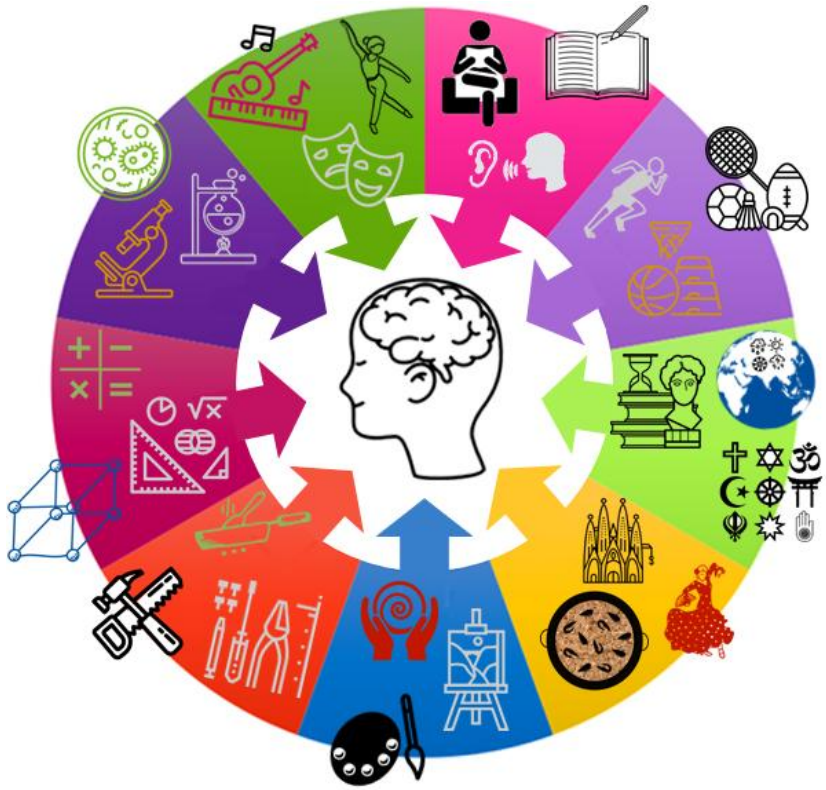
100% book - Year 7 Grammar

Aim to memorise 100% of the knowledge on these Knowledge Organisers



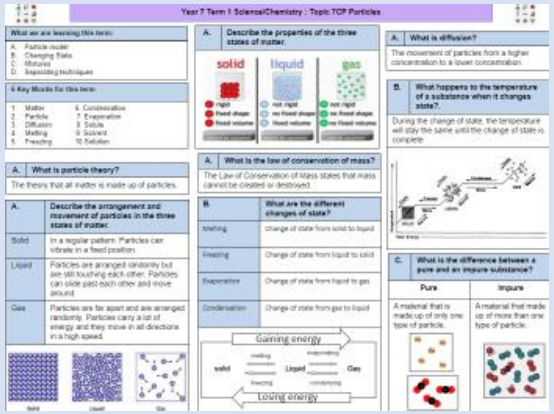
Term 3

Swindon Academy 2025-26	
Name:	
Tutor Group:	
Tutor & Room:	

"If you are not willing to learn, no one can help you.
If you are determined to learn, no one can stop you."

Using your Knowledge Organiser and Quizzable Knowledge Organiser

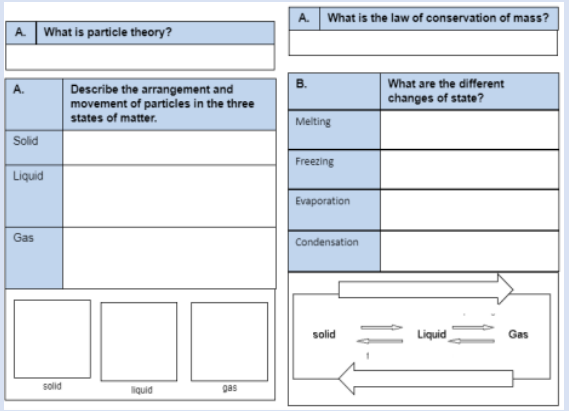
Knowledge Organisers



Knowledge Organisers contain the essential knowledge that you MUST know in order to be successful this year and in all subsequent years.

They will help you learn, revise and retain what you have learnt in lessons in order to move the knowledge from your short-term memory to long-term memory.

Quizzable Knowledge Organisers



These are designed to help you quiz yourself on the essential Knowledge.

Use them to test yourself or get someone else to test you, until you are confident you can recall the information from memory.

Top Tip

Don't write on your Quizzable Knowledge Organisers! Quiz yourself by writing the missing words in your prep book. That way you can quiz yourself again and again!

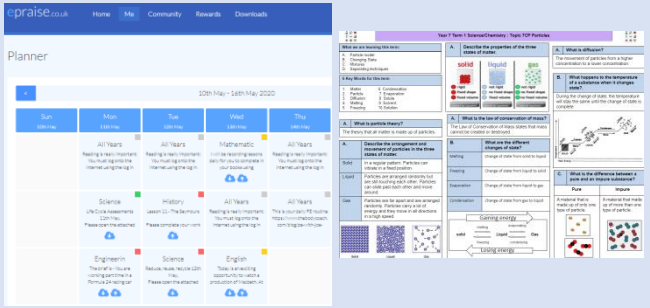
Expectations for Prep and for using your Knowledge Organisers

1. Complete all prep work set in your subject prep book.
2. Bring your prep book to every lesson and ensure that you have completed all work by the deadline.
3. Take pride in your prep book – keep it neat and tidy.
4. Present work in your prep book to the same standard you are expected to do in class.
5. Ensure that your use of SPAG is accurate.
6. Write in blue or black pen and sketch in pencil.
7. Ensure every piece of work has a title and date.
8. Use a ruler for straight lines.
9. If you are unsure about the prep, speak to your teacher.
10. Review your prep work in green pen using the mark scheme.

How do I complete Knowledge Organiser Prep?

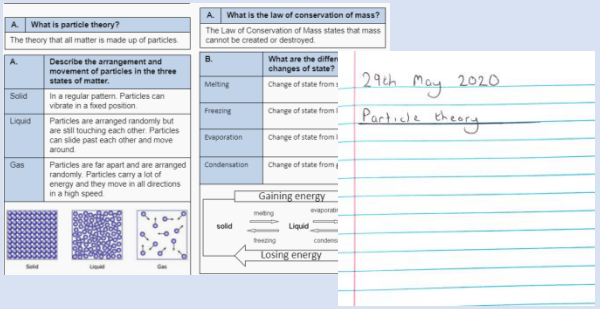
Step 1

Check Epraise and identify what words /definitions/facts you have been asked to learn. Find the Knowledge Organiser you need to use.



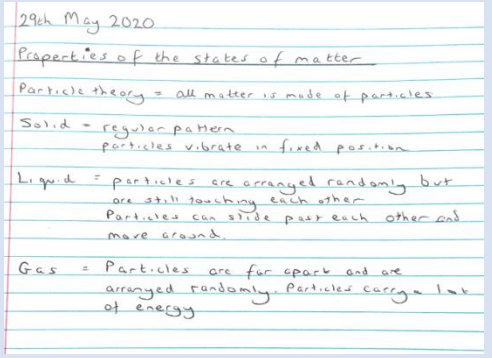
Step 2

Write today's date and the title from your Knowledge Organiser in your Prep Book.



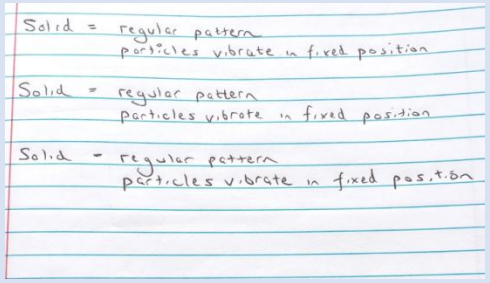
Step 3

Write out the keywords/definitions/facts from your Knowledge Organiser in FULL.



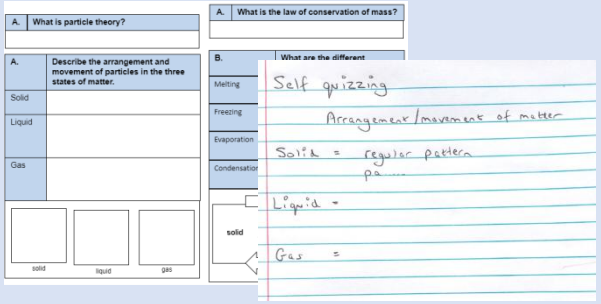
Step 4

Read the keywords/definitions/facts out loud to yourself again and again and write the keywords/definitions/facts at least 3 times.



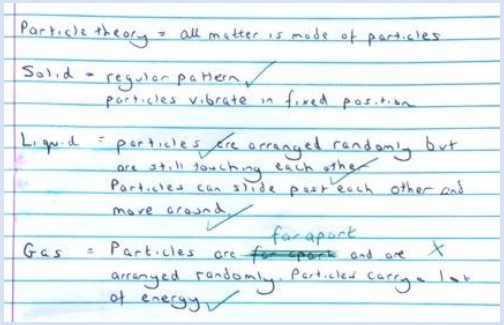
Step 5

Open your quizzable Knowledge Organiser. Write the missing words from your quizzable Knowledge organiser in your prep book.



Step 6

Check your answers using your Knowledge Organiser. Repeat Steps 3 to 5 with any questions you got wrong until you are confident.



Make sure you bring in your completed Prep notes to demonstrate that you have completed your prep.

Year 7 Poetry

Metaphor

Literal language: if something is **literal** it is accurate or precise.
- A **literal** description tells what actually happens.
- Something that is literal reports on events.
- An example would be 'he is lazy'

Metaphor: if something is a **metaphor** it is **not literal**.
- A **metaphor** does **not report on what actually happens.**
- A **metaphor** tells us more about something by bringing ideas together.
- An example would be 'he is a couch potato'

Tenor, vehicle, ground

A **metaphor** has three parts:
The tenor: the thing you want to try and describe to your audience.
The vehicle: The imaginative idea you compare it with to help your audience understand it. This is the 'made up' bit.
The ground: the thing the tenor and the vehicle have in common.

Here is an example:
'**Achilles** fought like a **lion**' (both Achilles and the lion are **strong**)
Achilles is the tenor because he is the thing being described. The lion is the vehicle because it is the imaginative idea Achilles is compared to. The ground is that they are both strong because this is what they have in common.

The poems and their key metaphors

	'Sally' – Phoebe Hesketh, 1909 – 2005 '**She** was **a dog-rose** kind of girl:/ Elusive, scattery as **petals**'	**Both Sally and 'a dog-rose' are wild and not traditionally beautiful.**
	Frogs by Norman MacCaig 1910 – 1996 "**Frogs** that sit like **Buddha**"	**Both frogs and 'Buddha' are gentle and peaceful beings.**
	'The Eagle' – Alfred, Lord Tennyson, 1809 – 1892 'And like **a thunderbolt he falls**'	**Both the eagle falling and 'a thunderbolt' are fast and dangerous.**
	'The Tyger' – William Blake, 1757 – 1827 '**Tyger, tyger burning** bright'	**Both the tiger and fire are beautiful and powerful, but also difficult to control.**

Review **of the year's core knowledge**:	
What three questions do you follow in a paragraph?	What, How, Why
What is a 'WHAT'?	A WHAT is your first sentence in a paragraph that states your point/big idea on the question focus
What is a quotation?	A quotation is a sentence or phrase copied exactly from what someone has said or written. To quote means to copy exactly what someone has said or written.
What are the three checks that you should do to be sure your quotation is effective?	Show that the point is accurate. Avoid repeating the point. Last no more than two lines of your writing.
What are some examples of methods?	Metaphors, semantic fields, similes, dynamic verbs, adjectives etc
What words should you use in your paragraph to explain?	As/because/ due to
Who should you always refer back too in a paragraph?	The writer

Year 7 Poetry

Metaphor

Literal language: if something is **literal** it is accurate or precise.

-

-
-

Tenor, vehicle, ground

A **metaphor** has three parts:
The tenor:
The vehicle:
The ground:.

Here is an example:
'**Achilles** fought like a **lion**' (both Achilles and the lion are **strong**)
Achilles is the tenor
_____ **The lion is the vehicle**
because it is _____. **The ground is**
_____

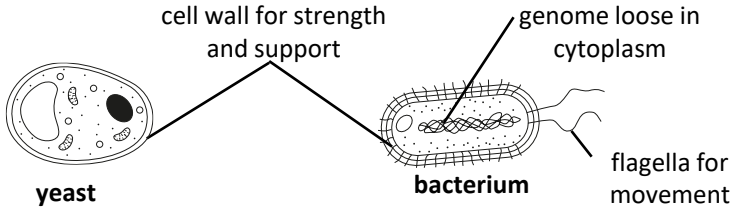
The poems and their key metaphors

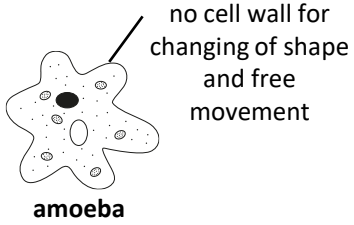
	'Sally' – Phoebe Hesketh, 1909 – 2005 '**She** _____ _____ _____ '	
	Frogs by Norman MacCaig 1910 – 1996 "**Frogs**_____"	
	'The Eagle' – Alfred, Lord Tennyson, 1809 – 1892 'And like _____ _____'	
	'The Tyger' – William Blake, 1757 – 1827 '**Tyger,** **tyger**_____ _____'	

Review **of the year's core knowledge**:	
What three questions do you follow in a paragraph?	
What is a 'WHAT'?	
What is a quotation?	
What are the three checks that you should do to be sure your quotation is effective?	
What are some examples of methods?	
What words should you use in your paragraph to explain?	
Who should you always refer back too in a paragraph?	

7.05 Organ systems

Unicellular organisms are made of only one cell (e.g. bacteria, amoeba and yeast).
- They can carry out the 7 life processes of living organisms, all in one cell.
- Unicellular organisms share common organelles, but they also have adaptations.
- Unicellular organisms can be helpful or harmful.
- Unicellular organisms use diffusion to exchange substances.





Multicellular organisms are made of many cells (e.g. plants and humans).
- They are larger and more complex than unicellular organisms.
- They cannot rely on diffusion alone for exchanging substances.
- Multicellular organisms depend on tissues, organs, and organ systems working together to exchange and transport substances to cells of the body, to keep cells alive.
- Organ systems in humans include the **gas exchange system**, **digestive system**, **circulatory system**, **skeletal system** and **muscular system**.

