} = 0.4 \times 100 = 40\%$$

X 100 to make a %

40% of the mass of MgO is oxygen

## Mass Changes

- Mass is always conserved in a reaction.
- Sometimes it may seem like the mass has increased/decreased.
- If a **reactant** is a gas – mass may **increase**.

Oxygen is in the air before it combines with magnesium – you cannot find the mass of oxygen on the balance.

It will look like the mass has increased when it is re-weighed at the end.

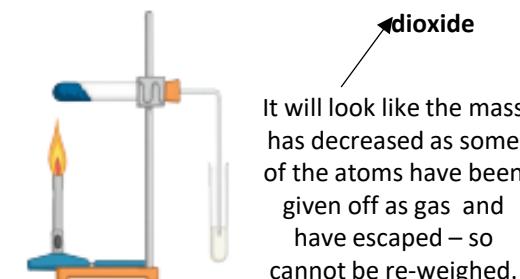

## The Mole (HT only)

- Avogadro constant –  $6.02 \times 10^{23}$
- One mole contains  $6.02 \times 10^{23}$  atoms or molecules
- The mass, in g, of one mole is the Ar (if an element) or Mr if a compound or molecular element

Iron has a  $A_r$  of 56, so 1 mole of iron is 56 g and contains  $6.02 \times 10^{23}$  atoms of iron

Ammonia ( $\text{NH}_3$ ) has an Mr of 17, so 1 mole of ammonia has a mass of 17g. and contains  $6.02 \times 10^{23}$  molecules of ammonia

- If a **product** is a gas and the gas is able to escape the system – mass will **decrease**.

## C3 – Quantitative Chemistry

|   |  |  |
|---|--|--|
| <ol style="list-style-type: none"><li>1. What is meant by conservation of mass?</li><li>2. Mass of reactants = ?</li><li>3. # C3 – Quantitative Chemistry

## Concentrations of Solutions

- Concentration = mass of dissolved substance in specific volume (eg  $\text{dm}^3$ )
- More substance dissolved = more concentrated solution

**Concentration = mass  $\div$  volume**

(g/ $\text{dm}^3$ ) (g) ( $\text{dm}^3$ )

Can be rearranged to find mass dissolved:

**mass = concentration  $\times$  volume**

(g) (g/ $\text{dm}^3$ ) ( $\text{dm}^3$ )

**1000cm $^3$  = 1dm $^3$**   
**cm $^3$   $\rightarrow$  dm $^3$  =**  
**divide by 1000.**

## Calculating mass in a given volume

If you have a known volume of a solution of known concentration then you can calculate the mass of dissolved solid.

E.g Calculate the mass of dissolved solid in 25cm $^3$  of a 96g/dm $^3$  solution

96g/dm $^3$  means 96g in every 1000cm $^3$

Do the same to the other side  
 $(\div 40)$

25cm $^3$

How do we get from 1000 to 25?  $(\div 40)$

2.4g

## Moles and Equations (HT only)

- You can use moles to help you write balanced symbol equations.

### Example Question

18.4g of Sodium reacted with 6.4g of oxygen to give 24.8g sodium oxide. Use the masses to write the balanced equation.

| Step  | Example  |
|---|--|
| Write the equation for the reaction (unbalanced)          | $\text{Na} + \text{O}_2 \rightarrow \text{Na}_2\text{O}$   |
| write down the mass or % given in the question            | $18.4 + 6.4 \rightarrow 24.8$                              |
| Write the mass of one mole of each element or compound    | 23      32      62<br>(e.g $18.4 \div 23$ )                |
| Divide the mass given in question by the mass of one mole | 0.8      0.2      0.4                                      |
| Turn the answers into whole number simple ratio           | 8      2      4<br>(cancel down)<br>4      1      2        |
| Put the numbers into the equation                         | $4\text{Na} + \text{O}_2 \rightarrow 2\text{Na}_2\text{O}$ |

## Calculating reacting masses (HT)

### Example Question

Calculate the mass of calcium needed to make 11.2g Calcium oxide

| Step   | Calculation                                       |
|--|---|
| Write the balanced equation  | $2\text{Ca} + \text{O}_2 \rightarrow 2\text{CaO}$ |
| Write the masses of each substance   | $80 + 32 \rightarrow 112$                         |
| Write down the given mass in the question.   | 11.2  |
| Work out the 'scale' factor (ie what did you have to do to the original number to get to the desired mass) | $\div 10$   |
| Do the same to the other side  | 8g  |

## Limiting Reactants (HT only)

- If one reactant runs out before the other, then the reaction will stop.
- The reactant that runs out first in a reaction is known as the limiting reactant.

# C3 – Quantitative Chemistry

1. What does concentration mean?
2. How can you make a solution more concentrated?
3. State the equation to calculate concentration in g/dm<sup>3</sup>.
4. What is the unit for volume?
5. How many cm<sup>3</sup> are in a dm<sup>3</sup>?

## Calculating mass in a given volume

1. What does 36.5g/dm<sup>3</sup> mean?
2. Calculate the mass of dissolved solid in 25 cm<sup>3</sup> of a 36.5g/dm<sup>3</sup> solution

Do the same to the other side ( $\div 40$ )

36.5

1000  
↓  
25 cm<sup>3</sup>

How do we get from 1000 to 25? ( $\div 40$ )

g

## Moles and Equations (HT only)

12g of magnesium (Mg) reacted with 8g of oxygen (O<sub>2</sub>) to produce 20g magnesium oxide (MgO). Use the masses to write a balanced equation

| Step  | Example |
|---|---------|
| Write the equation for the reaction (unbalanced)          |         |
| write down the mass or % given in the question            |         |
| Write the mass of one mole of each element or compound    |         |
| Divide the mass given in question by the mass of one mole |         |
| Turn the answers into whole number simple ratio           |         |
| Put the numbers into the equation                         |         |

1. What is a limiting reactant?

2. Complete the calculation: Calculate the mass of calcium needed to make 224g of calcium oxide

| Step   | Calculation                                       |
|--|---|
| Write the balanced equation  | $2\text{Ca} + \text{O}_2 \rightarrow 2\text{CaO}$ |
| Write the masses of each substance   |   |
| Write down the given mass in the question.   |   |
| Work out the 'scale' factor (ie what did you have to do to the original number to get to the desired mass) |   |
| Do the same to the other side  |   |

## 9. Global atmospheric circulation

| Factor                         | Explanation   |
|--------------------------------|---|
| Global atmospheric circulation | Worldwide system of winds, which transport heat from the equator to the poles.  |
| Key information                | <p>Wind is large scale movement of air from HIGH to LOW pressure.</p> <p>This is caused by differences in temperature at the Equator and the poles.</p> <p>The circulation is divided into loops called CELLS.</p> <p>Low pressure = Rising air = Rain. High pressure = Sinking air = Clear skies.</p>  |
|                                | <p>At the poles, cool air sinks creating high pressure. (&lt;250mm rainfall).</p> <p>At 60°N air rises between the <u>Ferrel</u> and Polar cell creating an area of low pressure. The UK gets lots of <u>low pressure</u> weather blown in from the Atlantic.</p> <p>At 30°N air sinks between the <u>Ferrel</u>/Hadley cell creating high pressure (deserts &lt;250mm rain).</p> <p>On the equator air rises as the sun's heat is most concentrated. This creates a <u>low pressure area</u> with high rainfall. (Rainforests &gt;2000mm of rain).</p> <p>Surface winds blow towards the equator (trade winds). Direct hurricanes to west.</p> <p>Here winds blow towards the poles and are called Westerlies. (From the west).</p> <p>The winds curve due to the spin of the earth (Coriolis effect).</p> |

## 11. Evidence that weather is becoming more extreme...

Our weather is naturally variable BUT extreme events are becoming more common and severe.

| Hazard      | Example   |
|-------------|---|
| Temperature | 10 warmest yrs all occurred since 1990<br>2018 joint hottest summer on record.<br>Dec 2010 coldest month for 100 years. |
| Rainfall    | More rainfall records broken between 2010 - 2014 than in any other decade.<br>Dec 2015 wettest month on record.         |

## 10. Weather hazards in the UK

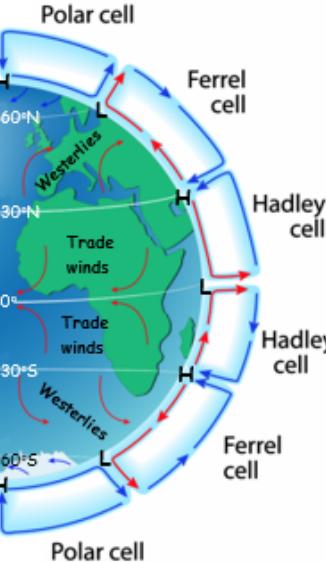

| Hazard          | Example  |
|-----------------|--|
| Extreme weather | A weather event that is significantly different from the average pattern and is especially severe or unseasonal. |
| Strong winds    | Damage property / disrupt transport.<br>2018 Storm Ali killed 2 people.  |
| Heavy rain      | Can cause flooding, costing millions.<br>Cockermouth 2009 314 mm in 24 hrs.                                      |
| Snow            | Injury, death, travel disruption.<br>March 2018 Beast from East. 50 cm.  |
| Drought         | Crop failure, rules to conserve water.<br>April 10-March 12 only 75% of rain.                                    |
| Heatwaves       | Pollution builds up- breathing problems.<br>Death. BUT tourism benefits. 2018.                                   |

## 12. An example of a recent extreme weather event in the UK

|                       |  |
|-----------------------|--|
| Name                  | Somerset Floods, 2014  |
| Causes                | 350mm rain fell in Jan and Feb<br>High tides, rivers not dredged for 20 yrs  |
| Impacts               | <p>1 ⚡ £10 million damage</p> <p>2 ⚡ 14,000 ha of farmland flooded</p> <p>3 ⚡ 600 homes flooded</p> <p>4 ⚡ Moorland and <u>Muchelney</u> cut-off</p> <p>5 ⚡ Floodwaters contaminated</p> <p>6 ⚡ Soil damaged for 2 years after</p>   |
|                       | <b>Immediate responses</b>   |
| Management strategies | <ul style="list-style-type: none"> <li>Army helped with rescue boats</li> <li>Volunteers and community groups</li> <li>Locals used boats to go shopping/school</li> </ul> <p><b>Long term responses</b></p> <ul style="list-style-type: none"> <li>£20 million flood action plan</li> <li>Rivers dredged</li> <li>Road levels raised</li> <li>Tidal barrage by 2024</li> </ul> |

## 9. Global atmospheric circulation

| Factor   | Explanation |
|--|-------------|
| Global atmospheric circulation   |             |
| Key information  |             |
|  |             |

## 10. Weather hazards in the UK

| Hazard          | Example |
|-----------------|---------|
| Extreme weather |         |
| Strong winds    |         |
| Heavy rain      |         |
| Snow            |         |
| Drought         |         |
| Heatwaves       |         |

## 12. An example of a recent extreme weather event in the UK

|                       |  |
|-----------------------|--|
| Name                  |  |
| Causes                |  |
| Impacts               |  |
| Management strategies |  |

## 11. Evidence that weather is becoming more extreme...

| Hazard      | Example |
|-------------|---------|
|             |         |
|             |         |
|             |         |
| Temperature |         |

| 13. Tropical storms  |   |
|--|---|
| Hurricanes, cyclones, typhoons. An area of low pressure with winds moving in a spiral around the calm central point called the eye of the storm. Winds are powerful and rainfall is heavy. |   |
| Factor   | Explanation   |
| Global distribution  | 5° – 30° north and south of equator (sea temp warm, wind shear low). More in the northern hemisphere. Move towards the west.  |
| Relationship with ACM  | Trade winds (from high to low pressure) send tropical storms to west.   |
| Structure  |  Circular, can be 100s of km wide. Eye- calm in centre (air ↓, LOW). Eyewall- strong winds, torrential rain. Edges- Wind speed falls, rain reduces. |
| How will climate change affect them?   |   |
| Distribution   | Increase to higher latitudes (warmer sea temperatures).   |
| Frequency  | Number could increase. (Longer season)  |
| Intensity  | Stronger? More evaporation.   |

| 14. Formation of tropical storms               |  |
|--|--|
| Include processes and ensure correct sequence. |  |
| Conditions                                     | 5-30° latitude.<br>Ocean depth > 60m deep.<br>Sea temperature > 27°C.<br>Form summer and autumn. |

1. Sun heats the ocean (27°C) > **rapid evaporation**.  
 2. **Condensation** occurs quickly leading to a large amount of cloud forming (**tropical depression**).  
 3. Due to the earth's rotation, this cloud mass starts to spin. An eye is formed in the centre.  
 4. Due to rising air, a **low pressure** area forms below. Air rushes into this creating high wind speeds. (>74mph = **tropical storm**)  
 5. The **low pressure** results in the ocean being uplifted forming a **storm surge**.

| Strategy                | Explanation  |
|-------------------------|--|
| Prediction / monitoring | Satellites and aircraft to monitor storms. Computer models calculate the predicted track.<br>Allows warnings so people can evacuate or protect their home.                               |
| Planning                | New developments avoid high risk areas<br>Emergency services train and prepare.<br>Plan evacuation routes.<br>Reduces the injuries and deaths.   |
| Protection              | Building design- reinforced concrete, stilts to reduce flood risk.<br>Flood defences along rivers and coasts.<br>Reduces the number of buildings destroyed so fewer injuries and deaths. |

| 16. Tropical storms affect people and environments. |   |   |
|---|---|---|
|   | Generic   | Typhoon Haiyan 2013 Philippines   |
| Primary effects                                     | Direct results of strong winds, high rainfall, storm surges.<br>Flooding, buildings destroyed, death.   | ➢ 6,201 deaths. (Most drowned in storm surge.)<br>➢ 1.1 million houses damaged.<br>➢ 90% of Tacloban city destroyed.  |
| Secondary effects                                   | Homelessness > lead to poor health.<br>Lack of sanitation > diseases (cholera)<br>Food shortages, price increase.   | ➢ 4.1 million homeless.<br>➢ Damage cost US\$12 billion.<br>➢ 1.1 million tonnes of crops destroyed (rice).   |
| Immediate responses                                 | Evacuate before the storm.<br>Rescue those affected.<br>Provide food, water, blankets.<br>Aid workers arrive from abroad.<br>Recover dead bodies (prevent disease). | ➢ Over 1200 evacuation shelters set up.<br>➢ Philippines Red Cross delivered basic food aid.<br>➢ UK sent shelter kits.<br>➢ 800,000 evacuated (warnings given 2 days early). |
| Long term responses                                 | Repair homes and infrastructure.<br>Promote economic recovery.  | ➢ More cyclone shelters built.<br>➢ No build zones.<br>➢ 'Cash for work' programmes.  |

### 13. Tropical storms

| Factor                                      | Explanation |
|---|-------------|
| Global distribution                         |             |
| Relationship with ACM                       |             |
|   |             |
| <b>How will climate change affect them?</b> |             |
| Distribution                                |             |
| Frequency                                   |             |
| Intensity                                   |             |

### 14. Formation of tropical storms

|            |  |
|------------|--|
| Conditions |  |
|            |  |

### 15. How can we reduce the impacts?

| Strategy                | Explanation |
|-------------------------|-------------|
| Prediction / monitoring |             |
| Planning                |             |
| Protection              |             |

### 16. Tropical storms affect people and environments.

|                     | Generic | Typhoon Haiyan 2013 Philippines |
|---------------------|---------|---------------------------------|
| Primary effects     |         | •                               |
| Secondary effects   |         | •                               |
| Immediate responses |         | ➢                               |
| Long term responses |         | ➢                               |

# Climate Change

## Background:

1. Since the 1860s the global climate has been recorded.
2. Since then the climate globally has increased by 0.8° Celsius.
3. Climate scientists can use methods to find out about the global climate before we started recording it. **(B)**
4. From this evidence we can see that the planet has always gone through periods of warming and cooling. **(A)**
5. However, the rapid increase of carbon dioxide in the atmosphere from burning fossil fuels, is causing the enhanced greenhouse effect. **(D)**
6. The enhanced greenhouse effect is causing changes to the planet, such as the melting of Arctic sea ice, rising temperatures, and an increase in extreme weather events such as tropical storms. **(E, F)**
7. Countries are trying to resolve the climate change issue by limiting the amount of carbon dioxide released into the atmosphere, this is known as mitigation. **(G, H)**
8. Some countries are trying to adapt to climate change by building flood barriers and growing drought resistant crops. **(G, H)**

## A. Changes in climate (3)

|                       |  |
|-----------------------|--|
| Climate change        | The process of the Earth's climate changing over time. |
| Glacial periods       | Cold periods.  |
| Inter-glacial periods | Warm periods.  |

## B. Measuring climate change (3)

|                     |  |
|---------------------|--|
| Ice cores           | Each layer of ice in a core represents a different year. CO <sub>2</sub> can be measured in each layer, and therefore the temperature. |
| Tree rings          | Each ring represents a different year. Thicker rings show a warmer climate.  |
| Historical evidence | Paintings and diaries e.g. paintings of ice fairs on the frozen Thames 500 years ago.  |

| C. Natural climate change (3)               |  | D. Human-induced climate change (5) |  |
|---|--|-------------------------------------|--|
| Volcanic eruptions                          | Ash from volcanic eruptions can block sunlight, making it colder.                | Greenhouse effect                   | The way that gases in the atmosphere trap heat from the sun. Like glass in a greenhouse they let heat in, but prevent most from escaping.                    |
| Sun spots                                   | The sun can give out more energy due to an increase in sun spots.                | Greenhouse gases                    | Gases like carbon dioxide and methane that trap heat around the Earth, leading to climate change.  |
| Orbital change                              | The orbit of the sun changes from oval (ellipse) to circular approx. 98,000 yrs. | Transport                           | More cars, so more CO <sub>2</sub> causing the enhanced greenhouse effect.   |
| E. Effects on people (6)                    |  | F. Effects on the environment (4)   |  |
| Tropical storms                             | Increase in frequency and intensity so more damage.                              | Sea temperature rises               | Coral bleaching and destruction of marine ecosystems.  |
| Sea-level rise                              | Increased risk of floods, damaging property and businesses.                      | More droughts                       | Migration/ death of species which can not survive drought conditions.  |
| Melting Arctic ice                          | Affects trading routes in the Arctic Circle.                                     | Melting glaciers (ice rivers)       | Will send more fresh water into the sea, causing the sea level to rise.  |
| More droughts/ floods                       | Crop failure, could lead to starvation and famine.                               | Melting Arctic ice                  | Loss of habitats for animals, such as polar bears.   |
| Cost of defence                             | Governments have to spend more money on disasters instead of developing.         | H. Place specific examples (2)      |  |
| Environmental Refugees                      | Pressure on countries to accept refugees.  | Adaption                            | <b>The Thames Barrier.</b><br>Positive: Stops flooding due to rising sea levels.<br>Negative: Expensive  |
| G. Strategies to resolve climate change (4) |  | Mitigation                          | <b>The Paris Agreement.</b><br>Positive: Countries are trying to lower CO <sub>2</sub> emissions.<br>Negative: The USA pulled out and China did not sign up. |
| Adaptation                                  | Adapting to climate change to make life easier.                                  | Mitigation examples (3)             | 1. Building flood defences.<br>2. Growing new crops to suit the new climate.<br>3. Irrigation channels, sending water from areas of surplus to deficit.      |
| Adaptation examples (3)                     |  | Mitigation                          | 1. International agreements.<br>2. Alternative energies.<br>3. Carbon capture.   |
| Mitigation                                  | Trying to stop climate change from happening by reducing greenhouse gases.       | Mitigation examples (3)             |  |

## GCSE History : Medicine in modern Britain c1900-present

### What we are learning this term:

- 1.1 Ideas about the cause of disease and illness
- 1.2 Approaches to prevention and treatment
- 1.3 Case studies: Fleming, Florey, Chain and the fight against lung cancer in the 21<sup>st</sup> century

### A. Can you define these key words?

|              |  |   |   |   |
|--------------|--|---|---|---|
| DNA          | Short for deoxyribonucleic, DNA carries genetic information from one living thing to another | Germ theory – By 1900, the germ theory had been around for 40 years and microbes had been linked with outbreaks of disease.   | Doctors now understood that the body produced antibodies to fight diseases that had previously infected it and that is how vaccines worked.   | Mass production of penicillin – Florey and Chain proved that penicillin was effective in treating infections. The US government, observing the benefits funded the mass production.                                       |
| Genome       | The complete set of DNA containing all information needed to build a particular organism     | Lifestyle factors – drinking too much alcohol leads to liver and kidney problems, intravenous drug taking and unprotected sex can spread diseases and the fashion of tanning led to a rise in skin cancer.  | Antibiotics – Inspired by the discovery of penicillin, other scientists investigated molds and fungi in the search for more antibiotics. In the short term antibiotics have been a miracle cure for a variety of diseases, however their long-term impact has yet to be measured. | Science of technology in lung cancer treatment; the use of transplants, radiotherapy and chemotherapy. Genetic research is not yet used as a possible treatment for lung cancer.  |
| Haemophilia  | A genetic disease passed from parent to child that stops blood clotting                      | Fundamental laws of inheritance: By 1900, a German scientist Mendel had theorized that genes come in pairs and one is inherited from each parent  | New approaches to prevention through mass vaccinations – for example the national vaccination campaign against diphtheria was launched in 1942, the first of its kind.  | Improved access to care – There was rapid improvement in the availability of care outside the home from 1948 onwards. The NHS made medical services free at point of service. This gave everybody access to medical care. |
| Mastectomy   | Surgery during which a person has one or both breasts removed.                               | The human genome project – this was launched in 1990 and was originally led by James Watson. For a decade, 18 teams of scientists all over the world worked together to decode and map the human genome, this would make it possible for scientists to identify mistakes of mismatches in DNA | Government legislation - the government has passed laws to provide a healthy environment for the population. Examples of these were Clean Air Acts of 1956 and 1968. These two pieces of legislation were triggered by bad episodes of smog in London in 1952.                    | Specific, effective medicines matched with the diseases that they treat. In 1900 25% of deaths were caused by infectious diseases, by 1990 that number had fallen to less than 1%.  |
| Magic bullet | A chemical cure that will attack microbes in the body without damaging the body              |   |   |   |
| Antibiotic   | A Drug made from bacteria that kill other bacteria and so cure and infection or illness      |   |   |   |
| Penicillin   | The first antibiotic drug produced from the mould of penicillium to treat infections         |   |   |   |