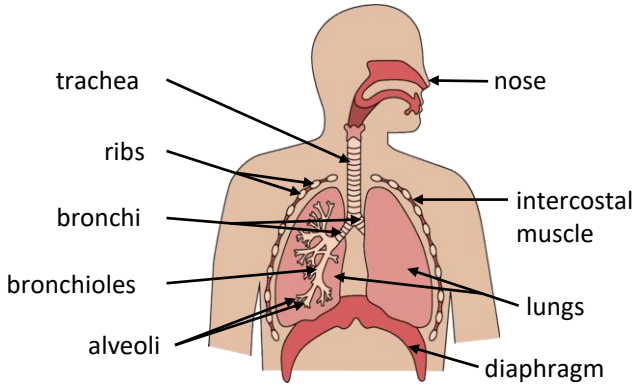
- Used in baking
- Used to make alcoholic drinks

- Supports digestion
- Used to make cheese and yoghurt

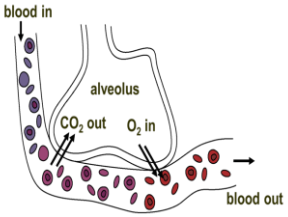
Gas exchange system

Air is a mixture of gases, including oxygen and carbon dioxide.

The human gas exchange system allows for the exchange of oxygen and carbon dioxide between an organism and its environment. Inhaled air contains more oxygen than exhaled air. Exhaled air contains more carbon dioxide than inhaled air. Oxygen moves from the alveoli into cells and then into the blood vessels (capillaries), while carbon dioxide moves in the opposite direction via diffusion.



Alveoli are adapted for efficient diffusion:
- **good blood supply** maintains the concentration difference
- **large surface area** for faster rate of diffusion
- **thin walls** (one cell thick) to provide a shorter diffusion pathway



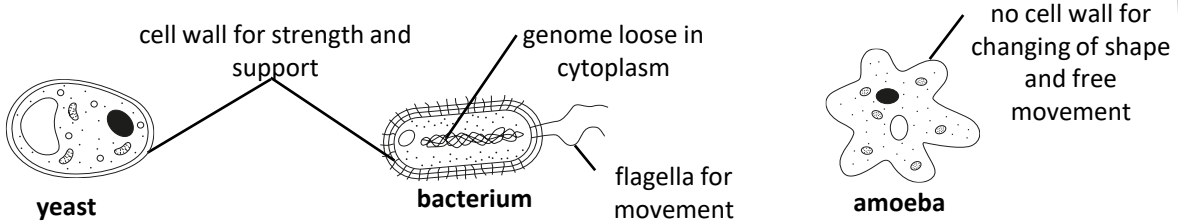
Breathing involves changes in pressure and volume inside the chest, helped by the movement of intercostal muscles and diaphragm, which causes the movement of the ribcage.
Vital capacity is the maximum volume of air exhaled after inhaling fully and can be used to estimate lung volume.

	Inhalation	Exhalation
Intercostal muscles	contract	relax
Ribcage	pulled up and out	released down and in
Diaphragm	contracts and moves downwards	relaxes and moves upwards
Volume in the chest	increases	decreases
Pressure in the chest	decreases	increases
Movement of air	into the lungs	out of the lungs

7.05 Organ systems

_____ organisms are made of only one cell (e.g. bacteria, amoeba and yeast).

- They can carry out the 7 life processes of living organisms, all in one cell.
- Unicellular organisms share common organelles, but they also have adaptations.
- Unicellular organisms can be helpful or harmful.
- Unicellular organisms use _____ to exchange substances.



- Used in _____
- Used to make _____

- Supports _____
- Used to make _____

_____ organisms are made of many cells (e.g. plants and humans).

- They are _____ and more _____ than unicellular organisms.
- They cannot rely on _____ alone for exchanging substances.
- Multicellular organisms depend on tissues, _____, and _____ working together to exchange and transport substances to cells of the body, to keep cells alive.
- Organ systems in humans include the **gas exchange system**, **digestive system**, **circulatory system**, **skeletal system** and **muscular system**.

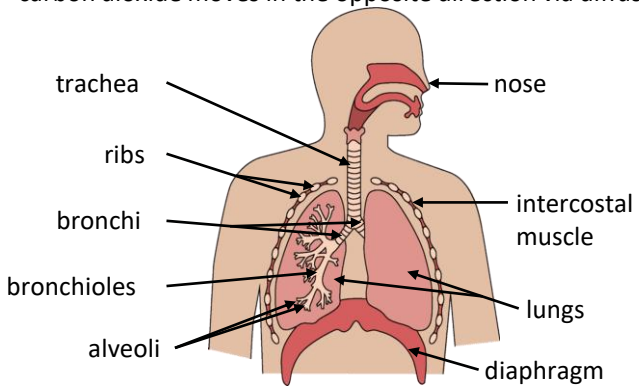
Gas exchange system

Inhaled air contains more _____ than exhaled air. Exhaled air contains more _____ than inhaled air.

_____ involves changes in pressure and volume inside the chest, helped by the movement of intercostal muscles and diaphragm, which causes the movement of the ribcage.
Vital capacity is the maximum volume of air exhaled after inhaling fully and can be used to estimate lung volume.

The human gas exchange system allows for the exchange of _____ and _____ between an organism and its _____.

_____ moves from the _____ into _____ and then into the blood vessels (capillaries), while carbon dioxide moves in the opposite direction via diffusion.



Alveoli are adapted for efficient diffusion:

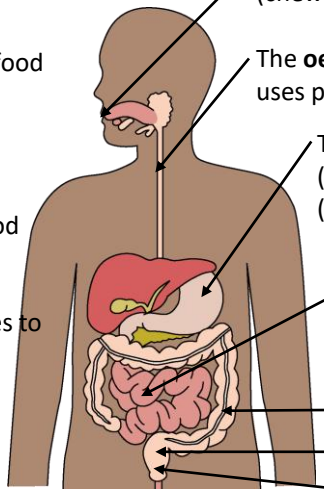
- **Good** _____ _____ maintains the concentration difference
- **large** _____ for faster rate of diffusion
- **thin** _____ (one cell thick) to provide a shorter diffusion pathway

	Inhalation	Exhalation
Intercostal muscles		
Ribcage		
Diaphragm		
Volume in the chest		
Pressure in the chest		
Movement of air		

7.05 Organ systems

Digestive system

- The human digestive system breaks down large, insoluble food molecules into small, soluble molecules so that they can be absorbed into the blood.
- **Mechanical digestion:** the physical breakdown of food into smaller pieces.
- **Chemical digestion:** the use of chemical substances to break food down into smaller molecules.



The **mouth** performs both mechanical digestion (chewing) and chemical digestion (saliva).

The **oesophagus** connects the mouth to the stomach and uses peristalsis to push food down.

The **stomach** performs both mechanical digestion (muscular tissue contracts) and chemical digestion (glandular tissue producing chemical substances).

The **small intestine** breaks down food chemically. Absorption of digested nutrients also happens here.

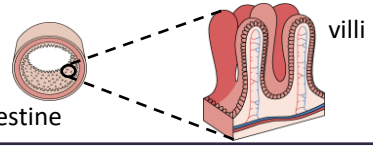
The **large intestine** reabsorbs water from undigested food back into the blood.

Faeces (poo) are stored in the **rectum**.

Faeces and waste gases are egested from the **anus**.

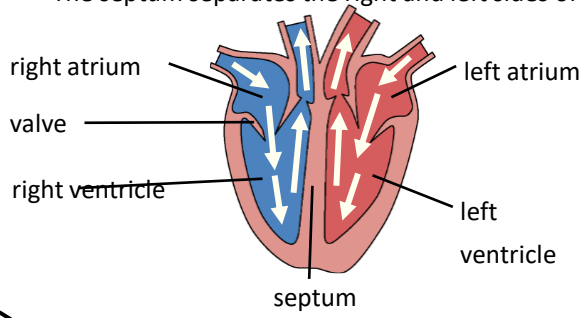
Adaptations:
The small intestine is covered in many villi for efficient absorption by diffusion:

- villi provide a **large surface area** for faster rate of diffusion
- villi have **good blood supply** to maintain the concentration difference
- villi have **thin walls** (one cell thick) to provide a shorter diffusion pathway

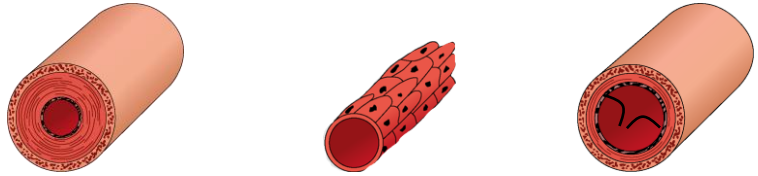


Circulatory system

- The circulatory system transports useful molecules and waste around the body. The human circulatory system consists of the heart, blood and blood vessels.
- The heart has four chambers: two atria and two ventricles.
- Valves ensure blood flows in the right direction.
- The septum separates the right and left sides of the heart.



The heart pumps oxygenated blood from the lungs to the body and deoxygenated blood from the body to the lungs (double circulatory system).

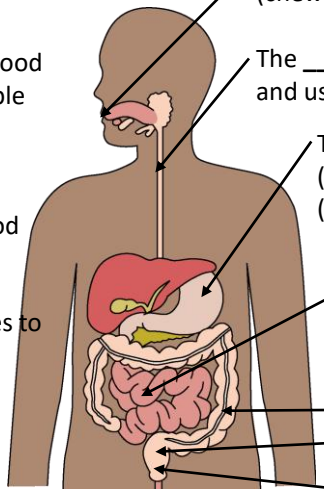


Arteries	Capillaries	Veins
• Blood taken away from heart • High pressure blood • Thick muscular and elastic walls • Small lumen	• Exchange substances between blood and cells • Very low pressure blood • Very thin walls (one cell thick) • Very small lumen	• Blood brought back to heart • Low pressure blood • Thin walls • Large lumen • Valves prevent back flow

7.05 Organ systems

Digestive system

- The human digestive system breaks down ____, insoluble food molecules into _____, soluble molecules so that they can be _____ into the blood.
- _____ **digestion:** the physical breakdown of food into smaller pieces.
- _____ **digestion:** the use of chemical substances to break food down into smaller molecules.



The _____ performs both mechanical digestion (chewing) and chemical digestion (saliva).

The _____ connects the mouth to the stomach and uses peristalsis to push food down.

The _____ performs both mechanical digestion (muscular tissue contracts) and chemical digestion (glandular tissue producing chemical substances).

The _____ breaks down food chemically. Absorption of digested nutrients also happens here.

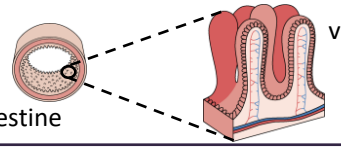
The _____ reabsorbs water from undigested food back into the blood.

Faeces (poo) are stored in the _____.

Faeces and waste gases are egested from the _____.

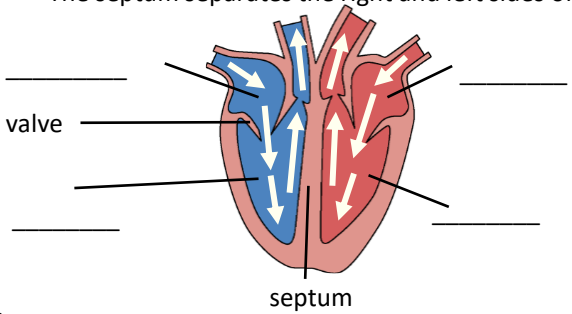
Adaptations:
The small intestine is covered in many _____ for efficient absorption by diffusion:

- villi provide a _____ for faster rate of diffusion
- villi have _____ to maintain the concentration difference
- villi have _____ (one cell thick) to provide a shorter diffusion pathway

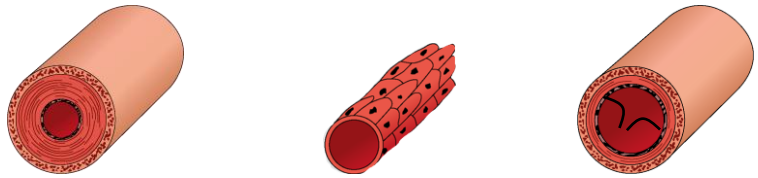


Circulatory system

- The circulatory system transports useful molecules and waste around the body. The human circulatory system consists of the _____, _____ and _____.
- The heart has four chambers: two _____ and two _____.
- Valves ensure blood flows in the right direction.
- The septum separates the right and left sides of the heart.



The heart pumps oxygenated blood from the ____ to the _____ and deoxygenated blood from the ____ to the ____ (_____ circulatory system).

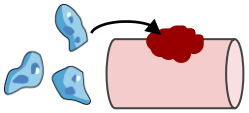


• Blood taken away from heart • High pressure blood • Thick muscular and elastic walls • Small lumen	• Exchange substances between blood and cells • Very low pressure blood • Very thin walls (one cell thick) • Very small lumen	• Blood brought back to heart • Low pressure blood • Thin walls • Large lumen • Valves prevent back flow

7.05 Organ systems

Circulatory system (continued)

Blood is a fluid that transports substances, useful molecules and waste around the body.
Blood helps the body to defend against diseases and to form scabs to heal cuts.



Platelets help with blood clotting for wound healing.

Plasma carries the other blood parts, nutrients, waste and carbon dioxide. It is yellow coloured and mostly water.

Red blood cells carry oxygen to all the cells of the body.

White blood cells help defend against disease.

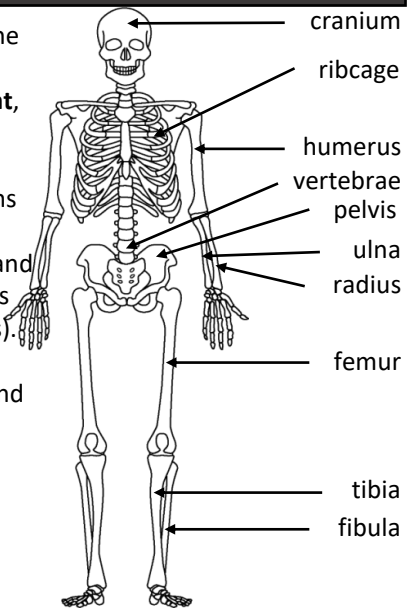
Adaptations of the red blood cells:

- biconcave shape →large surface area for faster oxygen diffusion
- contains haemoglobin → carry oxygen
- no nucleus → space for more haemoglobin → more oxygen

Red blood cells, white blood cells and platelets are made in the **bone marrow** - soft tissue inside large bones protected by the hard part of the bone around it.