### C. Lung Cancer (1.3)

|                      |   |  |
|----------------------|---|--|
| What is lung cancer? | Lung cancer is the second most common cancer in the UK. It mainly affects people over the age of 40, it is an infection of the lungs.   |  |
| Causes               | Lung cancer became a much more common disease after 1900. Most lung cancers are caused by external factors such as smoking and chemicals in the air such as radon gas. In 1950, scientists proved that smoking was linked to lung cancer.   |  |
| Treatments           | There are three key treatments for lung cancer in the 21 <sup>st</sup> century. People can be treated using a transplant, radiotherapy and chemotherapy. There is also research into genetic treatments, however it is not yet possible to treat lung cancer with genetics meaning its impact is limited. |  |
| Prevention           | The British taking action through encouraging current smokers to quit, preventing people from becoming smokers and from protecting non-smokers from the dangers of second-hand smoke through various pieces of legislation being produced.  |  |

### B. Change and continuity in ideas about disease and illness in modern Britain. (1.1-1.2)

| Causes  | Prevention  | Treatments  |
|---|---|---|
| Germ theory – By 1900, the germ theory had been around for 40 years and microbes had been linked with outbreaks of disease. | Doctors now understood that the body produced antibodies to fight diseases that had previously infected it and that is how vaccines worked. | Mass production of penicillin – Florey and Chain proved that penicillin was effective in treating infections. The US government, observing the benefits funded the mass production. |

### D. Key People (1.3)

| Fleming  | Florey   | Chain  |
|--|--|--|
| Fleming was a British doctor working at St. Mary's hospital in London. He had a keen interest in bacteriology and had been one of the first doctors to use the first 'magic bullet' to treat syphilis. Fleming identified the mould in his dirty petri dish as penicillium. The bacteria appeared to kill off the harmful staphylococcus bacteria. Fleming published his findings and at this time scientists were actively searching for chemical treatments. | Florey was an Australian pathologist working at Oxford medical school. Florey (with Chain) was conducting investigations into neglected research. Following the testing on mice, further tests of penicillin needed to be done on a larger scale, however Florey and Chain struggled to produce penicillin on a large scale. Florey refused to patent the drug, saying it should be available for everybody, meaning the development of the drug didn't cost much money. | Chain had escaped Nazi Germany where he had been a biochemist. Chain along with Florey was conducting investigations into previously neglected research. In 1940 he tested the extracted penicillin on infected mice. It appeared to be promising and the penicillin was working. Chain and Florey |

| The 5 Pillars - Zakah           |  |
|---------------------------------|--|
| The role of giving alms         | <ul style="list-style-type: none"> <li><b>Muslims believe it is their duty to ensure Allah's wealth has been distributed equally as everyone is the same</b></li> <li>The Qur'an commands to give to those in need</li> </ul>  |
| The significance of giving alms | <ul style="list-style-type: none"> <li>Giving 2.5% of savings/wealth to charity</li> <li>Wealth can cause greed which is evil, so Zakah purifies wealth – wealth is given by God and must be shared</li> <li>The Prophet Muhammad practiced Zakah as a practice in Medina</li> <li>Given to the poor, needy and travellers</li> <li><b>Sadaqah</b> is giving from the heart out of generosity and compassion</li> </ul>                  |
| Khums                           | <ul style="list-style-type: none"> <li>Shi'a Islam – one of the 10 obligatory acts</li> <li>20% of any profit earned by Shi'a Muslims paid as a tax</li> <li>Split between charities that support Islamic education and anyone who is in need</li> <li><b>"know that whatever of a thing you acquire, a fifth of it is for Allah, for the Messenger, for the near relative, and the orphans, the needy, and the wayfarer"</b></li> </ul> |

| The 5 Pillars - Sawm        |  |
|-----------------------------|--|
| The role of fasting         | <ul style="list-style-type: none"> <li>Fasting during Ramadan (9<sup>th</sup> month in Muslim calendar)</li> <li>Muslims give up food, drink, smoking and sexual activity in daylight hours</li> <li>Pregnant people, children under 12, travellers and elderly people are exempt from fasting.</li> </ul>   |
| The significance of fasting | <ul style="list-style-type: none"> <li>Ramadan is believed to be the month that Prophet Muhammad began to receive revelations of the Qur'an</li> <li>Helps Muslims to become spiritually stronger</li> </ul>   |
| Reasons for fasting         | <ul style="list-style-type: none"> <li>Obeying God and exercising self-discipline</li> <li>Develops empathy for the poor</li> <li>Appreciation of God's gifts</li> <li>Giving thanks for the Qur'an</li> <li>Sharing fellowship and community with other Muslims</li> </ul>  |
| Night of power              | <ul style="list-style-type: none"> <li>The night when the Angel Jibril first appeared to Muhammad and began revealing the Qur'an.</li> <li>The most important event in history – <b>"better than a thousand months"</b> (Surah 97:3)</li> <li>Laylat Al-Qadr is the holiest night of the year. Muslims try to stay awake for the whole night to pray and study for the Qur'an</li> </ul> |

| The 5 Pillars - Hajj           |   |
|--------------------------------|---|
| The role of pilgrimage         | <ul style="list-style-type: none"> <li>A pilgrimage to Makkah which is compulsory for Muslims to take at least once as long as they can afford it and are healthy</li> </ul>  |
| The significance of pilgrimage | <ul style="list-style-type: none"> <li>God told Ibrahim to take his wife and son on a journey and leave them without food or water</li> <li>Hajira ran up and down two hills in search of water, could not find any and prayed to God. Then water sprung from the ground. This is the Zamzam well</li> <li>When Ibrahim returned he was commanded to build the Ka'ba as a shrine dedicated to Allah</li> <li>Hajj is performed in the month of Dhu'l-Hijja</li> </ul>   |
| Actions                        | <ul style="list-style-type: none"> <li>Ihram – dressing in two pieces of white cloth</li> <li>Circling the Ka'aba 7 times (tawaf)</li> <li>Drinking water from the Zamzam well like Hajar</li> <li>walking between Al-Safa and Al-Marwa hills seven times</li> <li>Throwing stones at 3 pillars (jamarat) to represent casting out the devil and remembering Ibrahim throwing stones at the devil to drive him away</li> <li>Asking Allah for forgiveness at Mt Arafat</li> <li>Collecting pebbles at Muzdalifah</li> </ul> |

| Id-ul-Adha, Id-ul-Fitr, Ashura |  |
|--------------------------------|--|
| Id-ul-Adha                     | <ul style="list-style-type: none"> <li><b>Festival of sacrifice</b></li> <li>Marks the end of Hajj and is a chance for whole Ummah to celebrate</li> <li><b>Origins</b> – Ibrahim's commitment to God in being willing to sacrifice his son, Ishmael. God was testing Ibrahim</li> <li><b>Key events</b> – new clothes, sacrificing an animal, visiting the Mosque.</li> <li>People ask a butcher to slaughter a sheep for them and share the meat with the community</li> </ul> |
| Id-ul-Fitr                     | <ul style="list-style-type: none"> <li><b>Festival of fast-breaking</b></li> <li>Marks the end of Ramadan</li> <li><b>Key events</b> – Decorate homes with colourful light and banners, dress in new clothes, gather in Mosques, give gifts and money, give to the poor</li> <li><b>Zakah ul-Fitr</b> – donation to the poor so that everyone can eat a generous meal at the end of Ramadan.</li> </ul>  |
| Ashura                         | <ul style="list-style-type: none"> <li>Sunni celebration – many fast on this day which was established by Prophet Muhammad</li> <li>Shi'a mourning – Husayn was murdered and beheaded. Muslims remember his death and betrayal</li> <li><b>Key events</b> – public displays of grief, day of sorrow, wear black, re-enactments of martyrdom, not a public holiday in Britain but Muslims may have day off school</li> </ul>  |

# Year 10 Spanish

# Knowledge Organiser

## Term 3

### **Techniques for learning vocab:**

- Write down the vocabulary 3 times each word.
- Look / cover / write / check – ask your teacher for a sheet and to show you how.
- Mind maps
- Post it notes / flash cards
- Record yourself saying them
- Get a family member to quiz you – they say the English, you say the Spanish
- Write the word in a sentence – put it into context.
- Use TALKAL, free APP in the chat mode and speak with the AI Ema.

**Spare copies of this kept in class. Just ask your teacher if you need one.**

## TOP 10 2get TOP Marks in Spanish writing

### 1) Use two tenses in the same sentence:

Impress the examiner by using two different tenses in the same sentence. For example, you could use both the **preterite** and **imperfect tenses**: E.g. **Fuimos a San Sebastián que era bonito pero bastante caro.**  
*We went to San Sebastian which was pretty but quite expensive.*

### 2) Create more complex sentences by linking with “donde” or “cuando”:

**E.g. Pasé el verano en un pueblo en el sur de Francia donde tengo unos amigos.**

*I spent the summer in a village in the south of France where I have friends.*

### 3) Refer to other people:

Talk about a variety of people by changing the subject of the sentence. Make sure you use the correct verb ending.

**E.g. A mí me gusta nadar pero mi amiga prefiere jugar al voleibol.**

*I like swimming but my friend prefers to play volleyball.*

### 4) Use a variety of connectives such as:

**También (also), además (moreover), pero (but), sin embargo (however), por eso / por lo tanto (therefore), así que (so), entonces (then), luego (later), aunque (although), aún (even), antes (before), después (after), por ejemplo (for example), tal como (such as) and so on.**

## 5) Use exclamation expressions to show surprise, fear, happiness, etc.: ¡Qué horror! – How awful!

¡Qué miedo! – How scary! ¡Qué bien! – Great!

Qué suerte! – How lucky! ¡Qué pena! – What a shame!

## 6) Use the subjunctive.

Try to include a subjunctive verb if possible. Easy ways to use the subjunctive involve the following expressions:

**Es importante que ...** (*It is important that ...*) **Es probable que ...** (*It is likely that ...*)

**Espero que ...** (*I hope that ...*) **Quiero que ...** (*I want ...*) **No creo que ...** (*I don't believe that ...*)

## 7) Remember to justify your opinions:

E.g. **Me encanta viajar a otros países para practicar la lengua y para conocer otras culturas.**

I love travelling to other countries to practice the language and to learn about other cultures.

## 8) Use a wide range of vocabulary and show off how many different words you know!

## 9) Use a variety of opinion phrases, don't just stick to "Pienso que..." (I think that ...):

**Creo que** – *I believe that*   **Opino que** – *I give the opinion that*

**A mi modo de ver** – *As I see it*   **En mi opinión** – *In my opinion*

**Me parece que** – *It seems to me that*   **Para mí** – *As for me*

**(No) Estoy de acuerdo** – *I agree (I don't agree)*   **Me molesta que** – *It bothers me that*

**No aguento** – *I can't stand*   **No soporto** – *I can't tolerate*

## 10) Use comparative structures.

**Más + adjetivo + que:** **Mi hermano es más trabajador que yo.**

*My brother is more hardworking than me.*

**Menos + adjective + que:** E.g. **Mi amiga Ana es menos habladora que yo.** *My friend Ana is less talkative than me.*

• Make sure the adjective agrees with the noun it is describing. **Tan + adjective + como:** (as ... as):

E.g. **La chaqueta es tan cara como el abrigo.** *The jacket is as expensive as the coat.*

**Tanto/a/os/as + noun + como:** (as much/many as):

## ¡Qué rico! (pages 80–81):

Para ...

el desayuno / la comida  
la merienda / la cena

una comida típica

un **plato** popular

¿De qué país es cada plato?

El/La ... es de ...

## ¡Los tiempos cambian! (pages 86–87):

|   |   |   |   |
|---|---|---|---|
| ¿Cómo eras antes?                                     | What were you like before?                              | (Siempre) Estaba cansado/a y enfermo/a.   | I was (always) tired and sick.                            |
| Cuando era pequeño/a ...                              | When I was little                                       |   |   |
| Cuando era más joven ...                              | When I was younger ...                                  |   |   |
| Antes / Cuando tenía ... años, ...                    | Before / When I was ... years old, ...                  |   |   |
| dormía bien/mal                                       | I slept well/badly                                      |   |   |
| me levantaba / <b>me acostaba</b> ...                 | I got up / I went to bed ...                            |   |   |
| temprano/pronto / tarde                               | early / late  |   |   |
| (no) era muy activo/a.                                | I was (not) very active.                                |   |   |
| (no) tenía ...  | I had / I didn't have ...                               |   |   |
| (mucha) energía                                       | (lots of) energy  |   |   |
| una vida sana   | a healthy life  |   |   |
| (nunca) iba al <b>gimnasio</b>                        | I (never) went to the gym                               |   |   |
| ¿Qué te gustaba comer y beber?                        | What did you like to eat and drink?                     |   |   |
| Solía comer / beber ...                               | I usually ate / drank ...                               |   |   |
| (No) Comía ...  | I ate / I didn't eat ...                                |   |   |
| Bebía demasiado café.                                 | I drank too much coffee.                                |   |   |
| Me encantaban los postres.                            | I loved desserts.                                       |   |   |
| Me gustaba comer *dulces.                             | I liked eating sweets.                                  |   |   |
| ¿Qué hacías en tu tiempo libre cuando eras pequeño/a? | What did you do in your free time when you were little? |   |   |
| (No) Hacía (mucho/suficiente) ejercicio/deporte.      | I did / didn't do (lots of/enough) exercise/sports.     |   |   |
| (No) Iba a la piscina (tres veces a la semana).       | I went / didn't go to the pool (three times a week).    |   |   |
| (No) Montaba en *bici (cada día).                     | I rode / didn't ride my bike (every day).               |   |   |
| (No) Jugaba ...                                       | I played / didn't play ...                              |   |   |
|   |   | (Cuido más mi dieta.)                     | What is your routine like now? I look after my diet more. |
|   |   | (Me siento) mucho mejor.                  | What are you like now? I feel a lot better.               |
|   |   | Soy bastante activo/a.                    | I am quite active.  |
|   |   | No / <b>Ya no</b> ...                     | I don't / no longer ...                                   |
|   |   | hago (mucho) ejercicio/ deporte           | do (lots of) exercise/sports                              |
|   |   | hago nada para <b>mantenerme</b> en forma | do anything to stay in shape                              |
|   |   | me levanto temprano como antes            | get up early like before                                  |
|   |   | ¿Qué te gusta comer y beber?              | What do you like to eat and drink?                        |
|   |   | (No) Como comida rápida/ malsana.         | I (don't) eat fast/unhealthy food.                        |
|   |   | ( <b>Ya no</b> ) Bebo/Como ...            | I (no longer) eat/drink ...                               |
|   |   | Prefiero las bebidas con azúcar.          | I prefer sugary drinks.                                   |
|   |   | Me gusta comer comida sana.               | I like to eat healthy food.                               |
|   |   | ¿Qué haces en tu tiempo libre?            | What do you do in your free time?                         |
|   |   | (No) Hago ejercicio/deporte.              | I (don't) do exercise/sports.                             |
|   |   | (No) <b>Voy al gimnasio</b> /cine.        | I (don't) go to the gym/cinema.                           |
|   |   | (No) Juego a *los videojuegos.            | I (don't) play videogames.                                |

| <b>desde hace</b> una hora / más de (dos días) | for an hour / more than (two days)            |
| Debes / Necesitas ...                          | You must / You need to ...                    |
| Tienes que ...                                 | You have to ...                               |
| quedarte en la cama / en casa                  | stay in bed / at home                         |
| descansar/dormir                               | rest/sleep                                    |
| comprar medicinas (en la farmacia)             | buy medicine (at the chemist's)               |
| <b>evitar</b> el sol                           | avoid the sun                                 |
| <b>recuperarte/relajarte</b>                   | recover/relax                                 |
| ir al <b>médico</b> /hospital                  | go to the doctor's/hospital                   |
| Voy a pedir cita con el <b>médico</b> .        | I am going to ask for a doctor's appointment. |

## Mi salud, de la cabeza a los pies (pages 90–91):

|                                      |  |
|--------------------------------------|--|
| ¿Cómo cambiarás tu estilo de vida?   | How will you change your lifestyle?    |
| Si dejo de comer/beber/fumar, ...    | If I stop eating/drinking/smoking, ... |
| Si duermo (al menos ocho horas), ... | If I sleep (at least eight hours), ... |
| Si practico más deporte, ...         | If I practise more sport, ...          |
| Si tengo (una vida más activa), ...  | If I have (a more active life), ...    |
| <b>me sentiré</b> más feliz          | I will be happier                      |
| mi salud física/mental mejorará      | my physical/mental health will improve |
| dormiré mejor                        | I will sleep better                    |
| me levantaré con más energía         | I will wake up with more energy        |

|  |  |
|--|--|
| ¿Qué harás para mejorar tu salud en el futuro? | What will you do to improve your health in the future? |
| Para cambiar esta mala costumbre, ...          | To change this bad habit, ...                          |
| Para mejorar mi dieta/salud ...                | To improve my diet/health ...                          |
| dormiré más tiempo / beberé agua               | I will sleep longer / I will drink water               |
| no usaré el móvil (después de las nueve)       | I won't use my mobile (after nine o'clock)             |
| iré (al <b>gimnasio</b> )                      | I will go (to the gym)                                 |
| <b>evitaré</b> beber alcohol y fumar           | I will avoid drinking alcohol and smoking              |
| <b>empezaré</b> a practicar deporte            | I will start practising sport                          |

Learn the vocabulary on these pages.

Write 3 sentences using Imperfect tense: **me siento mal/bien porque...**

## 17. Business Aims & Objectives

### Businesspeople like to use the term SMART objectives

|                    |  |
|--------------------|--|
| Which Objective?   | Explanation of Objective   |
| <b>Specific</b>    | Businesses set very specific targets that are very clear and to the point  |
| <b>Measurable</b>  | Businesses set measurable targets that can be measured. For example: Business set themselves specific sales targets over a set period. |
| <b>Achievable</b>  | Businesses set realistic targets that are ambitious yet achievable.  |
| <b>Realistic</b>   | Businesses set realistic targets that will motivate employees at the same time they will be achievable                                 |
| <b>Time- Bound</b> | Businesses set their targets over a period of time as this creates a sense of excitement and urgency.                                  |

## 18. Aims and Objectives in Business

### Businesses have both financial and non-financial aims

| Type of Objectives              | Explanation   |
|---------------------------------|---|
| <b>Financial Objectives</b>     | Profit.<br>Sales.<br>Market Share.<br>Reduce costs. |
| <b>Non-Financial Objectives</b> | Social objectives.<br>Independence.<br>Control.     |

## 19. Business Revenue, Costs & Profits

| Term                      | Definition  |
|---------------------------|---|
| <b>Fixed Costs</b>        | Costs that don't vary just because output varies for example 'rent'.                                    |
| <b>Profit (gross/net)</b> | The difference between revenue and total costs; if the figure is negative the business is making a loss |
| <b>Revenue</b>            | The total value of the sales made within a set period, such as a month.                                 |
| <b>Total Costs</b>        | All the costs for a set period, such as a month   |
| <b>Variable Costs</b>     | Costs that vary as output varies such as raw materials  |

## 20. Business Revenue, Costs & Profits

| Term                  | Formulae                                   |
|-----------------------|--|
| <b>Sales Revenue</b>  | $\text{Price} \times \text{Quantity Sold}$ |
| <b>Total Costs</b>    | <b>Variable costs + Fixed Costs</b>        |
| <b>(Gross) Profit</b> | <b>Total Revenue – Total Costs</b>         |

## 21. Breaking Even

| Term                    | Definition  |
|-------------------------|---|
| <b>Break - Even</b>     | The level of sales at which total costs are equal to total revenue. At this point the business is making neither a profit nor a loss. |
| <b>Break-even Chart</b> | A graph showing a company's revenue and total costs at all possible levels of output  |
| <b>Margin of Safety</b> | The amount by which demand can fall before the business starts making losses  |

| <b>Break-even Chart</b> |            |
| <b>Margin of Safety</b> |            |

## 22. The Importance of Cash

| Question  | Answer   |
|---|--|
| Why does Cash matter to a Business?             | Cash matters because, without it, bills go unpaid and a business can fail. If you have no cash, you can't pay suppliers or employees.                            |
| Why is cash important to a business?            | Cash is required to pay suppliers, employees or other costs. Typical overheads include:<br><b>Salaries/ Rent and Rates/ Utilities and Bills</b>                  |
| What is the difference between cash and profit? | Cash flow shows the immediate impact of a transaction on a company's bank account; profit shows the longer-term impact after costs have been taken into account. |

## 23. The Importance of Cash (definitions)

| Term               | Definition  |
|--------------------|---|
| Cash               | The money the firm holds in notes and coins, and in its bank accounts                               |
| Cash Flows         | The movement of money into and out of the firm's bank account.                                      |
| Insolvency         | When a business lacks the ability to pay its debts  |
| Overdraft          | A short-term form of credit. A bank will allow a business to spend more money than it actually has. |
| Overdraft Facility | An agreed maximum level of overdraft  |

## 25. Short Term Sources of Finance

| Term           | Definition   |
|----------------|--|
| Bank Overdraft | If a company requires some short term finance they can negotiate to extend their overdraft facility with the bank                      |
| Trade Credit   | When a supplier provides goods without immediate payment – This gives the business time to sell products in order to pay off the debt. |

## 24. Cash Flow Forecasts

Cash flow forecasting means predicting the future flows of cash into and out of a Business.

Successful cash flow forecasts require:

- Accurate prediction of monthly sales
- Accurate predictions of when customers will pay for the goods they have bought
- Careful allowance of operating costs and the timing of payments
- Careful allowance for in flows and outflows of cash

| Key Term           | Definition  |
|--------------------|---|
| Opening Balance    | The amount of cash in the bank at the start of the month    |
| Net Cash Flow      | Cash inflow minus cash outflow over the course of a month   |
| Negative Cash Flow | When cash outflows are greater than cash inflows            |
| Closing Balance    | The amount of cash left in the bank at the end of the month |

## 26. Long Term Sources of Finance

| Term            | Definition  |
|-----------------|---|
| Crowdfunding    | Raising Capital online from many small investors (but not through the stock market).  |
| Share Capital   | Raising finance by selling a share of the business, Shareholders have the right to question the directors and take profit out the firm. |
| Venture Capital | A combination of share capital and loan capital, provided by an investor.   |
| Retained Profit | Profit kept within the Business that is used for business growth.   |

**22. The Importance of Cash**

| Question  | Answer |
|---|--------|
| Why does Cash matter to a Business?             |        |
| Why is cash important to a business?            |        |
| What is the difference between cash and profit? |        |

**23. The Importance of Cash (definitions)**

| Term               | Definition |
|--------------------|------------|
| Cash               |            |
| Cash Flows         |            |
| Insolvency         |            |
| Overdraft          |            |
| Overdraft Facility |            |

**25. Short Term Sources of Finance**

| Term           | Definition |
|----------------|------------|
| Bank Overdraft |            |
| Trade Credit   |            |

**24. Cash Flow Forecasts**

Cash flow forecasting means predicting the future flows of cash into and out of a Business.