Skeletal system

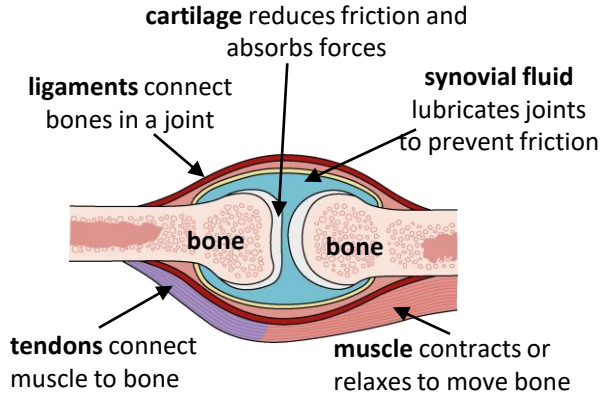
Four functions of the skeletal system are **support**, **movement**, **making new blood cells** and **protection** of organs (e.g. the cranium protects the brain and the ribcage protects the heart and lungs). **Bones** are living tissues that grow and change.



Joints, muscles and movement

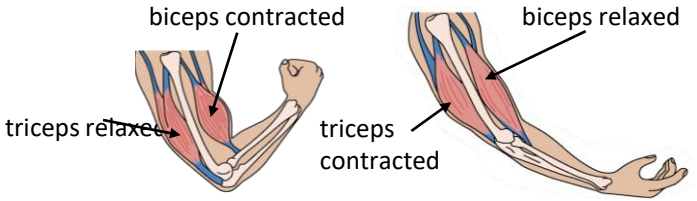
A joint is the point where two or more bones meet in the body.
Joints connect bones and allow the body to move and bend. Different joint types allow various movements:

- **hinge** joint: movement backwards and forwards e.g. the knees and elbows
- **ball-and-socket** joint: movement in many directions e.g. the hips and shoulders
- **pivot** joint: twisting movement around a fixed point e.g. the neck
- **fixed** joint: does not allow for any movement e.g. in the cranium



Ageing can lead to joint wear, inflammation and arthritis. Arthritis causes joint pain and affects synovial fluid and cartilage.

- Muscles can **only** pull, they **cannot push**;
- Muscles work in **antagonistic muscle** pairs**.** When one muscle contracts to pull the bone in one direction, the other muscle relaxes to allow movement.

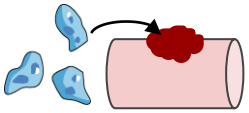


- The way in which muscles and bones work together to exert forces is called **biomechanics**.
- **Muscle strength** varies based on muscle size, age, sex, training, nutrition and injury.

7.05 Organ systems

Circulatory system (continued)

Blood is a fluid that transports substances, useful molecules and waste around the body.
Blood helps the body to defend against diseases and to form scabs to heal cuts.



_____ help with blood clotting for wound healing.

_____ carries the other blood parts, nutrients, waste and carbon dioxide. It is yellow coloured and mostly water.

_____ **c**arry oxygen to all the cells of the body.

_____ help defend against disease.

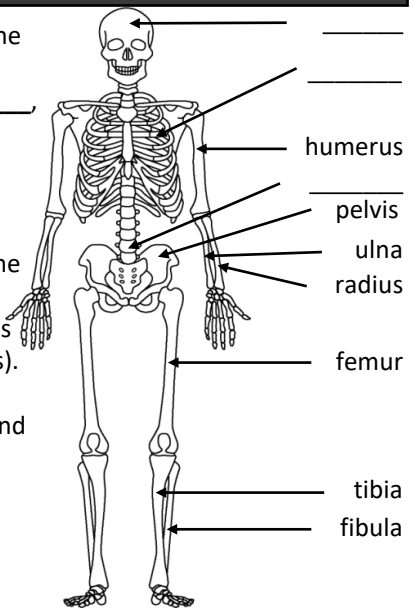
Adaptations of the red blood cells:

- biconcave shape → _____ for faster oxygen diffusion
- contains haemoglobin → carry _____
- no _____ → space for more haemoglobin → more oxygen

Red blood cells, white blood cells and platelets are made in the _____ _____ - soft tissue inside large bones protected by the hard part of the bone around it.

Skeletal system

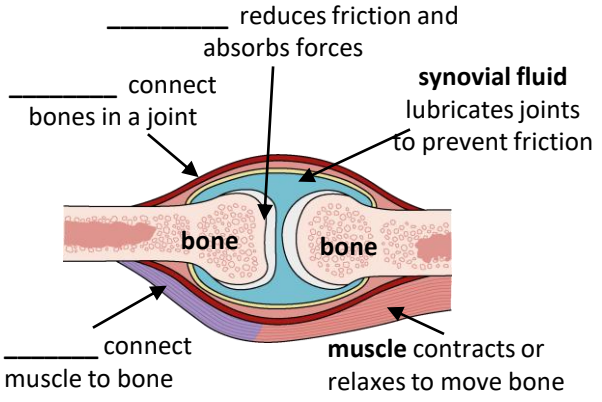
Four functions of the skeletal system are _____, _____, _____, **making** _____ _____ and _____ of organs (e.g. the cranium protects the brain and the ribcage protects the heart and lungs). **Bones** are living tissues that grow and change.



Joints, muscles and movement

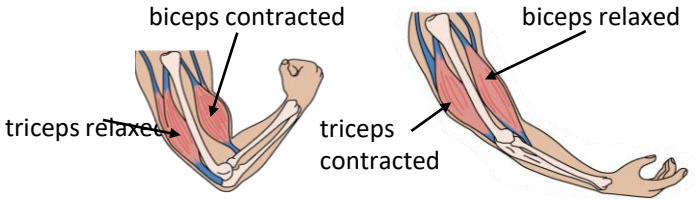
A ____ is the point where two or more bones meet in the body.
Joints connect bones and allow the body to move and bend. Different joint types allow various movements:

- _____ joint: movement backwards and forwards e.g. the knees and elbows
- _____ joint: movement in many directions e.g. the hips and shoulders
- _____ joint: twisting movement around a fixed point e.g. the neck
- _____ joint: does not allow for any movement e.g. in the cranium



Ageing can lead to joint wear, inflammation and arthritis. Arthritis causes joint pain and affects synovial fluid and cartilage.

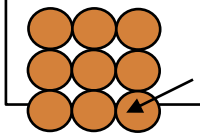
- Muscles can **only** _____, they **cannot push**;
- Muscles work in _____ **muscle** pairs**.** When one muscle _____ to pull the bone in one direction, the other muscle _____ to allow movement.



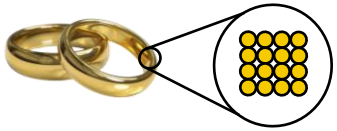
- The way in which muscles and bones work together to exert forces is called **biomechanics**.
- **Muscle strength** varies based on muscle size, age, sex, training, nutrition and injury.

7.04: Chemical changes

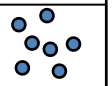
Atom
The smallest particle of matter, which all things are made of.



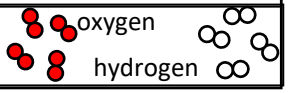
Element
A pure substance that is made of only one type of atom. All atoms of an element are identical, e.g. Gold is an element made up of gold atoms only. The 118 known elements are listed on the periodic table of elements.



The atoms of some elements do not join together, but instead they stay as separate atoms, e.g. helium.



The atoms of other elements join together to make **molecules**, e.g. oxygen and hydrogen.



Properties of elements

Individual atoms do not have the properties of the element. The properties of an element are because of the arrangement and behaviour of the atoms as a group.

Metals	Non-metals
most are shiny	most are dull
most are hard	solid non-metals are soft and easy to cut, **except carbon as diamond**
most are strong	most are not strong
most are sonorous (makes a ringing sound when hit)	most are not sonorous
malleable (easy to reshape without breaking)	not malleable
most are ductile (can be drawn out into a long wire without breaking)	not ductile
most have very high melting and boiling points	most have very low melting and boiling points
some but not all are magnetic	not magnetic
conduct electricity	non-metals do not conduct electricity, **except carbon as graphite**
good at conducting heat	poor at conducting heat

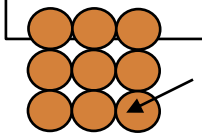
Writing element symbols

The first letter is always written as a capital letter and if there is a second letter, it is always written as a lowercase letter.
Element symbols make writing elements easier and allow scientists all over the world to communicate and write about them.

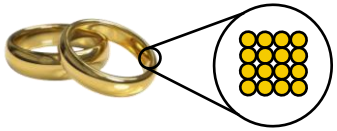
Na	O
sodium	oxygen

7.04: Chemical changes Blank

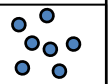
Atom



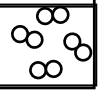
Element



The atoms of some elements do not join together, but instead they stay as separate atoms, e.g.



The atoms of other elements join together to make , e.g.



Properties of elements

Individual atoms do not have the properties of the element. The properties of an element are because of the arrangement and behaviour of the atoms as a group.

Metals	Non-metals

Writing element symbols

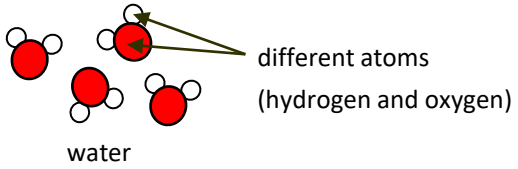
.

Na sodium

O oxygen

7.04: Chemical changes

Compound
A substance made of two or more different elements chemically joined (bonded) together.
A chemical bond is a strong force that holds atoms together in a compound. Lots of energy is needed to break a chemical bond. A compound cannot be easily separated.
A compound may have very different properties to those of the elements from which it is made.
Water is a compound of hydrogen and oxygen.
Each of its molecules contains two hydrogen atoms and one oxygen atom.



Chemical reactions

When chemicals react, the atoms are rearranged.
For example, iron reacts with sulfur to make iron sulfide. Iron sulfide, the compound formed in this reaction, has different properties to the elements it is made from.

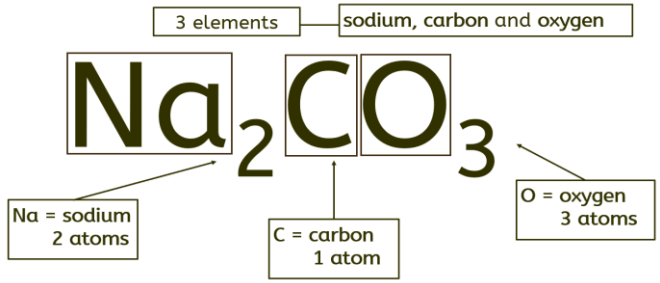
	iron	sulfur	iron sulfide
Type of substance	element	element	compound
Colour	silvery grey	yellow	black
Is it attracted to a magnet?	yes	no	no

Conservation of mass

Atoms are not destroyed nor created during chemical reactions, so in any reaction:
Total mass of reactants = total mass of products

Chemical formulae

A chemical formula uses chemical symbols and numbers to show how many of each atom is present in a compound.
The small numbers (subscript) go at the bottom.
For example:
CO_2 is correct;
CO2 and CO^2 are wrong.



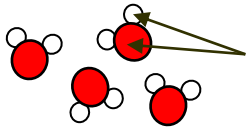
The formula for sodium carbonate is Na_2CO_3. It tells you that sodium carbonate contains two sodium atoms (Na x 2), one carbon atom (C) and three oxygen atoms (O x 3).

Naming metal and non-metal compounds
The metal element (furthest left on the periodic table) comes first in the name of the compound. The ending for the non-metal is shortened and changed to '–ide'. E.g. iron + sulfur → iron sulfide

Naming three element compounds containing oxygen
The metal element (furthest left on the periodic table) comes first in the name of the compound. If there are three elements in the compound, and one of them is oxygen, the ending of the non-metal is shortened and changed to '–ate'. E.g. lithium + nitrogen + oxygen → lithium nitrate

7.04: Chemical changes Blank

Compound



different atoms
(hydrogen and oxygen)

water

Chemical formulae

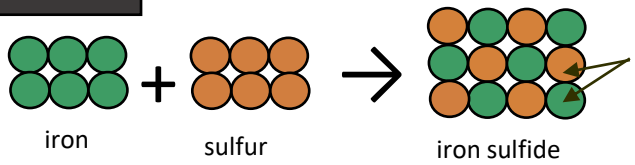
.

Na_2CO_3

The formula for sodium carbonate is:

Chemical reactions

When chemicals react, the atoms are rearranged. For example, iron reacts with sulfur to make iron sulfide. Iron sulfide, the compound formed in this reaction, has different properties to the elements it is made from.



iron + sulfur → iron sulfide

different atoms
(iron and sulfur)

	iron	sulfur	iron sulfide
Type of substance			
Colour			
Is it attracted to a magnet?			

Conservation of mass

Naming metal and non-metal compounds

Naming three element compounds containing oxygen

7.04: Chemical changes

Chemical equations

We summarise chemical reactions using equations:

reactants → products

- **Reactants** are shown on the **left** of the arrow;
- **Products** are shown on the **right** of the arrow.

Do not write an '=' sign instead of an arrow.

If there is more than one reactant or product, they are separated by a '+' sign. For example:

copper + oxygen → copper oxide

Reactants: copper and oxygen
Products: copper oxide

A **word equation** shows the names of each substance involved in a reaction and **must not include any chemical symbols or formulae.**

Oxidation reactions

In oxidation reactions, a substance gains oxygen. Metals and non-metals can take part in oxidation reactions (be oxidised).

Magnesium reacts with oxygen to form magnesium oxide:
magnesium + oxygen → magnesium oxide
$2Mg(s) + O_2(g) \rightarrow 2MgO(s)$

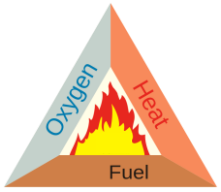
Carbon reacts with oxygen to form carbon dioxide:
carbon + oxygen → carbon dioxide
$C(s) + O_2(g) \rightarrow CO_2(g)$

Another example is a combustion reaction, where we burn fuels in oxygen:

Fuel + oxygen → carbon dioxide + water

methane + oxygen → water + carbon dioxide

- Combustion is another name for burning fuels.
- It is an exothermic reaction.
- The fire triangle shows three components which, when combined, provide the right conditions for combustion to happen.



Thermal decomposition reactions

This is the breaking down of a substance, using heat, to form two or more products. It is an endothermic reaction.
Many metal carbonates take part in thermal decomposition reactions. For example, copper carbonate:

copper carbonate is green; copper oxide is black.
copper carbonate → copper oxide + carbon dioxide
$CuCO3(s) \rightarrow CuO(s) + CO_2(g)$

Exothermic and Endothermic reactions

- **Exothermic** reaction - **transfers** energy to the thermal store of the surroundings. This causes a **rise** in temperature (**positive** temperature change).
- Hand warmers transfer energy to the thermal store of the surroundings by an exothermic oxidation reaction.
- **Endothermic** reaction – **transfers** energy in from the thermal store of the surroundings. This causes a **drop** in temperature (**negative** temperature change).
- Sports injury packs transfer energy from the thermal store of the surroundings by an endothermic reaction.