Successful cash flow forecasts require:

- Accurate prediction of monthly sales
- Accurate predictions of when customers will pay for the goods they have bought
- Careful allowance of operating costs and the timing of payments
- Careful allowance for in flows and outflows of cash

|-----------------|--|

## Year 10 PRODUCT DESIGN Term 3

| A.  | Physical & Working Properties   |
|---|---|
| Physical properties are the traits a material has before it is used.  |   |
| Absorbency  | Ability to soak up moisture, light or heat                                    |
| Density   | How solid a material is   |
| Fusibility  | Ability of a material to be heated and joined to another material when cooled |
| Electrical Conductivity   | Ability to conduct electricity  |
| Thermal Conductivity  | Ability to conduct heat   |
| Working properties are how a material behaves when it is manipulated. |   |
| Strength  | Ability of a material to withstand compression, tension and shear             |
| Hardness  | Ability to withstand impact without damage                                    |
| Toughness   | Materials that are hard to break or snap are tough & can absorb shock         |
| Malleability  | Being able to bend or shape easily would make a material easily malleable     |
| Ductility   | Materials that can be stretched are ductile                                   |
| Elasticity  | Ability to be stretched and then return to its original shape                 |

| What we are learning this term:  |   |  |
|----------------------------------|---|--|
| B.                               | Forces and Stressors  | C.   |
| A. Physical & Working Properties | B. Forces & Stressors   | C. Types of Motion   |
| D. Paper & Card/Boards           | E. 6 R's  | F. Natural & Manufactured Timbers  |
|                                  |   |  |
| B.                               | Forces and Stressors  | C.   |
|                                  | Forces apply stress to objects, causing them to break or change shape.<br><br>Different materials can withstand different forces. | C.   |
|                                  | <b>Tension</b><br>  | <b>Linear</b><br>  |
|                                  | Is a stretching or pulling force.<br>E.g. the ropes of a suspension bridge  | Moves something in a straight line. E.g. a train moving down a track   |
|                                  | <b>Compression</b><br>  | <b>Reciprocating</b><br>   |
|                                  | Is a pushing or squashing force, e.g. the weight of a building on its foundation  | Has a repeated up and down motion or back-and-forth motion. E.g a piston or pump                                 |
|                                  | <b>Bending</b><br>  | <b>Rotary</b><br>  |
|                                  | Is a combination of tension and compression.<br>It exerts tension on one side and compression on the other, e.g. bending anything | <b>Oscillating</b><br>   |
|                                  | <b>Shear</b><br>  | Has a curved backwards and forwards movement that wings on an axis or pivot point. E.g a swing or clock pendulum |
|                                  | Is a cutting force.<br>The opposing forces are not directly opposite each other, e.g. cutting paper with scissors.                |  |
|                                  | <b>Torsion</b><br>  |  |
|                                  | Is a twisting force that attempts to rotate two ends of a material in opposite directions, e.g. wringing out a wet cloth.         |  |

| E.   | 6 R's  |
|--|--|
| You can use the 6R's when designing to help reduce the impact that new products have on the environment. |  |
| <b>Repair</b><br>  | It's better to fix things instead of throwing them away.                           |
| <b>Reuse</b><br>   | You can extend a products life by passing it on or using it again.                 |
| <b>Recycle</b><br>   | The uses less energy than obtaining new materials.                                 |
| <b>Rethink</b><br>   | You should think about your design carefully. Is it needed?                        |
| <b>Reduce</b><br>  | Making long-lasting durable products. Think rechargeable!                          |
| <b>Refuse</b><br>  | You can refuse to buy a product if you think it is wasteful. Such as plastic bags. |
| F.   | Natural & Manufactured Timbers   |
| Natural timber comes from trees.   |  |
| Hardwood   | Softwood   |
| Ash  | Larch  |
| Beech  | Pine   |
| Mahogany   | Spruce   |
| Oak  | Softwoods are faster growing and cheaper to buy.                                   |
| Balsa  |  |
| Manufactured Boards  |  |
| Manufactured boards are usually made from natural timber waste and adhesive.                             |  |
| Medium-density fibreboard (MDF)  |  |
| Plywood  |  |
| Chipboard  |  |

## Year 10 PRODUCT DESIGN Term 3

| A.                      | Physical & Working Properties   |
|-------------------------|---|
| Physical properties are | _____   |
| Absorbency              |   |
|                         | How solid a material is   |
| Fusibility              |   |
|                         | Ability to conduct electricity  |
| Thermal Conductivity    | Ability to conduct heat   |
| Working properties are  | _____   |
| Strength                |   |
|                         | The ability to withstand impact with damage                               |
| Toughness               |   |
|                         | Being able to bend or shape easily would make a material easily malleable |
| Ductility               |   |
| Elasticity              | Ability to be stretched and then return to its original shape             |

| What we are learning this term:   |  |   |
|---|--|---|
| A. Physical & Working Properties  | B. Forces & Stressors                            | C. Types of Motion  |
| D. Paper & Card/Boards E. 6 R's F. Natural & Manufactured Timbers   |  |   |
| B. Forces and Stressors   | C. Types of Motions                              |   |
| Forces apply _____ to objects, causing them to _____ or _____.<br>Different materials can withstand different forces. | Linear   |   |
| Tension   |  | Has a repeated up and down motion or back-and-forth motion. E.g. _____                        |
|   |  |   |
| Bending   |  | Has a curved backwards and forwards movement that wings on an axis or pivot point. E.g. _____ |
|   |  |   |
| D. Paper & Card/Boards  | Manufactured Boards                              |   |
| Paper and cards/boards both come from _____.  | Manufactured boards are usually made from _____. |   |
| Paper   | Board  |   |
| Cartridge Paper   |  |   |
|   | Duplex Board                                     |   |
| Layout Paper  |  |   |
|   | Foam Core Board                                  |   |
| Corrugated Card   |  |   |
|   | Solid White Board                                |   |

| E.   | 6 R's  |
|--|--|
| Repair   |  |
|  | You can extend a products life by passing it on or using it again.                 |
| Recycle  |  |

| Manufactured boards are usually made from _____. |  |
|  |  |
|  |  |
|  |  |
| Plywood  |  |

## What we are learning this term:

## A. Health &amp; Safety

## B. Manufacturing processes

## C. reading technical drawings

## D. Tools &amp; Equipment

## A. Health &amp; Safety

## Risk Assessment

A risk assessment is the analysis of the risks involved when using equipment or performing a process.

**Hazard** – something that may harm someone.

**Risk** – how likely a hazard is to happen.

**Control measure** – actions taken to reduce the risk of harm

**Ejection hazard** – material being thrown out of the machine toward the user

**Entrapment hazard** – the user being caught and pulled into the moving parts of the machine

**Inhalation hazard** – people in the vicinity of the hazard breathe in harmful dust or chemicals

**Sharp force hazard** – the user is cut, stabbed or scraped by the sharp material.

**Slip, trip and fall hazards** – common hazards caused by unclean or cluttered workspaces.

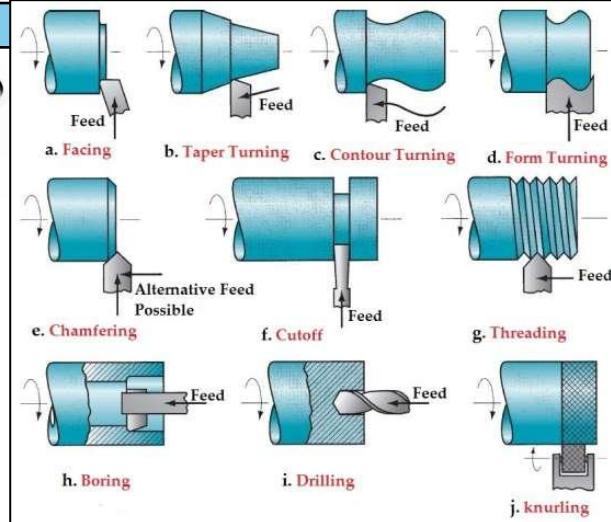

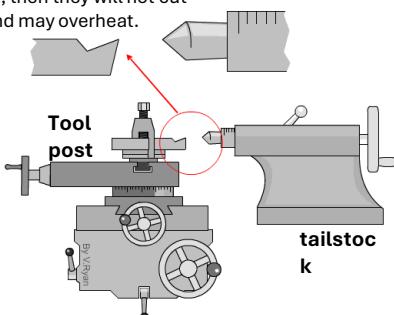

**Blunt force hazard** – a victim is crushed, hit or bruised by the blunt object. Major blunt trauma can cause fractures or internal bleeding.

## B. Manufacturing processes

The **dead center tool** is used to align the tools in the **tool post**.

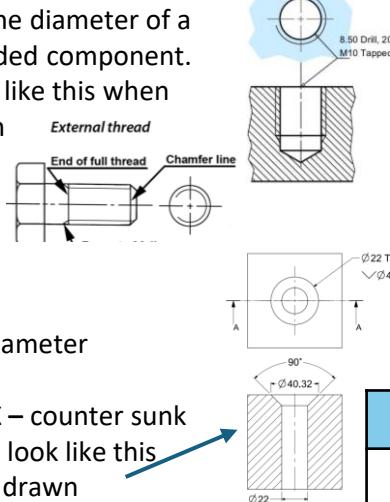

The dead center is placed in the **tailstock**. If the cutting tools are not in line with it, then they will not cut efficiently and may overheat.

## C. reading technical drawings

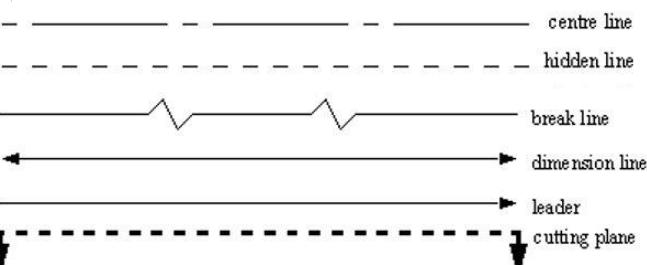

**M** – the diameter of a threaded component.

Looks like this when drawn

**Ø** – diameter

**CSINK** – counter sunk holes, look like this when drawn

## D. Tools &amp; Equipment

**External calliper** – used for measuring the external dimensions of a workpiece

**Lathe tools** – cutting tools for a range of functions.  
From left to right; Parting tool, right-hand cutting tool, threading tool, left-hand cutting tool

**Knurling tool** - an attachment for the lathe that allows you to impress a diamond pattern into the material. Example shown here.

**Tap and die set** – these tools are attached to wrenches and allow you to cut an internal or external thread (spiral) in a hole. The hole must be pre-drilled 0.5mm smaller than the intended size of the final hole.

## What we are learning this term:

## A. Health &amp; Safety

## B. Manufacturing processes

## C. reading technical drawings

## D. Tools &amp; Equipment

| A.              | Health & Safety   |
|-----------------|---|
| Risk Assessment | A risk assessment is the analysis of the risks involved when? |

Hazard –  
Risk –  
Control measure –

Give an example of an Ejection hazard –

Give an example of an Entrapment hazard –

Give an example of an Inhalation hazard –

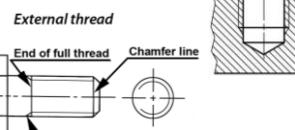

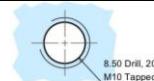

Give an example of a Sharp force hazard –

Give an example of Slip, trip and fall hazards –

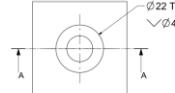

Give an example of a Blunt force hazard –

| C. | Reading technical drawings |
|----|----------------------------|
|----|----------------------------|

M – the diameter of a

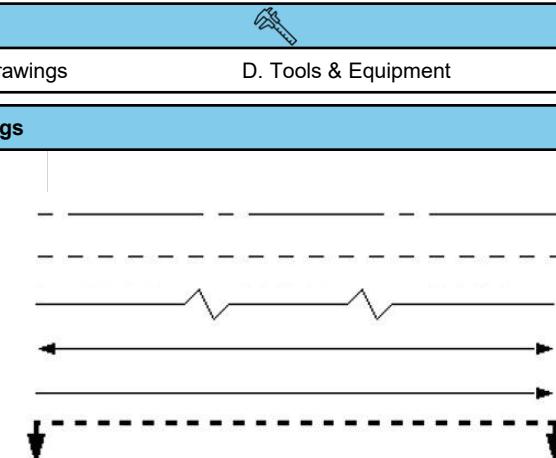

$\emptyset$  –

CSINK –

C \_\_\_\_\_ holes, look like this when drawn

| D. | Tools & Equipment |
|----|-------------------|
|----|-------------------|

– used for measuring the external dimensions of a workpiece

– cutting tools for a range of functions. From left to right; parting tool, end mill, slotting tool

– an attachment for the lathe that allows you to impress a pattern into the material. Example shown here.

– these tools are attached to wrenches and allow you to cut an internal or external (spiral) in a hole. The hole must be pre-drilled smaller than the intended size of the final hole.

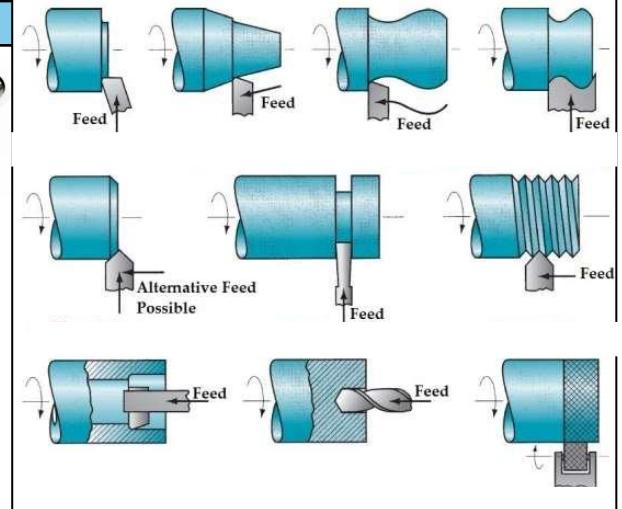

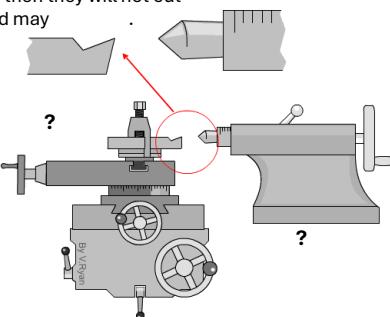

| B. | Manufacturing processes |
|----|-------------------------|
|----|-------------------------|

The \_\_\_\_\_ is used to \_\_\_\_\_ the tools in the \_\_\_\_\_.

The dead center is placed in the \_\_\_\_\_.

If the cutting tools are not \_\_\_\_\_ then they will not cut efficiently and may \_\_\_\_\_.

## Year 10 Food & Nutrition Term 3

### What we are learning this term:

- A. Food Spoilage
- B. Enzymes
- C. Critical Temperatures
- D. Preparing Food Safely
- E. Date Marks
- F. Food Poisoning
- G. Ambient Foods

| A. Food Spoilage   |  |
|--|--|
| Most microorganisms are harmless, but <b>pathogenic</b> microorganisms <b>spoil</b> food and cause <b>food poisoning</b> |  |

#### Microorganisms need five things to grow:

|  |                  |
|--|------------------|
|  | Warm temperature |
|--|------------------|

|  |                  |
|--|------------------|
|  | Lots of moisture |
|--|------------------|

|  |              |
|--|--------------|
|  | Lots of food |
|--|--------------|

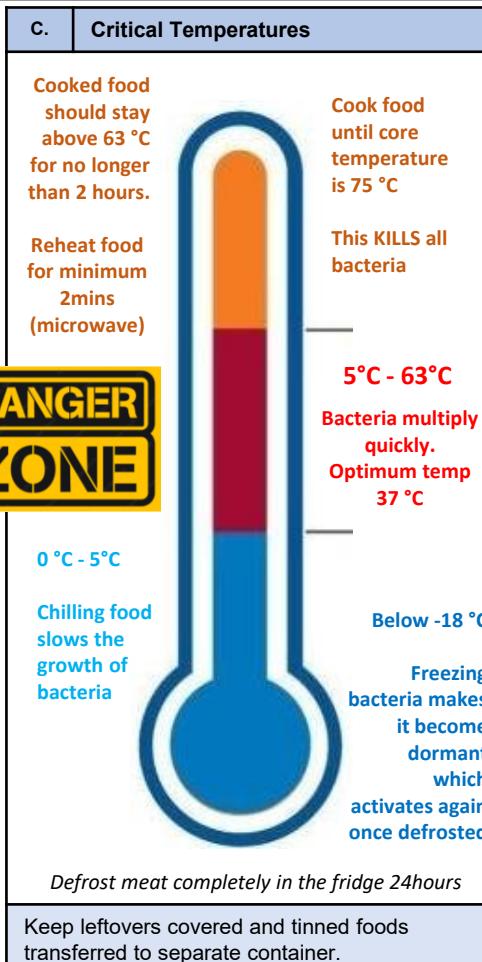

|  |          |
|--|----------|
|  | Right pH |
|--|----------|

|  |                |
|--|----------------|
|  | Plenty of time |
|--|----------------|

|           |  |
|-----------|--|
| Bacteria: | Ready-to-eat foods are at high risk of bacteria (moist, high in protein and short shelf life) e.g. cooked foods, dairy products... |
|-----------|--|

|         |  |
|---------|--|
| Moulds: | Can <b>spoil bread, cheese &amp; fruit</b> . Make food look ' <b>fuzzy</b> ' and change the smell and taste. |
|---------|--|

|         |  |
|---------|--|
| Yeasts: | Can <b>spoil fruit by fermenting sugars</b> into alcohol & CO <sub>2</sub> |
|---------|--|

| C. Critical Temperatures   |  | D. Preparing Food Safely  |  |
|--|--|---|--|
| Cooked food should stay above 63 °C for no longer than 2 hours.  |  | Cook food until core temperature is 75 °C   |  |
| Reheat food for minimum 2mins (microwave)  |  | This KILLS all bacteria   |  |
| 5°C - 63°C Bacteria multiply quickly. Optimum temp 37 °C   |  | 5 °C - 63 °C  |  |
| Below -18 °C Freezing bacteria makes it become dormant which activates again once defrosted  |  | Below -18 °C Freezing bacteria makes it become dormant which activates again once defrosted   |  |
| E. Date Marks – printed on food packaging  |  | F. Food Poisoning – from eating contaminated food   |  |
| Use By   |  | Best Before   |  |
| <ul style="list-style-type: none"> <li>Short shelf life</li> <li>Food may not be safe to eat after this date has past</li> </ul>                                       |  | <ul style="list-style-type: none"> <li>Longer shelf life</li> <li>Food may not taste as nice after this date has past</li> </ul>  |  |
| Eggs has a best before date BUT should be treated like a use by date   |  |   |  |
| G. Ambient Foods   |  | H. Preservation   |  |
| B. Enzymes – proteins that act as a biological catalysts (which speed up chemical reactions)   |  | I. Storage  |  |
| <ul style="list-style-type: none"> <li>Make fruit ripen e.g. bananas become soft and sweet</li> <li>Cause food to turn brown e.g. sliced apples or potatoes</li> </ul> |  | <ul style="list-style-type: none"> <li>Milk is <b>pasteurized</b> (heat treated to 72°C) to kill bacteria</li> <li>Chickens are <b>vaccinated</b> against salmonella to avoid contaminating eggs</li> </ul> |  |
| Slow enzymes by <b>adding an acid</b> (to stop browning) or destroy them by <b>blanching</b> (before freezing)   |  | <ul style="list-style-type: none"> <li>Freeze-drying</li> <li>Canning</li> </ul>  |  |
| E. Ambient Foods – safely stored at room temperature   |  | J. Preservation   |  |
| Should be stored in a sealed container in a cool, dry place. Preservation =  |  | <ul style="list-style-type: none"> <li>Vacuum Packing</li> <li>Using Chemicals</li> </ul>   |  |

## Year 10 Food & Nutrition Term 3

### What we are learning this term:

A. Food Spoilage   B. Enzymes   C. Critical Temperatures   D. Preparing Food Safely   E. Date Marks   F. Food Poisoning   G. Ambient Foods

| A. Food Spoilage  |  |
|---|--|
| Most microorganisms are harmless, but <b>pathogenic</b> microorganisms <b>spoil</b> food and cause food poisoning |  |

#### Microorganisms need five things to grow:

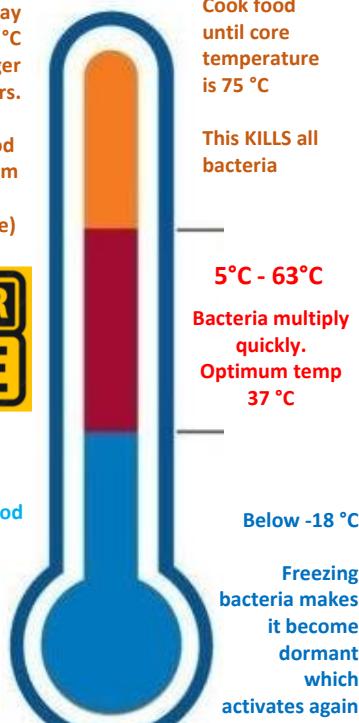

#### Bacteria:

#### Moulds:

#### Yeasts:

| C. Critical Temperatures  |   |
|---|---|
| Cooked food should stay above 63 °C for no longer than 2 hours. | Cook food until core temperature is 75 °C |
| Reheat food for minimum 2mins (microwave)                       | This KILLS all bacteria                   |

| D. Preparing Food Safely   |  |
|--|--|
| Avoid <b>cross-contamination</b> by following <b>safety &amp; hygiene procedures</b> : |  |
| Preparing  |  |
| Cooking  |  |
| Serving  |  |

| E. Date Marks – printed on food packaging |             |

| E. Ambient Foods – safely stored at room temperature   |                 |
| <b>Should be stored in a sealed container in a cool, dry place. Preservation =</b>                             |                 |
| Freeze-drying  | Vacuum Packing  |
| Canning  | Using Chemicals |