Temperature data collected from exothermic and endothermic reactions can be improved by:

- Using a **polystyrene cup** as an insulator, as it reduces energy transfers to or from the surroundings.
- Using a **lid** to reduce energy transferred from the surface.
- Using a **digital thermometer**, which is easier to read than a regular thermometer and, if it measures in decimal places, also has better resolution.

State symbols in chemical formulae provide information about the physical state of the reactants and products.
(s) – solid , (l) – liquid, (g) – gas, and (aq) – aqueous solution (i.e. dissolved in water).
The state symbol comes after the chemical formula and is written in lower case and in brackets. E.g. $CuCO_3(s) \rightarrow CuO(s) + CO_2(g)$

7.04: Chemical changes Blank

Chemical equations

We summarise chemical reactions using equations:

- **Reactants**
- **Products**

Do not write an '=' sign instead of an arrow.

If there is more than one reactant or product, they are separated by a '+' sign. For example:

Reactants:
Products:

Oxidation reactions

Magnesium reacts with oxygen to form magnesium oxide:
magnesium + oxygen →
$2Mg(s) + O_2(g) \rightarrow$

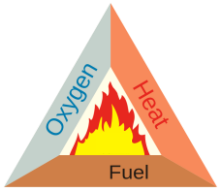
Carbon reacts with oxygen to form carbon dioxide:
carbon + oxygen →
$C(s) + O_2(g) \rightarrow$

Another example is a combustion reaction, where we burn fuels in oxygen:

Fuel + oxygen →

methane + oxygen →

- Combustion is



Thermal decomposition reactions

copper carbonate is green; copper oxide is black.
copper carbonate →
$CuCO_3(s) \rightarrow$

Exothermic and Endothermic reactions

- **Exothermic** reaction –

- **Endothermic** reaction –

- Temperature data collected from exothermic and endothermic reactions can be improved by:

State symbols

Physics : Topic 7.06 Sound and Light

What we are learning this term:

A. Compare Light and Sound waves
B. Wave behaviour
C. Sound waves
D. Hearing ranges
E. Uses of sound

3 Key Words for this term

1. Ultrasound
2. Frequency
3. Transverse

A. How do sound waves compare with Electromagnetic waves (e.g. Light)

Sound	EM waves, like light
Requires a medium (particles) to travel	Does not require a medium (particles)
Longitudinal waves	Transverse Waves
Travels faster in more dense media. In air 330m/s	Travels slower in more dense material. In vacuum 3 x 10^8 m/s

A. Types of Waves

Waves **transfer energy** without transferring matter.

A. What are the two types of waves?

Transverse	Longitudinal
• **Oscillations are perpendicular** to the direction of **energy transfer.**	• **Oscillations are parallel** to the direction of **energy transfer.**

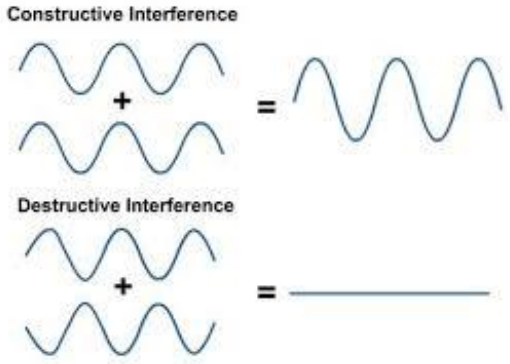
B. What different behaviours do waves show?

Waves can travel through all sorts of media, and different things can happen at the **boundary** between different media:

Transmission	**Passing through**, we say a wave is 'transmitted' through a medium
Reflection	When a wave **bounces back** from a boundary between media at the same angle as which it hit the boundary.
Refraction	When a wave **changes direction** at the boundary between media due to a change in speed.
Absorption	When the energy a wave transfers goes into heating a material.
Diffraction	The spreading out of a wave after it passes through a gap.

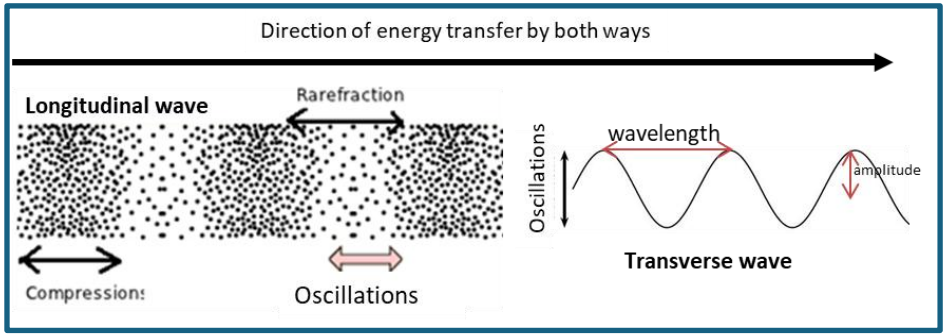
B. What is Superposition

Superposition occurs when two or more of the same kind of waves are travelling together. The waves can add up or cancel each other out depending on how they line up.



C. Changes in sounds

What is pitch?	The highness/lowness of a sound. Higher sounds have a higher frequency
What is frequency?	The number of oscillations in a wave per second. This is also the number of waves passing a point per second. It is measured in Hertz (Hz)
What is volume?	The intensity of a sound. Louder sounds have a larger amplitude. It is measured in decibels (dB)



Year 7 Term 2 Science / Physics : Topic 7.06 Sound and Light

What we are learning this term:

A. Compare Light and Sound waves
B. Wave behaviour
C. Sound waves
D. Hearing ranges
E. Uses of sound

3 Key Words for this term

1.
2.
3.

A. How do Sound waves compare to Electromagnetic waves (e.g. Light)?

Sound	EM waves, like light

A. Types of Waves

Waves transfer energy without transferring matter.

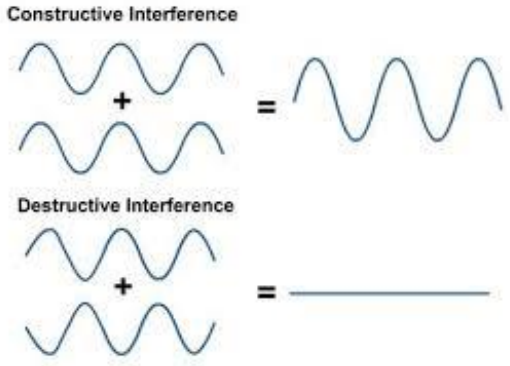
A. What are the two types of waves?

B. What different behaviours do Waves show?

Waves can travel through all sorts of media, and different things can happen at the **boundary** between different media:

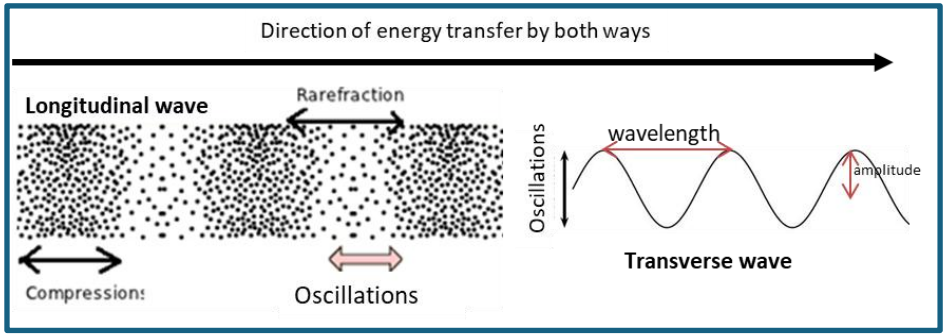
Transmission	
Reflection	
Refraction	
Absorption	
Diffraction	

B. What is Superposition?



C. Changes in sounds

What is pitch?	
What is frequency?	
What is volume?	



Year 7 Term 2 Science / Physics : Topic 7.06 Sound and Light

C. How is sound produced?

Sound is produced by **vibrations**

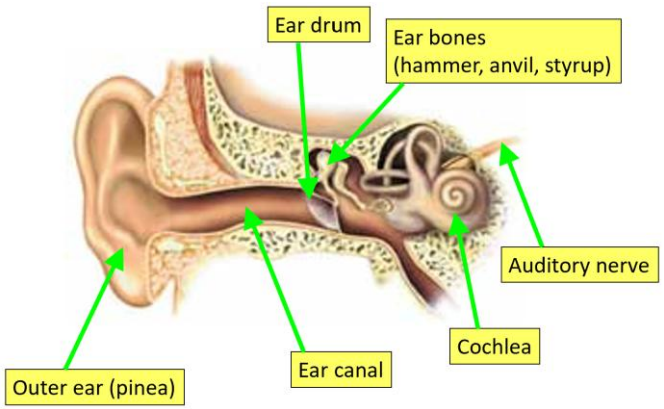
How does sound travel?

Vibrations transfer energy through particles.

Which media does sound travel fastest in and why?

Solids – the particles are closer together

C.	Part of the Ear	What is the Function?
1. Outer ear (pinea)		Collects the sound like a funnel.
2. Ear canal		Transmits sounds from the pinea to the ear drum
3. Ear drum		Sound waves causes this to vibrate
4. Ear bones (hammer, anvil, stirrup)		After the ear drum vibrates, it passes the vibrations on to these. They transfer the vibrations to the cochlea
5. Cochlea		Receives vibrations and converts these to nerve impulses
6. Auditory nerve		Carries nerve impulses (messages) to the brain



D. Hearing ranges

What is the hearing range of humans?	Humans have a hearing range between 20 – 20 000 Hz
What is ultrasound?	Sounds with a frequency **above 20 000 Hz**
What is ultrasound used for?	Uses of ultrasound: • Prenatal scans of unborn babies • Ultrasonic cleaning of fragile objects (eg jewellery) • Breaking up kidney stones to prevent harm.

E. What is an echo?

A reflected sound

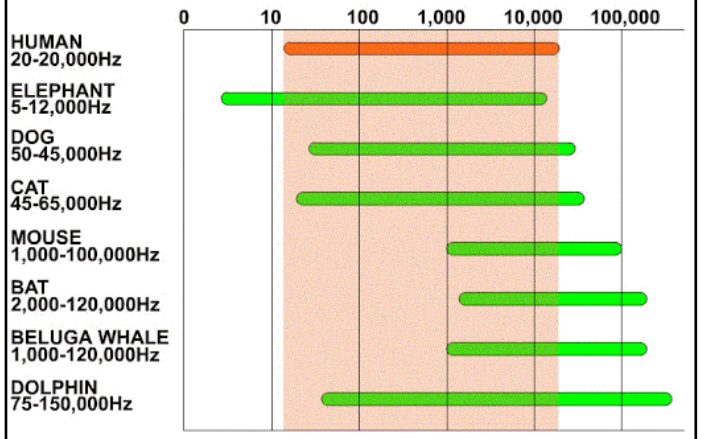
E. How do loudspeakers work?

- Loudspeakers are vibrating cones.
- The pattern and frequency of the vibrations (oscillations) determines the sound.

How do Microphones work?

Microphones have a vibrating <u>diaphragm</u> inside, which converts the sound wave into an electrical signal in a circuit.

D. What are the hearing ranges of animals?

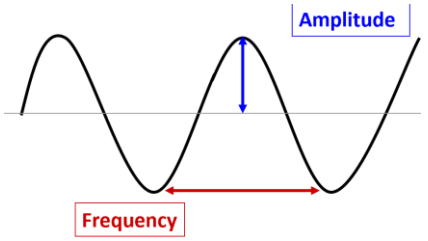


D. Seeing sounds – How can you see sounds?

You can use an instrument called an oscilloscope to see a sound wave

Amplitude (volume) is shown by the height. The higher the waves, the louder the sound.

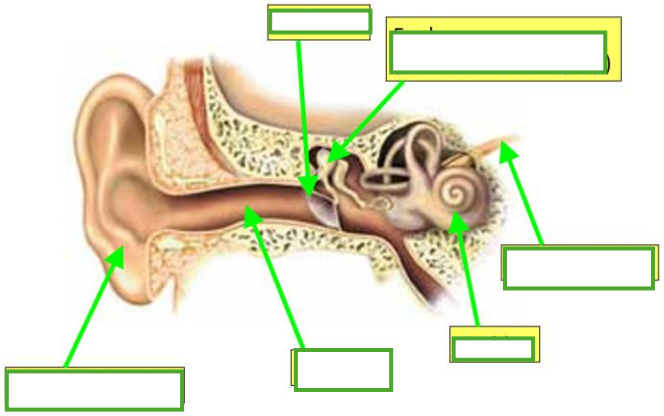
The frequency (pitch) is shown by how close the waves are to each other. The closer they are, the higher the pitch.



Physics : Topic 7.06 Sound and Light

C.	How is sound produced?
How does sound travel?	
Which media does sound travel fastest and why?	

C.	Part of the Ear	What is the Function?
1.	Outer ear (pinea)	
2.	Ear canal	
3.	Ear drum	
4.	Ear bones (hammer, anvil, stirrup)	
5.	Cochlea	
6.	Auditory nerve	

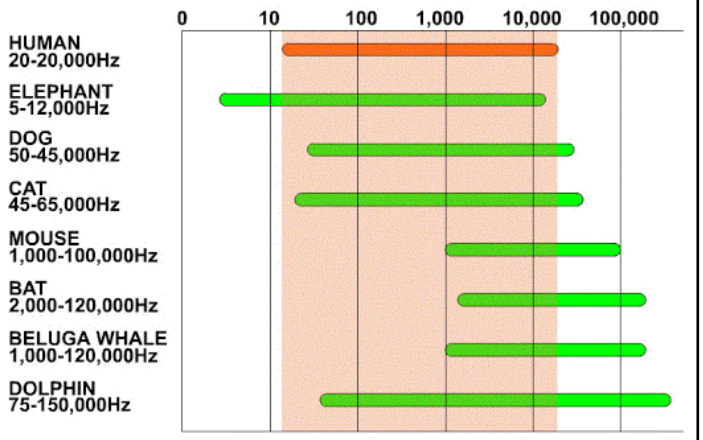


D.	Hearing ranges
What is the hearing range of humans?	
What is Ultrasound?	
What is ultrasound used for?	

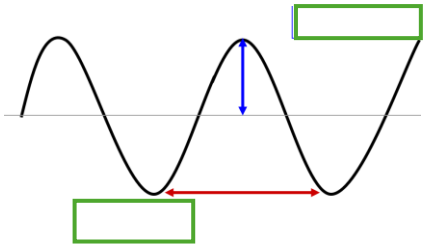
E.	What is an echo?