# Year 10 BTEC Health and Social Care- Component 1: Human Lifespan Development. LAA

| What we are learning this term:                           |  |   |  |
|---|--|---|--|
| A. Key words  |  |   |  |
| B. What are the main life stages                          |  |   |  |
| C. What are the 4 areas of growth and development (PIES)? |  |   |  |
| D. How do Humans develop physically (P)?                  |  |   |  |
| A. Key words for this Unit                                |  |   |  |
| Characteristics   | Something that is typical of people at a particular life stage.                                      |   |  |
| Life stages   | Distinct phases of life that each person passes through.   |   |  |
| Growth  | Increased body size such as height, weight.  |   |  |
| Development   | Involves gaining new skills and abilities such as riding a bike.                                     |   |  |
| Gross motor development (G)                               | Refers to the development of large muscles in the body e.g. Legs                                     |   |  |
| Fine motor development (F)                                | Refers to the development of small muscles in the body e.g. Fingers                                  |   |  |
| Language development                                      | Think through and express ideas  |   |  |
| Contentment   | An emotional state when people feel happy in their environment, are cared for and well loved         |   |  |
| Self-image  | How individuals see themselves or how they think others see them                                     |   |  |
| Self-esteem   | How good or bad an individual feels about themselves and how much they values their abilities.       |   |  |
| Informal relationships                                    | Relationships formed between family members  |   |  |
| Friendships   | Relationships formed with people we meet in the home or in situations such as schools, work or clubs |   |  |
| Formal relationships                                      | relationships formed with non-family/friends – such as teachers and doctors.                         |   |  |
| Intimate relationships                                    | romantic relationships.  |   |  |
| B. What are the main life stages?                         |  | C. What are the 4 areas of growth and development (PIES)?   |  |
| Age Group   | Life Stage   | Developmental Characteristics and Progress  |  |
| 0-2 years   | Infancy  | Sill dependent on parents but growing quickly and developing physical skills.   | Physical Development (P)      |
| 3-8 years   | Early Childhood  | Becoming increasingly independent, improving thought processes and learning how to develop friendships.   | Intellectual Development (I)  |
| 9-18 years  | Adolescence  | Experiencing puberty, which bring physical and emotional changes.   | Emotional Development (E)     |
| 19-45 years   | Early Adulthood  | Leaving home, making own choices about a career and may start a family.   |  |
| 46-65 years   | Middle Adulthood   | Having more time to travel and take up hobbies as children may be leaving home; beginning of the aging process.   |  |
| 65+ years   | Later Adulthood  | The aging process continues, which may affect memory and mobility.  | Social Development (S)        |
| D. How do humans develop physically (P)?                  |  |   |  |
| 0-2   |  | <ul style="list-style-type: none"> <li>Gross Motor Development (G) = life head, roll over, sit unaided, walk holding onto something, walk unaided, climb stairs, kick and throw, walk upstairs, jump.</li> <li>Fine Motor Development (F) = hold a rattle for short time, reach for an item, pass item from one hand to other, hold between finger and thumb, scribble, build a tower, use a spoon, draw lines and circles, turn page of a book.</li> </ul> |  |
| 3-8   |  | <ul style="list-style-type: none"> <li>G = ride a tricycle, catch a ball with two hands, walk backwards and step to the side, bounce a ball, run on tiptoes, ride a bike, catch a ball with one hand, balance along a thin line.</li> <li>F = hold a crayon to make circles and lines, thread small beads, copy letters and shapes with a pencil, make detailed models with construction bricks, joined up writing, use a needle to sew.</li> </ul>         |  |
| 9-18  |  | <ul style="list-style-type: none"> <li>Girls = puberty starts at 10-13 years, breasts grow, hips widen, menstruation begins, uterus and vagina grow.</li> <li>Boys = voice deepens, muscles and strength increase, erections, facial hair, produce sperm.</li> <li>Both = pubic and underarm hair, growth spurts.</li> </ul>  |  |
| 19-45   |  | <ul style="list-style-type: none"> <li>Physically mature, sexual characteristics are fully formed, peak of physical fitness, full height, women at most fertile.</li> <li>Later in the life stage people may put on weight, hair turn grey and men may lose hair, women's menstrual cycle was slow down</li> </ul>  |  |
| 46-65   |  | <ul style="list-style-type: none"> <li>People may put on weight, hair turn grey and men may lose hair, women's menstrual cycle was slow down.</li> <li>Women go through the menopause – when menstruation ends and they can no longer become pregnant.</li> <li>Men may continue to be fertile throughout life but decrease in sperm production in this life stage.</li> </ul>  |  |
| 65+   |  | <ul style="list-style-type: none"> <li>Women's hair becomes thinner, men may lose most of their hair, skin loses elasticity and wrinkles appear, nails hard and brittle, bones weaken, higher risk of contracting infections disease and illness.</li> <li>Stamina, reaction time, muscle and senses (hearing, sight, taste) all reduce.</li> </ul>   |  |

# Year 10 BTEC Health and Social Care- Component 1: Human Lifespan Development. LAA

| What we are learning this term:   |  | F. How do humans develop emotionally (E)?  |  |
|---|--|--|--|
| E. How do humans develop intellectually (I)?<br>F. How do humans develop emotionally (E)?<br>G. How do humans develop socially (S)? |  | <b>Infancy and Early Childhood</b><br><b>Bonding and Attachment</b><br>Bonding and attachment describe the emotional ties an individual forms with others. It starts in the first year of life between infants and their main carer because that person fulfils the infants needs which makes them feel safe and secure. |  |
| E. How do humans develop intellectually (I)?  |  | <b>Security</b><br>For infants and young children, security is mainly the feeling of being cared for, being safe and loved – it is closely linked with attachment.   |  |
| Infancy   |    | <b>Contentment</b><br>Infants and young children are content if they have had enough food, love, are clean and dry and all other needs are met.  | <b>Self-image and Self-esteem</b><br>Self-image is heightened during adolescence because of the physical changes we experience. Our self-esteem can change from day to day based on a variety of factors including employment and health status.   |
| Early childhood   |    | <b>Independence</b><br>Independence is to care for yourself and make your own decisions. Infants are completely dependent on their carer. As children enter early childhood they develop more independence – feed self and get dressed. However, children still need a lot of help from their carer.                     | <b>Independence</b><br>Adolescence are dependent on their parents but are beginning to enjoy more independence and freedom to make their own choices. Adults enjoy living independently and controlling their own lifestyle and environment. Later in adulthood people become more dependent on others again.  |
| Adolescence   |   | <b>G. How do humans develop socially (S)?</b><br><b>Life Stage</b> Types of relationships and social development   |  |
| Early and Middle Adulthood  |  | Infancy  | <ul style="list-style-type: none"> <li>• Solitary Play - From birth to 2 years, infants tend to play alone although they like to be close to their parent or carer; they may be aware of other children but not play with them.</li> </ul>   |
|   |  | Early childhood  | <ul style="list-style-type: none"> <li>• Parallel Play - From 2 to 3 years, children enjoy playing next to other children but are absorbed in their own game; they are not socialising or playing with other children.</li> <li>• Cooperative or social play – from 3 years upwards, children start to play with other children; they have developed social skills that help them to share and talk together; they often make up games together, such as being a shopkeeper and customer.</li> </ul> |
| Later adulthood   |  | Adolescence  | <ul style="list-style-type: none"> <li>• People become more independent and build more informal and formal relationships.</li> <li>• Social development closely linked to emotions.</li> <li>• Often strongly influenced by peers – ‘peer group pressure’.</li> </ul>  |
|   |  | Early adulthood  | <ul style="list-style-type: none"> <li>• Increased independence means greater control of decisions about informal relationships.</li> <li>• People may be developing emotional and social ties with partners and their own children.</li> <li>• Social life often centred on the family but social skills are required to build and maintain formal relationships.</li> </ul>  |
|   |  | Middle adulthood   | <ul style="list-style-type: none"> <li>• Children have often left home, but there are likely to still be strong family relationships.</li> <li>• Social circles may expand through travel, spending more time on hobbies or joining new groups.</li> </ul>   |
|   |  | Later adulthood  | <ul style="list-style-type: none"> <li>• Retired by this stage and so may enjoy more social time with family and friends or join new groups.</li> <li>• However, later in the life stage people may begin to feel isolated if they struggle to get out or if partners and friends pass away.</li> </ul>  |

| L. How do relationships and isolation affect development? |  |
| M. How do economic factors affect development?            |  |
| H Key words:  |  |
| Genetic inheritance                                       | Genes the person inherits from their parents   |
| Genetic disorders   | Health conditions that are passed on from parent to child through their genes. e.g. cystic fibrosis                              |
| Lifestyle Choices   | Include the food you eat and how much exercise you do. They also include whether you smoke, drink alcohol or take illegal drugs. |
| Appearance  | The way that someone or something looks  |
| Factor  | A circumstance, fact, or influence that contributes to a result  |
| Gender role   | The role and responsibilities determined by a person's gender.   |
| Culture   | ideas, customs, and social behaviour.  |
| Role models   | Someone a person admires and strives to be like.   |
| Social Isolation  | Lack of contact with other people  |
| Material possessions                                      | Things that are owned by an individual   |
| Economic  | To do with person's wealth and income.   |

| I.   | How do physical factors affect development?   |  |
|--|---|--|
|  | Genetic Disorders   | Disease and Illness  |
| Physical Development   | A person's physical build can affect physical abilities. Inherited diseases may affect strength and stamina needed to take part in exercise.                    | May affect the rate of growth in infancy and childhood. Could affect the process of puberty. Could cause tiredness and/or mobility problems. Could limit or prevent participation in physical activity.  |
| Intellectual Development   | Some genetically inherited diseases may result in missed schooling, or have a direct impact on learning – conditions such as Edward's syndrome impact learning. | School, college, university, work or training could be missed. Memory and concentration could be affected.   |
| Emotional Development  | Physical appearance affects how individuals see themselves (self-image), and how others respond to them impacts on their confidence and wellbeing.              | May cause worry and/or stress. Individuals may develop negative self-esteem. Could lead to feelings of isolation.  |
| Social Development   | Physical characteristics or disease may affect opportunities or confidence in building friendships and becoming independent.                                    | May cause difficulty in having opportunities to socialize with other and build wider relationships.  |
| J.   | How does lifestyle affect development?  |  |
| <b>Lifestyle choices</b> include; diet, exercise, alcohol, smoking, sexual relationships and illegal drugs, appearance.  |   |  |
| <b>Positive lifestyle choices lead to:</b> <ul style="list-style-type: none"> <li>• Healthy hair, skin, nails and teeth</li> <li>• Positive self-image</li> <li>• Energy and stamina</li> <li>• Good health</li> <li>• Emotional security</li> </ul>    |   | <b>Negative lifestyle choices lead to:</b> <ul style="list-style-type: none"> <li>• Being overweight or underweight</li> <li>• Lack of energy</li> <li>• Ill health</li> <li>• Negative self-image</li> <li>• Sexually transmitted diseases (STDs)</li> <li>• Unplanned pregnancy</li> </ul>    |
| Our <b>appearance</b> includes: body shape, facial features, hair and nails, personal hygiene and our clothing. Our appearance can affect the way we view ourselves- self-image  |   |  |
| <b>Positive self-image:</b> <ul style="list-style-type: none"> <li>• Feel good about yourself.</li> <li>• Healthy hair, skin, nails and teeth</li> <li>• Big social circle.</li> <li>• High self-esteem.</li> <li>• High self-confidence.</li> </ul>  |   | <b>Negative self-image</b> <ul style="list-style-type: none"> <li>• Low self-esteem</li> <li>• Low self-confidence</li> <li>• Can lead to eating disorders e.g. anorexia</li> <li>• Can lead to anxiety or depression</li> <li>• Can lead to self-harm</li> <li>• Negative impact on building relationships- social circle decreases.</li> </ul>  |