E.	How do loudspeakers work?
How do Microphones work?	

D.	What are the hearing ranges of animals



D.	Seeing sounds – How can you see sounds?
Amplitude (volume) is shown by:	
The frequency is shown by:	



Physics : Topic 7.06 Sound and Light

What we are learning this term:

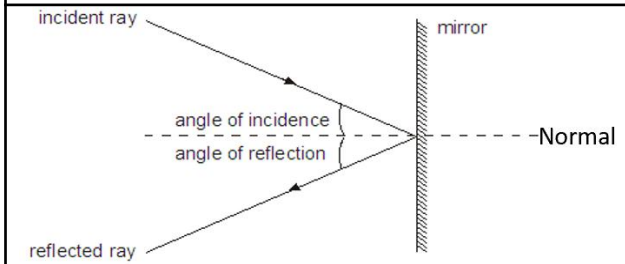
A. Light and materials
B. Ray model
C. Colour
D. Weight and mass
E. Astronomical structures and distances
F. Days, years and seasons

6 Key Words for this term

1. Vacuum
2. Refraction
3. Absorption
4. Transmission
5. Wavelength
6. Reflection

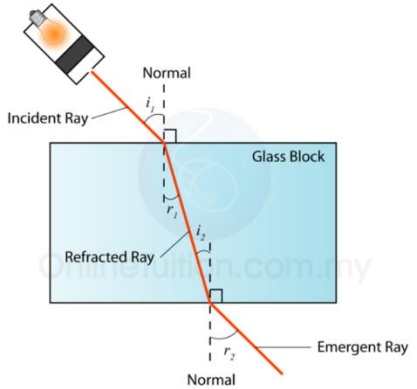
B. What is reflection?

When a ray of light (**incident ray**) reflects off a material and the reflected ray of light then goes into your eye, for you to see it.



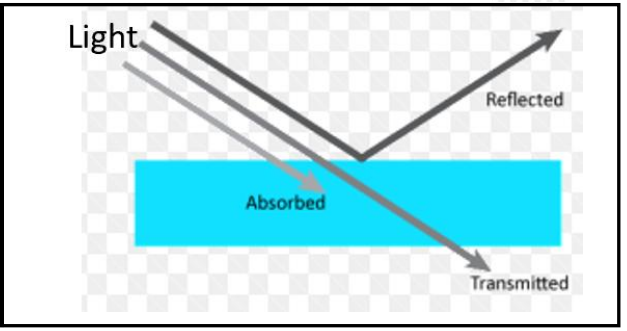
B. What is refraction?

When light **changes direction** as it enters or leaves a different medium (material).



A. What are the three different ways light interacts with material?

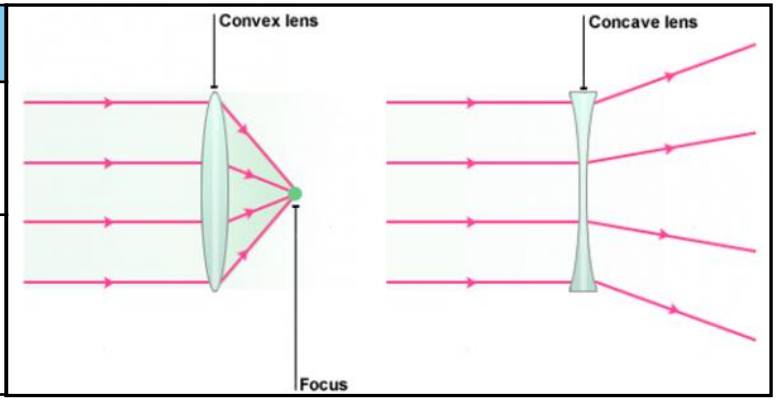
Light is **transmitted**	it passes straight through
Light is **absorbed**	it does not pass through
Light is **reflected**	light bounces off the surface of the material



B. What is are the two types of lenses?

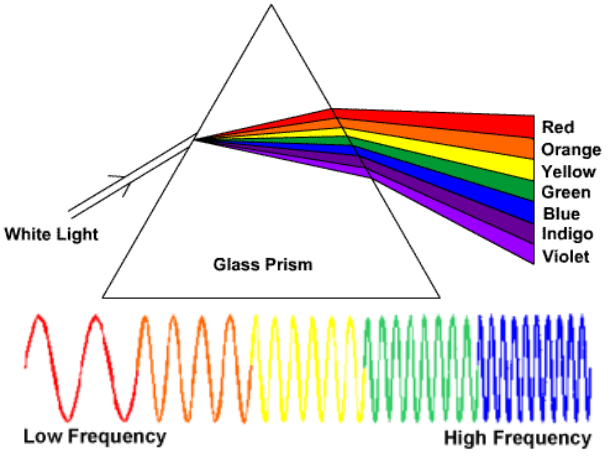
Convex lens – light rays are refracted then **converge** (meet up).

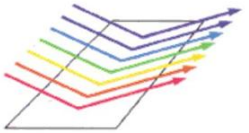
Concave lens – light rays are refracted then **diverge** (move apart).



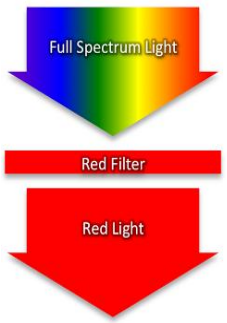
C. What is light dispersion?

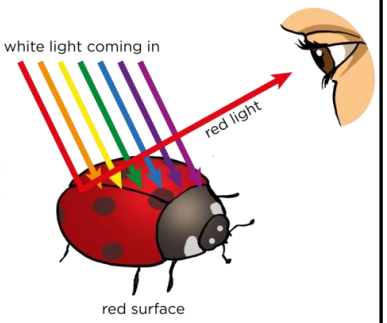
The **separation of white light** into colours according to frequency.





- **Black – all colors absorbed, nothing reflected**
- **White – all colors reflected, nothing absorbed**





Physics : Topic 7.06 Sound and Light

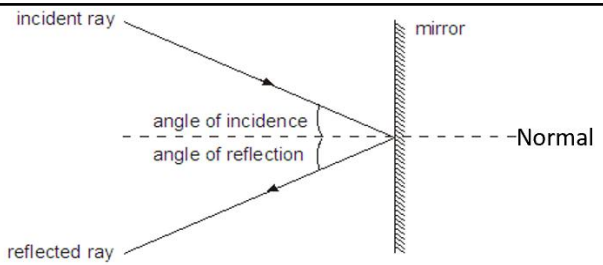
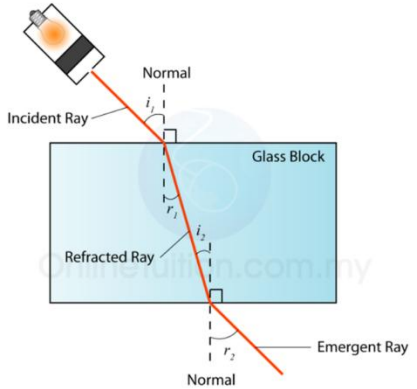
B. What is reflection?

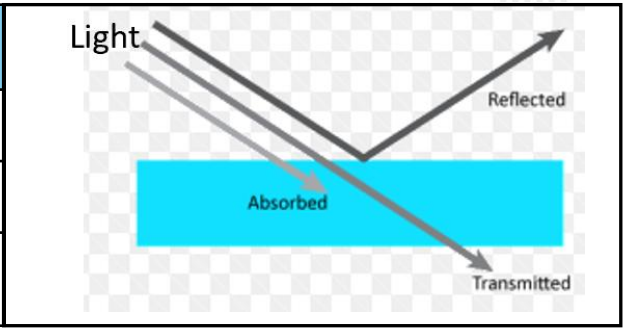


B. What is refraction?

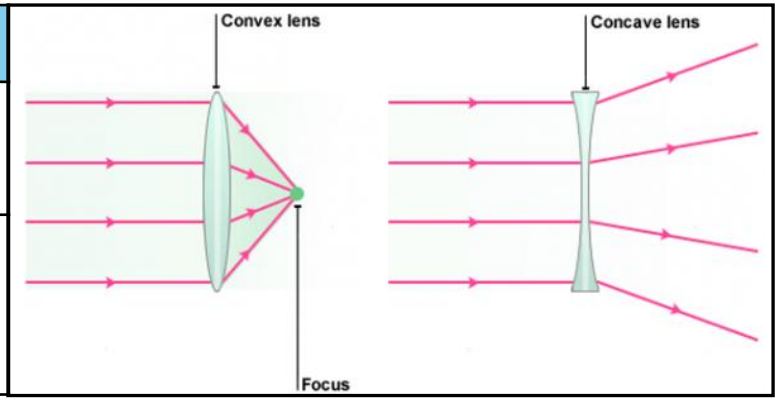


A. What are the three different ways light interacts with material?

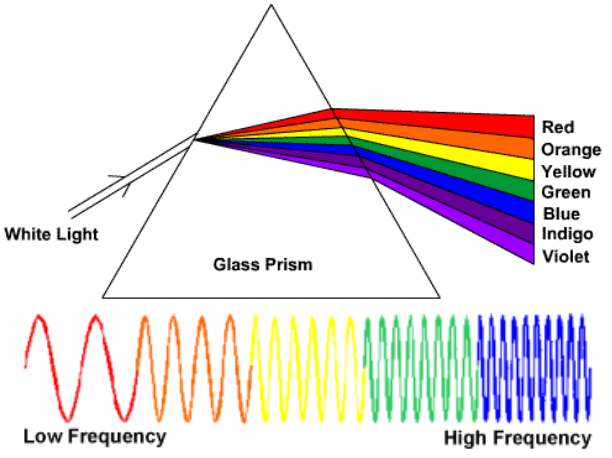
Light is _____	it passes straight through
Light is _____	it does not pass through
Light is _____	light bounces off the surface of the material

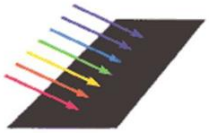


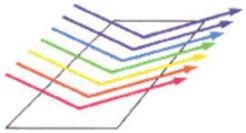
B. What is are the two types of lenses?



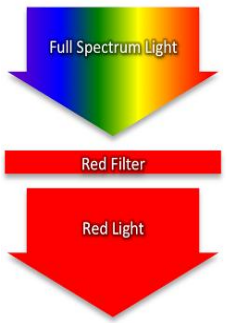
C. What is light dispersion?

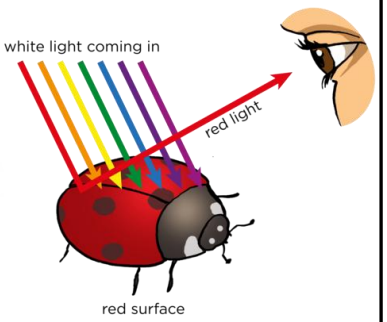






- Black – all colors absorbed, nothing reflected
- White – all colors reflected, nothing absorbed





7.04 Rivers

Background

Rivers affect the landscape and the lives of the people who live near them.

A	**Rivers are found within their own drainage basin and have their own distinct features.**
B	**As a river moves from its source in the upper course to its mouth in the lower course, its profile changes.**
C	**There are many different river processes that can impact the landscape.**
D–F	**The processes of erosion and deposition can lead to the formation of different river landforms.**
G	**Flooding is a key feature of rivers, and drainage basin processes play a significant role in this. By altering the drainage basin of a river, we can interfere with these processes.**
H	**There are many examples of floods. Today, many strategies have been put in place to manage the flood risk.**

A) Drainage basin features

1	**drainage basin**	**(n)** an area of land drained by a river and its tributaries
2	**source**	(n) the start of a river
3	**mouth**	(n) the place where the river enters a lake, sea or ocean
4	**tributary**	(n) a smaller river that joins a larger river
5	**confluence**	(n) the point at which two or more rivers meet
6	**watershed**	(n) the dividing line between two drainage basins

B) The river profile

1	**upper course**	the narrow, steep, upper part of a river, which contains waterfalls
2	**middle course**	the wider, deeper channel, which contains meanders and oxbow lakes
3	**lower course**	the widest, flattest part of the river near the mouth, which contains the floodplain.

C) River processes

river load	(n) the material carried along in the river
1 **erosion**	(n) the breaking down or wearing away of material.
vertical erosion	(n) erosion which takes place downwards into the land.
lateral erosion	(n) when erosion moves across the land from side to side, causing the bends of meanders to widen.
2 **transportation**	(n) when rivers carry rocks and sediment along their journey
3 **deposition**	(n) when a river drops its load

D) River features - waterfalls

1	**waterfalls**	**(n)** water falling from a height when a river or stream flows over a steep drop (upper course)
2	**plunge pool**	(n) an area at the base of a waterfall that undercuts the hard rock layer
3	**gorge**	(n) a steep sided valley left behind when a waterfall retreats upstream

E) River features - meanders

1	**meander**	(n) a bend in a river (middle course)
2	**slip-off slope**	(n) the sloping bend of a meander from the inside (shallow) to the outside (deep)
3	**river cliff**	(n) the undercut bank on the outside bend of a meander

F) River features - floodplains

1	**floodplain**	(n) a wide, flat area of land that is flooded frequently when a river bursts its banks (lower course)
2	**levee**	(n) banks found at the side of a river in the lower course
3	**silt**	(n) the fine, fertile eroded material transported by a river

G) The drainage basin system

1	**precipitation**	(n) water falling to the ground in all forms (rain, snow, sleet and hail)
2	**interception**	(n) when the leaves of trees stop precipitation reaching the ground
3	**surface runoff**	(n) the movement of water over the surface of the land back into a river
4	**surface storage**	(n) water stored on the surface in lakes or puddles
5	**infiltration**	(n) the movement of water from the surface into the soil
6	**throughflow**	(n) the movement of water through the soil back into the river

H) Case study: Somerset levels UK

Where/when	Southwest England, flood 2014 Rivers Parrett and Tone	
Causes	Effects	Responses
deforestation on the floodplain	600 homes flooded	20,000 sandbags provided to protect homes
saturated ground from heavy rainfall	£200 million lost from the collapse of the tourist industry	65 pumps installed to drain millions of cubic metres of floodwater
low-lying land with four rivers flowing through it	6,800 hectares of agricultural land flooded	Hundreds of people were evacuated from their homes.
build-up of sediment in the channel from lack of dredging	Native bird species couldn't hunt on the flooded ground.	The Environmental Agency is spending £6 million a year on dredging the rivers Parrett and Tone.

7.04 Rivers

Background

Rivers affect the landscape and the lives of the people who live near them.

A) Drainage basin features

1	drainage basin
2	source
3	mouth
4	tributary
5	confluence
6	watershed

B) The river profile

1	upper course
2	middle course
3	lower course

C) River processes

	river load
1	erosion
	vertical erosion
	lateral erosion
2	transportation
3	deposition

D) River features - waterfalls

1	waterfalls
2	plunge pool
3	gorge

E) River features - meanders

1	meander
2	slip-off slope
3	river cliff

F) River features - floodplains

1	floodplain
2	levee
3	silt

G) The drainage basin system

1	precipitation
2	interception
3	surface runoff
4	surface storage
5	infiltration
6	throughflow

Year 7 History : Roman Catholic Church in the Middle Ages

What we are learning this term:

What part did the Roman Catholic Church play in everyday life during the Middle Ages?

A. Keywords
B. Explain the importance of the Roman Catholic Church for daily life in the 16th century.
C. What are the roles of monks in society in the Middle Ages ?
D. What was the main reasons for people going on crusades ?
E. What were the impacts of the crusades on Europe?

A.	*Can you define these key words?*
Monasteries	Places where monks lived, worked and provided services for the population.
Secular	Not connected to the church.
Catholicism	Following a form of Christianity that whose head is the Pope in Rome. (this was the religion of Medieval western Europe)
Excommunication	A punishment for a crime, being banned from the church. This means your soul would be condemned to hell.
Cardinal	Important members of the Catholic church (more powerful than bishops) who have role in governing the Catholic church throughout the World.
Clergy	Priests and other people who perform religious duties for the church
Pope	The head of the Catholic church, he is based in Rome.
anti Semitism	Hostile actions or beliefs against Jews
Archbishop	The most important bishop in a country, in charge of religion within that country,
Pilgrimage	A journey to a holy site for the purpose of pleasing God.
Purgatory	A place in between heaven and hell where those whose fate is undecided go initially after death.
Illiterate	Unable to read or write.
Crusade	A religiously motivated, Christian military campaign. Normally to try and capture the Holy Land (Jerusalem)
Doom Painting	A painting showing people being sent to Heaven or Hell on the Day of Judgment
Persecution	unfair or cruel treatment over a long period of time because of race, religion or beliefs.

B.	**Explain the importance of the Roman Catholic Church for daily life in the 16th century.**
Provide services for the people	Churches provide poor relief, taught poor children to read, were libraries, copies books, ran hospitals ,provided hospitality to travellers .
Teach people right from wrong	The church taught people right firms wrong so they could get into heaven. Most people could not understand Latin which church services were held in so they learned from the doom paintings and talking to the priests .
Ensuring people do not commit sins	People were encouraged to not commit sins and be loyal to their king and barons in order to ensure to ensure they get into heaven .

C.	What are the roles of monks in society in the Middle Ages ?		
Copying books	**Hospitals**	**Look after travellers**	**Praying for people's souls**
. The only way to make books in the Middle Ages was for them to be copied out by hand. This took a very long time and so was very expensive to do. The job of copying was done by monks as most people could not read and write and the wealthy that could did not want to waste their lives copying things out. This gave the church allot of influence as monks would not copy out ideas that challenged the teachings of the church allowing them to censor hostile ideas.	Monks and nus would run hospitals to look after the ill. These would only visited by the poor in society as most people would try to get treated in their homes. The monks and nuns offered little physical medical treatment and concentrated on caring for the patients and prating to hope that God would take away the illness.	It was very dangerous to travel around England n the Middle Ages and people would need to find places to stay. Travellers who struggled to find or afford somewhere to stay would be looked after by monks in monasteries.	In the Middle Ages it was believed that you would go to heaven, hell or purgatory (a place in between heaven and hell where those whose fate was undecided would go in the meantime). Monks claimed that they could say special prayers to influence where people's souls went. The charged people large fees, called indulgences to say such prayers, but people would pay demonstrating the importance of religion and the afterlife in Medieval England

D.	What was the main reasons for people going on crusades ?
Forgiveness of sins	People wanted to ensure that they got into heaven. Pope Urban II promised that anyone who went on crusade would have their sins forgiven ensuring they got into heaven.
Money	The Holy Land was a very rich place so a crusading army could steal allot of this to take home with them.
Power	knights would want to build their reputation by being a crusader. Additionally, those who went on crusades would be rewarded with more land, titles and influences in their kingdoms.

E.	What were the impacts of the crusades on Europe?
Medicine	Many books of Galen that had been lost in the West were rediscovered in the Muslim World. Also, Muslim doctors had developed the work of Galen, helping other discoveries in the future. New plants were discovered that were used to make medicines. New better surgical tools that had been invented by Muslims were brought back to Europe.
Food	The Crusades brought about trade in many unusual exotic foods. Sugar, spices, dates, coffee, rice and apricots,
Household goods	Houses were previously plain now they had much new furniture influenced by contact with Islamic world such as: mirrors, cotton cloth, carpets, mattresses and shawls, writing paper and wheelbarrows. The rich got new brightly coloured clothes in the Muslim style.
ideas	Chess, alchemy (early chemistry to try and make gold), and the math system we use today were introduced from the Muslim world.
Power in Europe	Many barons died or lost money in the crusades meaning they lost power. Kings had raised taxes to pay for crusades so had allot more money meaning that they were more powerful.
Geography	European maps were previously very basic. They got access to much more advance Arabic maps that helped with navigation.
Science and technology	Learning was not valued in Europe however it greatly was in the Muslim world. They had invented various inventions that were introduced into Europe such as: magnifying glasses, magnetic compasses and astrolabes (that measured the stars to let you navigate accurately) .

Power	The control a person or group has in a country. For example, the Church had their very own hierarchy compromised of the pope, archbishop, bishops, priests, monks and nuns. This includes threads such as warfare and protest.
Identity	The qualities and characteristics that make a person who they are and what they value as important. For example, while Christianity (Catholicism) was the most common religion in medieval England, people following other faiths lived in England at this time too. This includes threads such as the role of women.
Connectivity	The act of joining or being linked to somewhere, someone or something else. For example, Jews migrated to England in 1070, invited by William I. This includes threads such as trade and medicine.

7.03: Judaism

Key Vocabulary

1	**Abraham**	The founder of Judaism and husband of Sara.
2	**Covenant**	An agreement between two sides (between humans and God).
3	**Sara**	Female leader, mother of nations and wife of Abraham.
4	**Isaac**	The son of Abraham and Sara.
5	**Moses**	Leader who freed the Israelites from slavery and was given the 10 commandments.
6	**Miriam**	Prophetess who helped her brother Moses lead the Israelites out of slavery.
7	**Exodus**	A book in the Bible which tells the story of the Israelites being freed from slavery.
8	**Ten Commandments**	Ten rules given to Moses by God about how humans should behave.
9	**Esther**	A Jewish queen who saved her people from a plot to destroy them.
10	**Monotheism**	The belief that there is only one God.
11	**Shema**	An important prayer, declaring the oneness of God.
12	**Messiah**	A future Jewish king who is expected to bring peace.
13	**Genesis**	A book in the Bible which describes the creation of the world.
14	**Mitzvot**	613 rules in the Torah which guide Jews in their behaviour.
15	**Tikkun Olam**	"Repairing the world", encouraging actions that improve society and bring justice.
16	**Synagogue**	A Jewish place of worship, study and community.
17	**Bar/Bat Mitzvah**	Coming of age ceremony (Bar Mitzvah for boys and Bat Mitzvah for girls).
18	**Pesach/Passover**	A Jewish holiday which commemorates the Exodus story.
19	**Shabbat**	A day of rest and worship observed from Friday evening to Saturday evening.
20	**Orthodox**	A branch of Judaism that follows traditional beliefs, laws and practices.
21	**Reform**	A branch of Judaism that adapts traditional beliefs, laws and practices to fit modern life.
22	**Prophecy**	A message given to humans from God, usually to a prophet.

Holy Books introduced

The Tanakh	Hebrew Bible, which includes three parts: the Torah, Nevi'im and Ketuvim.
The Torah	Holiest scripture for Judaism. The word means "law" in Hebrew. Written by Moses. Also important in Christianity and Islam.
Nevi'im	Contains books of the Prophets, which tell the history of Israel God's messages through the prophets.
Ketuvim	Contains various writings, including poetry, wisdom literature and historical accounts.
Talmud	Contains discussions and interpretations of the Torah, which guides Jewish law and practice.

Tools for Studying Religion

Theology is the study of God and ideas about God. Theologians look at how ideas about God influence beliefs in religions and the actions people will do.

Social Scientists use evidence to see how people are influenced by society. Social Scientists look at patterns in what people believe about God and how this may change due to time and place.

Year 7 Term 3 SPANISH Knowledge organiser: Topic = En Casa

What we are learning this term:

A. Saying where we live
B. Describing our house
C. Naming rooms in our house
D. Describing our bedroom
E. Talking about daily routine
F. Describing a town
G. Translation practice

6 Key Words for this term

1. vivir	4. el hogar
2. la ciudad	5. una casa
3. el pueblo	6. un piso

A. ¿Dónde vives? – Where do you live?

Vivo en	I live in…
una casa	a house
un chalet	a detached house
una granja	a farm
un piso	a flat
un apartamento	an apartment
un bloque antiguo	an old block of flats
un bloque moderno	a new block of flats
está	It is (location)
en las afueras	on the outskirts
en el campo	in the countryside
en el centro	in the centre
en una ciudad	in a city
en la costa	on the coast
en la montana	in the mountains
el este	east
el norte	north
el oeste	west
el sur	south

B. Key verbs across topics

tener	to have
ser	to be
ir	to go
hacer	to do / to make
jugar	to play
ver	to see
escuchar	to listen
comprar	to buy
vivir	to live
hablar	to speak
deber	to have to
querer	to want / to love
visitar	to visit
comer	to eat

C. ¿Cómo es tu casa? What's your house like?

Mi casa es…	My house is…
acogedor(a)	cosy
adosado/a	semi – detached
antiguo/a	old
bonito/a	pretty
cómodo/a	comfortable
grande	big
moderno/a	modern
nuevo/a	new
pequeno/a	small
reformado/a	renovated
muy	very
bastante	quite

D. ¿Cuántas plantas tiene? How many floors has it got?

abajo	below
arriba	above
el asensor	the lift
el ático	the attic
la planta baja	the below floor
la primera planta	the first floor
el primer piso	the first floor
el sótano	the basement
las habitaciones	the rooms
tiene cinco habitaciones	It has 5 bedrooms
hay	there is/ there are
el aseo	the toilet
el bano	the bathroom
la cocina	the kitchen
el comedor	the dining room
el despacho	the office
el dormitorio	the bedroom
la ducha	the shower
la escalera	the stairs
el garaje	the garage
el jardín	the garden
el salón	the living room

E. ¿Dónde? – Where?

a la derecha de	to the right of
a la izquierda de	to the left of
al lado de	next to
debajo de	underneath
delante de	in front of
detrás de	behind
encima de	on top of
enfrente de	opposite

Key Verbs

Ser To be	Tener To have	Hablar To speak	Comer To eat	Vivir To live
Soy I am	Tengo I have	Hablo I speak	Como I eat	Vivo I live
Eres You are	Tienes You have	Hablas You speak	Comes You eat	Vives You live
Es s/he is	Tiene He/she has	Habla s/he speaks	Come s/he eats	Vive s/he lives
Somos We are	Tenemos We have	Hablamos We speak	Comemos We eat	Vivimos We live
son They are	Tienen They have	Hablan They speak	Comen They eat	viven They live

E. ¿Qué hay en tu dormitorio? – What's in your bedroom?

la alfombra	the rug
el armario	the wardrobe
la cama	the bed
las cortinas	the curtains
el equipo de música	the music stereo
las estanterías	the shelves
la lámpara	the lamp
el lavabo	the sink
la librería	the bookcase
la mesa	the table
el ordenador	the computer
la pared	the wall
los pósters	posters
la puerta	the door
la silla	the chair
la televisión	the TV
la ventana	the window
Qué es?	What is it?
el portatíl	the laptop
el escritorio	the desk
los juegos	games
los libros	books
la ropa	clothes
los zapatos	shoes
los cuadros	pictures
las cosas personales	personal things
osito de peluche	teddy bear
la joyería	jewellery
el maquillaje	make up
el espejo	the mirror

F. More Key Opinions/ Verbs across topics

beber	to drink
salir	to go out
leer	to read
trabajar	to work
pensar	to think
escribir	to write
Me gusta	I like
Me encanta	I love
Odio	I hate
porque	because
divertido/a	fun
aburrido/a	boring
útil	useful
inútil	pointless
cómodo/a	comfortable
interesante	interesting
entretenido/a	entertaining
emocionate	exciting
guay	cool
genial	amazing
soso	dull
asqueroso/a	disgusting
malo	bad
bueno	good

Year 7 Term 3 SPANISH Knowledge organiser: Topic = En Casa

G. Translation Practice	
I live in a big house	V e u c g
My mum lives in a new block of flats	M m v e u b d p m
My house is in the suburbs	M c e e l a
My dad lives by the coast	M p v e l c
I live in a city	V e u c
I like my house because it's cosy	M g m c p e a
My house is modern and cosy	M c e m y a
I don't like my house because it's semi detached	N m g m c p e a
My bedroom is on the first floor	M d e e l p p
We have an attic upstairs	T u a a
My bed is to the left of the wardrobe	M c e a l i d a
My bed is next to the window	M c e a l d l v
I have a big living room	T u s g
We have a renovated kitchen	T u c r
My apartment is very big	M a e m g
My house is very old	M c e m a
I love my home because it's cosy	M g m h p e a
Where do you live?	¿D v?

H . Key Questions: Answer the following in your own words. Use these model answers	
¿Dónde está tu casa?	Mi casa está en Swindon, en el sur de Inglaterra.
¿Cómo es tu casa?	Mi casa es muy moderna y acogedora. Me gusta mi casa porque es moderna y divertida y me encanta mi familia. Mi casa tiene dos plantas. Arriba hay un cuarto de bano pequeño y mi dormitorio y el dormitorio de mis padres.
¿Qué hay en tu dormitorio?	En mi dormitorio tengo una cama y mi televisión. Me encanta mi dormitorio porque es cómodo.
¿Dónde está tu cama?	Mi cama está al lado de mi ventana. Tengo un ordenador. Mi ordenador está a la derecha del armario y mi armario está a la derecha de la puerta.