| What we are learning this term:  |  | O.                     | How do people deal with life events?  |
|--|--|------------------------|---|
| N. What are life events?<br>O. How do people deal with life events?<br>P. How is dealing with life events supported? |  | Individual             | <ul style="list-style-type: none"> <li>The effects of life events vary from person to person based on how they deal with their new situation.</li> <li>Some people react to able to react to life events positively, others find it more difficult due to a range of factors.</li> </ul>  |
| N. What are life events?   |  | Factors                | <ul style="list-style-type: none"> <li>Factors that may affect how people cope with life events: age, other life events happening at the same time, the support they have, their disposition (their mood, attitude and general nature), their self-esteem, their resilience (how quickly they recover).</li> </ul>  |
| Life Events  | Life events are expected or unexpected events that can affect development. Examples include starting nursery, getting married or becoming ill.   | Adapting               | <ul style="list-style-type: none"> <li>Adapt – to adjust to new conditions or circumstances.</li> <li>Expected on unexpected life events can often force people to make changes to their lives. Individuals must find their own way to adapt to the changes that life throws at them.</li> </ul>  |
| Expected Life Events   | Expected life events are life events that are likely to happen. Examples include starting primary school aged four and secondary school aged 11.   | Resilience             | <ul style="list-style-type: none"> <li>Resilience – a person's ability to come to terms with, and adapt to, events that happen in life.</li> <li>Resilience is stronger in people who have a positive outlook on life, accept that change happens, has supportive family and friends and plans for expected life events.</li> </ul>   |
| Unexpected Life Events   | Unexpected life events are events which are not predictable or likely to happen. Examples could include divorce and bereavement (the death of a loved one).  | Time                   | <ul style="list-style-type: none"> <li>Sometimes people need a long time to adapt to unexpected life events.</li> <li>It can take time for people to move on from and accept difficult changes in their life.</li> </ul>  |
| Physical Events  | Physical events are events that make changes to your body, physical health and mobility. Examples include illnesses such as diabetes and injuries and accidents such as car accidents.                         | P.                     | How is dealing with life events supported?  |
| Relationship Changes   | Relationship changes could be new relationships such as the birth of a sibling, a new friendship or romantic relationship. Relationship changes can also be changes to existing relationships such as divorce. | Types of Support       | How this helps individuals deal with life events  |
| Life Circumstances   | Life circumstances are different situations that arise in our life that we must deal with. Examples include redundancy (losing a job), moving house or retirement (finishing work in later adulthood).         | Emotional Support      | Emotional support is needed to help individuals deal with all life events – expected and unexpected. Having someone to talk to helps people feel secure and adapt to change. Sometimes individuals can find this support in family and friends or professionals to process difficult life events – such as bereavement.   |
|  |  | Information and Advice | Life events, particularly unexpected ones, can cause people to feel like they do not know what to do. Information and advice can help people to have a better understanding of their situation, which allows them to deal with it more successfully. Information and advice help them know where to go for help, the choices than are available to them and how to make healthy choices.  |
|  |  | Practical Help         | <ul style="list-style-type: none"> <li>Financial help – an individual may need money to help them adapt to a life change i.e. money to pay for a stair lift if their mobility has been effected.</li> <li>Childcare – an individual may need support looking after their children i.e. a lone parent after a divorce that needs to go to work.</li> <li>Transport – an individual may need support with transport if they have mobility problems i.e. a car could be adapted to support a person who has had an accident and can no longer walk.</li> </ul>                               |
|  |  | Informal Support       | Informal support is the support an individual receives from partners, family and friends. It is usually the first form of support an individual experiences after and expected or unexpected life event. Informal support can provide reassurance, encouragement, advice, a sense of security, someone to talk through options with and practical help.   |
|  |  | Professional Support   | Formal support may be provided by statutory care services (the state), private care services and charitable organizations. Professional support may include counsellors, teachers, careers advisers, occupational therapists, social workers and health specialists. Professional support may be needed to help people with a health condition, regain mobility, deal with life changes and emotions, get advice and information or change their lifestyle.   |
|  |  | Voluntary Support      | Organizations offering voluntary support are charities, community groups and religious groups. At voluntary support services, many staff are volunteers (they work for free), but they also employ qualified people who are paid by donations. Community groups work at a local level to meet the needs of people living in a specific neighbourhood i.e. foodbanks. Religious groups are formed by people who share the same religious or spiritual beliefs but they help all people in need regardless of their beliefs and background i.e. a church run soup kitchen for the homeless. |

# Film Music

## Area of study 3 - Eduqas GCSE Music

Some film **SOUNDTRACKS** include specially composed **SCORES**, either for orchestra (e.g. composers like John Williams, Ennio Morricone) or songs written especially for the film (e.g. Disney films). Other films use pre-existing music e.g. popular songs from the era/place in which the film is set.

### STRINGS

- Violin
- Cello
- Viola
- Double bass
- Harp

### BRASS

- Trumpet
- Trombone
- French horn
- Tuba

### PERCUSSION

- Bass drum
- Snare drum
- Triangle
- Cymbal
- Drum kit (untuned)
- Timpani
- Glockenspiel
- Xylophone (tuned)

### WOODWIND

- Flute
- Clarinet
- Oboe
- Bassoon
- Saxophone

### KEYBOARDS

- Piano
- Electronic keyboard
- Harpsichord
- Organ
- Synthesizer

### OTHER

- Electric guitar
- Bass guitar
- Spanish/ classical guitar
- Traditional world instruments

### Musical elements

Film composers use the **MUSICAL ELEMENTS** (tempo, texture, dynamics, timbre, tonality, rhythm, melody, harmony) to create mood and atmosphere to help to tell the story and enhance the action.

For example:

In a sad, reflective scene, a composer might use slow tempo, minor tonality, soft dynamics, legato, homophonic texture, long sustained notes, and a conjunct melody.

An exciting car chase scene in a thriller might have a fast tempo, busy, polyphonic texture, dissonant chords, loud dynamics, syncopated rhythms, a disjunct melody and short riffs.

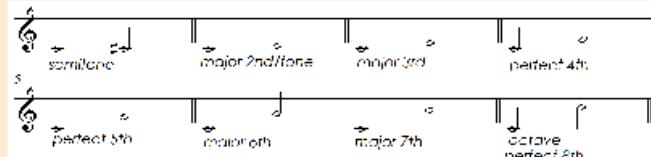

A scene where the superhero 'saves the day' might use a major tonality, brass fanfares, loud dynamics, accents, 4<sup>th</sup> and 5<sup>th</sup> (intervals).

Composers will often use **CONTRASTS** to create effect (e.g. using a wide range of pitch from very high to very low).

### Intervals

Film composers often use intervals to create a particular effect (e.g. a rising perfect 4<sup>th</sup> sounds 'heroic', and a semitone can sound 'menacing').

An interval is the distance between two notes.

Rising interval: moving upwards (ascending)

Falling interval: moving downwards (descending)

### Specific instrumental terms

|                 |  |
|-----------------|--|
| Pizzicato       | Plucking the strings.  |
| Divisi          | Two parts sharing the same musical line.   |
| Double stopping | Playing two strings at the same time.  |
| Arco            | Using a bow to play a stringed instrument.   |
| Tremolo         | A 'trembling' effect, moving rapidly on the same note or between two chords (e.g. using the bow rapidly back and forth). |
| Tongued         | A technique to make the notes sound separated (woodwind/brass).  |
| Slurred         | Notes are played smoothly.   |
| Muted           | Using a mute to change/dampen the sound (brass/strings).   |
| Drum roll       | Notes/beats in rapid succession.   |
| Glissando       | A rapid glide over the notes.  |
| Trill           | Alternating rapidly between two notes.   |
| Vibrato         | Making the notes 'wobble' up and down for expression.  |

### Composers also use:

|                   |   |
|-------------------|---|
| Theme             | The main tune/melody.   |
| Motif             | A short musical idea (melodic or rhythmic).   |
| Leitmotif         | A recurring musical idea linked to a character/object or place (e.g. Darth Vader's motif in Star Wars).                 |
| Underscoring      | Music playing underneath the dialogue.  |
| Scalic            | Melody follows the notes of a scale.  |
| Triadic           | Melody moves around the notes of a triad.   |
| Fanfare           | Short tune often played by brass instruments, to announce someone/something important; based on the pitches of a chord. |
| Pedal note        | A long, sustained note, usually in the bass/lower notes.  |
| Ostinato/riff     | A short, repeated pattern.  |
| Conjunct          | The melody moves by step.   |
| Disjunct          | The melody moves with leaps/intervals.  |
| Consonant harmony | Sounds 'good' together.   |
| Dissonant harmony | Sounds 'clashy'.  |
| Chromatic harmony | Uses lots of semitones/accidentals that's not in the home key.  |
| Minimalism        | A style of music using repetition of short phrases which change gradually over time.                                    |

| Question  | Answer   | Question   | Answer   |
|---|--|--|--|
| What is a <b>Theme</b> in film music?                             |  | What does the word <b>Interval</b> mean?                   |  |
| Define <b>Pizzicato</b>   |  | A _____ <b>Texture</b> is typically used for a sad scene   | <b>Polyphonic</b><br><b>Monophonic</b><br><b>Homophonic</b>  |
| What is <b>Minimalism</b> ?                                       |  | A <b>Major tonality</b> is used for what kind of scene?    |  |
| How does a <b>Rising Perfect 4<sup>th</sup></b> sound?            |  | What is a <b>Trill</b> ?                                   |  |
| Define <b>Ostinato</b>  |  | The term for a piece of music written for a film is a..... | <b>Score</b><br><b>Soundtrack</b>  |
| What <b>Dynamics</b> could be used in a car chase scene?          | <b>pp</b> <b>p</b> <b>f</b> <b>ff</b> <b>mp</b> <b>mf</b>  | What is a <b>Falling interval</b> ?                        |  |
| Circle the correct definition for <b>Conjunct</b>                 | <ol style="list-style-type: none"> <li>1. The melody moves in leaps</li> <li>2. The melody moves in steps</li> <li>3. The melody moves in octaves</li> <li>4. The melody repeats the same 3 notes</li> </ol> | List 3 film composers                                      |  |
| What is <b>Vibrato</b> ?  |  | If notes are <b>Slurred</b> they are played?               | <b>Short and snappy</b><br><b>Smoothly</b>   |
| What do composers use to create effect? Circle the correct answer | <b>Contrast</b><br><b>Brass Fanfares</b><br><b>Dynamics</b>  | What interval is an <b>Octave</b> ?                        | <b>Perfect 4<sup>th</sup></b><br><b>Major 2<sup>nd</sup></b><br><b>Minor 2<sup>nd</sup></b><br><b>Perfect 8<sup>th</sup></b> |
| What is the term for a theme that is repeated throughout a film?  |  | What does <b>Scalic</b> mean?                              |  |