I. Key Questions: Translate these model answers using the KO	
¿Dónde está tu casa?	My house is in Portsmouth on the coast. Portsmouth is in the south of England.
¿Cómo es tu casa?	My house is semi detached and is very small. It is cosy and very pretty. I like my house because my family live with me. My house has 2 floors. Downstairs there is a living room and a really big kitchen. Upstairs there are 3 small bedrooms.
¿Qué hay en tu dormitorio?	In my bedroom I have all of my games and books. I have my bed which is next to my desk. I have red curtains and white walls. I have a computer in my bedroom too. My computer is to the left of the window. I have a big wardrobe.
¿Dónde está tu cama?	My bed is to the right of my window but my computer is on top of my desk which is next to my bed.

J. Key Grammar	
Use the verb **ESTAR** to talk about location	Mi casa está en Swindon = My house is in Swindon
Make sure adjectives agree e.g. blanco/blanca/blancos/blancas	Mi casa es blanc**a** = My house is white Mi perro es blanc**o** = My dog is white Mis zapatos son blanc**os** = My shoes are white Las mesas son blanc**as** = The tables are white
Justify opinions with because	Me gusta mi casa porque es blanca = I like my house because it's white

Year 7 Term 3 SPANISH Knowledge organiser QUIZZABLE: Topic = En Casa

_____	the bookcase
_____	the table
_____	the computer
la pared	_____
los pósters	_____
la puerta	_____
_____	the chair
_____	the TV
_____	the window
_____	What is it?
el portatíl	_____
el escritorio	_____
los juegos	_____
los libros	_____
_____	clothes
_____	shoes
_____	pictures
las cosas personales	_____
osito de peluche	_____
la joyería	_____
el maquillaje	_____
el espejo	_____

F. More Key Opinions/ Verbs across topics

_____	to drink
_____	to go out
leer	_____
trabajar	_____
pensar	_____
_____	to write
_____	I like
_____	I love
Odio	_____
porque	_____
_____	fun
aburrido/a	_____
útil	_____
_____	pointless
_____	comfortable
interesante	_____
_____	entertaining
emocionate	_____
_____	cool
genial	_____
_____	dull
asqueroso/a	_____
_____	bad
bueno	_____

Year 7 Term 2&3 Topic = Bugs and Beetles

What we are learning this term:

A. About the work of artist Christopher Marley
B. How to use shape to structure a drawing
C. Basic colour theory – colour wheel
D. Advanced colour theory - colour schemes
E. Polyprinting techniques
F. Watercolour techniques

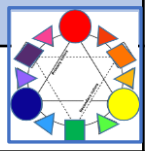
A. *About the work of artist Christopher Marley*

WHAT?	Mosaic like artworks, carefully arranged, bright shiny colours, often showing radial symmetry
HOW?	He uses hundreds of dead bugs and beetles found in rainforests, and arranges them by hand
WHY?	To support local farmers and pay them a fair wage, to support the ecosystem of the rainforest, to use the beauty of nature in art. He became obsessed with beetles after getting over his phobia (fear) of them

Keywords for this project (term 2&3)

Colour 	the appearance something as a result of the way in which it reflects light.
Shape 	a flat area, enclosed by other elements
Organic 	irregular or asymmetrical in appearance and tend to have a curvy flow to them.
Geometric 	shapes made of points and lines
Pattern 	Repetition of something over and over
Technique 	a way of carrying out a particular task, i.e. a piece of artwork
Materials 	the substance from which something is or can be made.
composition 	How the elements have been arranged in an artwork

C. *Basic colour theory – the colour wheel*



1 the primary colours are red, yellow and blue. You can't mix these from other colours
2 the secondary colours are orange, purple and green. These are mixed from primary colours
3 the tertiary colours are made from primary + secondary i.e. red-orange

D *Advanced colour theory – colour schemes*

Complementary	Opposite on the Colour wheel	Analogous	Next to each other on colour wheel	
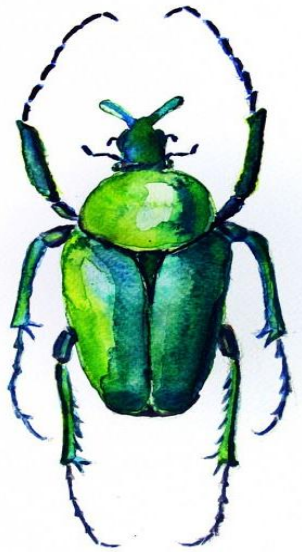
Polychromatic	Use of many colours	
Monochromatic	Use of one colour, different shades	
Warm	Reds, yellows, oranges -like fire	
Cool	Blue, green, purples – like earth, water	
achromatic	No colour – black And white	

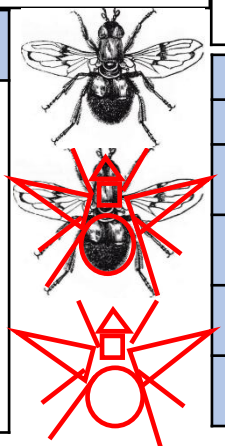
F *Watercolour techniques*

WASH	
GRADUATED WASH	
LAYERS	
WET ON WET	
DRY BRUSH	



B Shapes and lines can be used to help lay out a drawing:

1. Draw basic geometric shapes onto your image to map out the ***construction lines.***
2. ***Construct:*** lay out basic shapes. Make sure they are in ***proportion*** with each other (the sizes are correct compared to each other)
3. ***Refine:*** make minor changes to alter shapes so they are more realistic
4. Add the ***Detail:*** all the small elements of the drawing that make it what it is



E *Polyprinting techniques*

Step 1	Trace or draw your image
Step 2	Transfer your image onto your polytile
Step 3	Roll ink in your tray and onto your polytile
Step 4	Print and repeat to create a pattern
Step t	Add more detail to your design and do a 2nd layer

Tool/ material	What it is/ how it is used
Polytile	This is the printing plate used to create the prints. Roll ink on and press onto a surface or paper
Tracing paper	Used to transfer image onto polytile. Trace over the image then flip it, place on the polytile and go over the lines
Ink tray	Used to contain the ink. Apply the ink by rolling in the tray using a roller
Ink	Material used to create the prints. Apply a thin, even layer to surface of polytile and repeat.
Brayer (roller)	Used to roll out ink onto the polytile and then to transfer onto the paper.

Year 7 Term 2&3 Topic = Bugs and Beetles

What we are learning this term:

A. About the work of artist Christopher Marley
B. How to use shape to structure a drawing
C. Basic colour theory – colour wheel
D. Advanced colour theory - colour schemes
E. Polyprinting techniques
F. Watercolour techniques

A. *About the work of artist Christopher Marley*

Year 7 PRODUCT DESIGN Rotation Knowledge Organiser

What we are learning this term:

A. Workshop Tools **B. Materials** **C. Modelling** **D. Key Words** **E. Evaluating Work**

A. Workshop Tools

Steel Rule	Wooden Vice	Clamp	Bench Hook	Tenon Saw	Pillar Drill	Bandfacer
						

B. Materials

Timbers come from **trees**

Scots pine – which you used for your maze frame – is a **softwood**

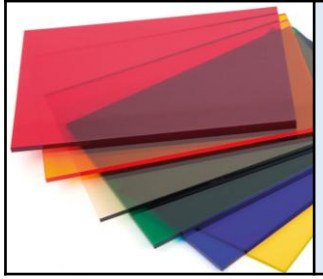
Softwoods come in planks and boards

Manufactured Boards come from **wood pulp**

Plywood – which you used as your base, insert and maze walls – is a **manufactured board**

Manufactured Boards come in sheets

Polymers come from **crude oil**



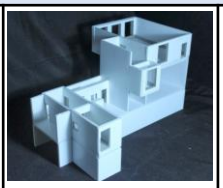
Acrylic – which you used as your lid for your maze – is a **polymer**

Polymers come in sheets, graduals and filament

C. Modelling

Creating a 3D representation of your product before you manufacture it.

You can use a variety of different materials and computer programs to create a mock up model or prototype such as;

Cardboard	Foamboard	Scrap Wood
		3D Printing	2D Design	Solidworks

Modelling is used to test a product before manufacture, to see what works and what doesn't.

Advantages	Disadvantages
Allows a designer to physically handle or view from all sides	Can be time-consuming and complicated
Changes can be made quickly and easily	Testing can be unreliable as they don't use the same materials as the end product

D. Key Words

Specification	A specific list of things that your product should be or do.
Modelling	A way of making a 3D representations of your proposed design. To see what went well and how it can be improved.
Sustainable	Limited negative impact on the environment.
Manufacture	Making a product using tools and machinery.

E. Evaluation of Products

Evaluate — To judge and give an opinion.

Designers will evaluate their products to see what works well and what doesn't. This way they can make any improvements on their current designs to ensure a high-quality product.

When writing an evaluation it is important to include the following three things:

1. Positives – what works well
2. Negatives – what doesn't work well
3. Possible improvements – how could you make it better?

For example:

My maze looks really fun and challenging to play. However, when tested the model version of my game, it was too difficult to complete. One improvement I could make is by taking away some of the traps or moving some of the walls around, so that it is more fun to play.

Year 7 PRODUCT DESIGN Rotation Knowledge Organiser

What we are learning this term:

A. Workshop Tools **B. Materials** **C. Modelling** **D. Data Analysis & Evaluation**

A. Workshop Tools

B. Materials

Timbers come from _____

Scots pine – which you used for your maze frame – is a **softwood**

Softwoods come in _____ and _____

Manufactured Boards come from _____

Plywood – which you used as your base, insert and maze walls – is a **manufactured board**

Manufactured Boards come in _____

Polymers come from _____

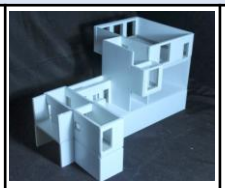
Acrylic – which you used as your lid for your maze – is a **polymer**

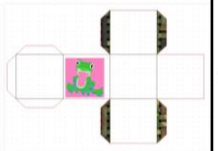
Polymers come in _____, _____ and _____

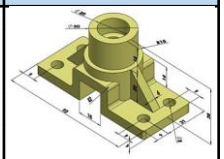
C. Modelling

Creating a _____ _____before you manufacture it.

You can use a variety of different materials and computer programs to create a mock up model or _____ such as;







Modelling is used to _____ before manufacture, to see what works and what doesn't.

Advantages	Disadvantages

D. Key Words

Specification

Modelling

Sustainable

Manufacture

E. Evaluation of Products

Evaluate _____

Think back to your completed handheld maze hand game. Evaluate one positive aspect of it, one negative aspect of it and an improvement you would like to have made if you had time.

Possible sentence starters:

- One thing that was successful…….
- One thing that I had issues with was……
- If I had more time, I could improve this by……

Y7 Food technology

What we are learning this term:

1. Health, safety and hygiene in the kitchen
2. The Eatwell guide and nutrients
3. Storing food safely
4. Food origins
5. Food fortification and modification
6. Practical skills

A. What are the nutrients required in the diet?

Carbohydrates	To give the body energy e.g bread.
Protein	To grow and repair the body, and to give energy e.g eggs.
Fats	To insulate your body, give you energy, and protect your organs i.e butter.
Vitamins	For general body health and function i.e carrots for eyesight.
Minerals	For general body health and function i.e iron to make blood cells.

c. *Storing food safely*

Perishable foods should be stored out of the **temperature danger zone** to reduce the risk of **food poisoning.**
Hot foods should be kept above 63ºC and cold foods should be kept below 5ºC.

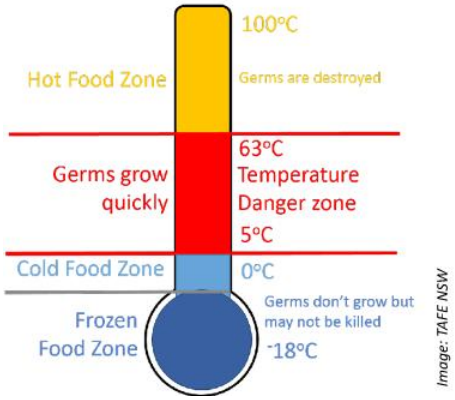


Image: TAFE NSW

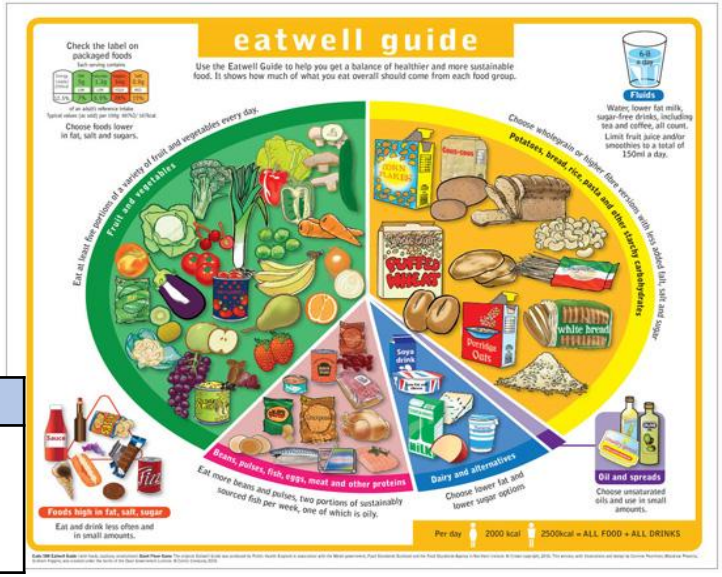
B. *What are the 5 different sections of the Eatwell plate?*

1 **Fruit and Vegetables** – provides minerals, vitamins & fibre
2 **Carbohydrates** – provides carbs and fibre
3 **Protein** - provides protein, omega 3, come vitamins
4 **Dairy** - provides vitamins, minerals (calcium)
5 **Fats and Oils**



E. Keywords

Hygiene	A method of keeping yourself and equipment clean
Cross contamination	The transfer of contaminants onto food through either the hands, the equipment or the surfaces. Causes food poisoning.
Spoilage	When food becomes unsafe to eat i.e rot, mould.
Perishable food	Food that spoils if not kept in the fridge or freezer e.g ham.
Fibre	Foods that keep your digestive system healthy and avoid constipation.
Allergen	A substance (sometimes food) that causes an immune system response that can be fatal i.e throat swelling up. Nuts are common allergens.
Intolerance	When the body cannot digest a food and rejects it i.e vomiting, diarrhea. Many people are lactose intolerant (milk intolerance).
Coeliac	When someone cannot eat gluten (wheat), similar to an intolerance but more dangerous.
Vegan	When someone does not eat anything that comes from an animal including eggs, milk, honey.

c. *Food origins*

Grown food- plants i.e wheat	**Reared food** – animals kept on a farm, bred and raised for use i.e cows to give milk	**Caught food –** animals hunted in the wild i.e fish, game animals
Intensive farming – bad for the environment, uses chemical fertilisers and pesticides. Gives a high yeild (amount of food). **Organic farming** – "natural" farming, is slower and more expensive to do.	**Intensive (battery) farming** – animals are kept indoors all year round in small cages, poor treatment. Lots of food produced. **Free range** – animals have a large amount of space and outdoor space, good living conditions. Expensive and slow.	**Trawling –** large nets dragged through the sea, lots of bycatch (unwanted fish) and damages habitats. **Line caught –** catching one fish at a time on a fishing line. Much slower and more expensive.

c. *Food fortification and modification*

Fortify – to make stronger/better
Food fortification – adding extra nutrients to food to improve how nutritious it is
Examples: butter with added vitamins, cereal with added iron and vitamins

Modification – to change the properties of something
Additives – chemicals added to food, can ne natural or artificial
Examples – flavourings, colourants, preservatives, stabilisers
Genetically modified (GM) - the genes (DNA) of the crop or animal have been changed to improve their yeild i.e more seeds.

Y7 Food technology

What we are learning this term:

1. Health, safety and hygiene in the kitchen
2. The Eatwell guide and nutrients

YEAR 7 GRAPHIC COMMUNICATION

What are we learning this term?

A Personification	B Typography	C Computer skills	D Key words	E Evaluation

A | Personfication

What is personification?

Personification makes sentences more exciting by:
•describing objects as if they are *people*
•describing objects as if they have *feelings*

How does Paul Thurlby use personification?
Paul Thurlby personifies his letters by giving the turning the letters that he works with into characteristics so that you can clearly see an emotion.

B | Draw the letter A in the following font styles. Write the description of the font style too.

Serif: Serif is a traditional style font. It usually has flicks on the end of each letter.	A
Sans Serif: Sans serif fonts are modern in style; Sans serif fonts good for large pieces of text.	A
Script: Script font often resembles everyday handwriting.	A
Decorative: decorative fonts are unique in style and have an artistic flair. They are often hard to read.	A

C | Computer skills

What is the shortcut for copy?
Ctrl + C
What is the shortcut for paste?
Ctrl + V
What does this symbol stand for?

Photoshop

What does this symbol mean?

Cropping

D| Key words

Graphics	Visual images or designs on a surface which communicate a message such as a brand advertisement or logo.
Typography	The arrangement of type to make written language legible.
Font	The term 'font' refers to a specific style of typeface such as its size and weight, it can come in regular, **bold** or *italic.*
Photoshop	A software for editing photos and graphics. It is used for image editing, making illustrations or web design.

E | Evaluation

Evaluation: To judge or give an opinion

Designers will evaluate their products to see what works well and what doesn't. This way they can make any improvements on their current designs to ensure a high-quality product.

When writing an evaluation it is important to include the following three things:

1. Positives – what works well
2. Negatives – what doesn't work well
3. Possible improvements – how could you make it better?

For example:
My word sticker looks great, the colours are bright which appeals to the audience. However, some of the letters are hard to read. One improvement I could make is to simplify the personification on some of the letters to make the final word clearer and easier to read.

YEAR 7 GRAPHIC COMMUNICATION

What are we learning this term?

A Personification	B Typography	C Computer skills	D Key words	E Evaluation

A | Personfication

What is personification?

How does Paul Thurlby use personification?

B | Draw the letter A in the following font styles. Write the description of the font style too.

Serif:	
Sans Serif:	
Script:	
Decorative:	

C | Computer skills

What is the shortcut for copy?

What is the shortcut for paste?

What does this symbol stand for?

What does this symbol mean?

D| Key words

Graphics

Font	
Photoshop	

E | Evaluation

Evaluation: To judge or give an opinion

When writing an evaluation it is important to include the following three things:

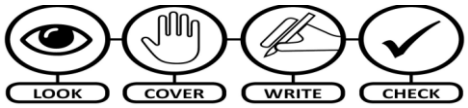
1. Positives – what works well
2. Negatives – what doesn't work well
3. Possible improvements – how could you make it better?

Year 7: Lets Play Keyboard!

Term 3

A — What we are learning about this term…

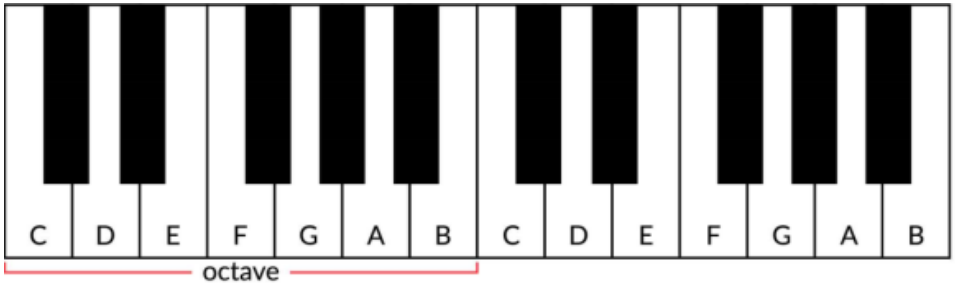
1. Treble Clef Notation
2. Hand Positions on the Keyboard
3. Sharps, Flats and Natural Notes
4. Chords on the Keyboard



B — Keywords

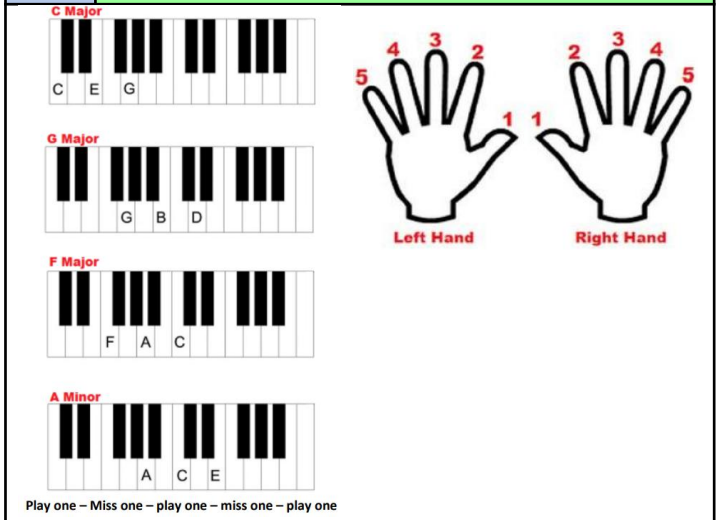
Stave	Name given to 5 lines and 4 spaces where musical notes are written.
Treble Clef	Symbol used to show high pitched notes.
Sharp	When a note is raised by a semitone e.g. C to C sharp.
Flat	When a note is lowered by a semitone e.d. B to B flat.
Chord	3 notes played at the same time.
Middle C	Note in the middle of a keyboard – Played with your thumb of your right hand.

C — Layout of a Keyboard/Piano



A piano or keyboard is laid out with **WHITE KEYS** and **BLACK KEYS** (as above). **C** is to the left of the two **BLACK KEYS** and the notes continue to **G** when they go back to **A** again. Notes with the same letter name/pitch are said to be an **OCTAVE** apart. **MIDDLE C** is normally in the centre of a piano keyboard.

D — Keyboard chords - Left hand – Right hand

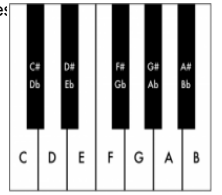


E — Black Keys and Sharps and Flats

There are five different black notes or keys on a piano or keyboard. They occur in groups of two and three right up the keyboard in different pitches. Each one can be a **SHARP** or a **FLAT**. The **#** symbol means a **SHARP** which raises the pitch by a semitone (e.g. C# is higher in pitch(to the right) than C). The *b* symbol means a **FLAT** which lowers the pitch by a semitone (e.g. B*b* is lower in pitch(to the left) than B).

Each black key has two names – C# is the same as D*b* – there's just two different ways of looing at it!

Remember, black notes or keys that are to the **RIGHT** of a white note are called **SHARPS** and black notes to the **LEFT** of a white note are called **FLATS**.



F — Treble Clef & Treble Clef Notation

A **STAVE** or **STAFF** is the name given to the five lines where musical notes are written. The position of notates on the stave or staff shows their **PITCH** (how high or low a note is). The **TREBLE CLEF** is a symbol used to show high-pitched notes on the stave and is usually used for the right hand on a piano or keyboard to play the **MELODY** and used by high pitched instruments such as the flute and violin. The stave or staff is made up of 5 **LINES** and 4 **SPACES**.

Every Green Bus Drives Fast. Notes in the **SPACES** spell **"FACE"**

Notes from **MIDDLE C** going up in pitch (all of the white notes) are called a **SCALE**.

G — Describing music – MAD T SHIRT

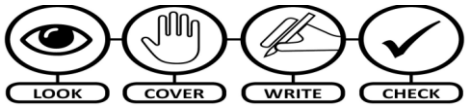
M	A	D	T	S	H	I	R	T
Melody	**Articulation**	**Dynamics**	**Texture**	**Structure**	**Harmony/Tonality**	**Instruments**	**Rhythm**	**Tempo**
The tune	How notes are played	Loud/quiet and any other volume changes	Layers of sound / how they fit together	The sections and organising	Chords used / the mood	Types of instruments heard	Pattern of notes	The speed

Year 7: Lets Play Keyboard!

Term 3

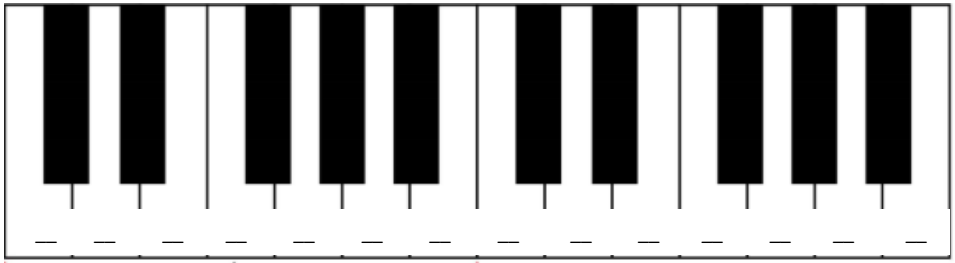
A — What we are learning about this term…

1
2
3
4

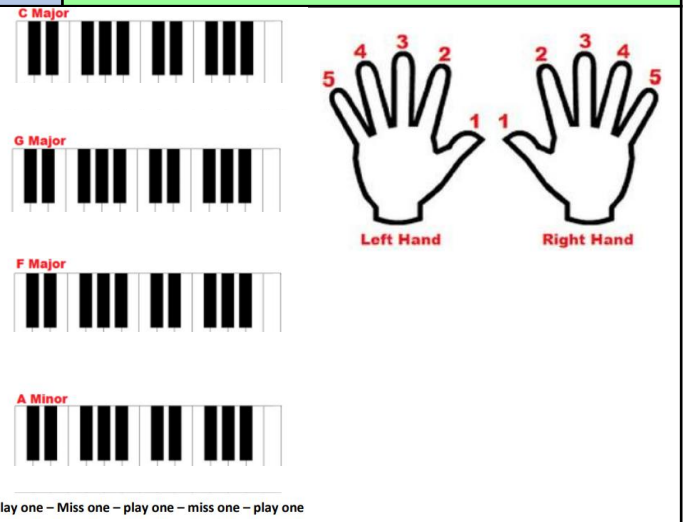


B — Keywords

C — Layout of a Keyboard/Piano

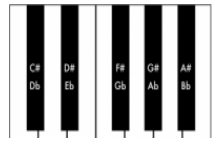


D — Keyboard chords - Left hand – Right hand



E — Black Keys and Sharps and Flats

There are five different black notes or keys on a piano or keyboard. They occur in groups of two and three right up the keyboard in different pitches. Each one can be a _____ or a **F**_____. The __ symbol means a **SHARP** which raises the pitch by a semitone (e.g. C# is higher in pitch(to the right) than C). The ___ symbol means a **F**_____ which lowers the pitch by a semitone (e.g. B*b* is lower in pitch(to the left) than B).
Each black key has two names
– C# is the same as D*b*
– there's just two different ways of looing at it!
Remember, black notes or keys that are to the **RIGHT** of a white note are called **SHARPS** and black notes to the **LEFT** of a white note are called **FLATS**.



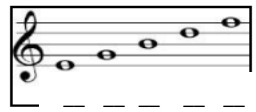
F — Treble Clef & Treble Clef Notation

What is the name of the 5 lines and 4 spaces? S_____

Musical notation shows us how high or low the P_____ of notes are.

High pitch notes are shown by using the symbol T_____ C_____

Every Green Bus Drives Fast. Notes in the **SPACES** spell '_ _ _ _'



Notes from **MIDDLE C** going up in pitch (all of the white notes) are called a **SCALE**.

G — Describing music – MAD T SHIRT

M	A	D	T	S	H	I	R	T
M_____	A_____	D_____	T_____	S_____	H_____/T_____	I_____	R_____	T_____

Year 7 Knowledge organiser Topic: Who Dun'it!

What we are learning this term:

A. Explore the use of new drama techniques
B. Take part in a variety of workshops using the techniques discussed in lessons.
C. Create a Crimewatch using/creating key characters from the dead man's life and highlighting what they think happened the night of our victims demise.

A- Key Words for this term

1. Characterisation – presentation of a fictional character using gesture, posture and stance.
2. Gestures- a movement of part of the body, especially a hand or the head, to express an idea or meaning.
3. Mime- the theatrical technique of suggesting action, character, or emotion without words, using only gesture, expression, and movement:
4. Sound effects- sounds that are created or used in a theatrical production to enhance the action, mood, or atmosphere of a scene.
5. Narration- adding a spoken commentary for the audience about the action onstage.
6. Stimulus- The starting point in a piece of devised drama. This could be in the form of a song, poem, picture or book.
7. Hot seating- The method can be used for developing a role in the drama. A character is questioned by the group about his or her background, behaviour and motivation.
8. Flashback- a scene in a film, novel, etc. set in a time earlier than the main story
9. Cross cutting- device to move between two or more scenes staged in the space at the same time.
10. Devising- Creation of an original performance in response to a stimulus.

B — Evidence Pack! What do we already know about our victim

NAME: JAMES TYLER

Evidence Case 3192.

65128495? What do these numbers mean.

Footprint- found next to body near the lake.

Size 9 work boot.

Lake where body was found.

Wallet with his bank cards in found by body.

C- Thinking questions.

1. Who are you?
2. What do we need to know?
3. Who needs to be interviewed?
4. What is the key point of the story?
5. How does a flashback emphasise the story?
6. How does hot seating help you to understand your character?
7. Why do we use Narration?
8. How does Narration work?

Year 7 Knowledge organiser Topic: Who Dun'it!

What we are learning this term:

A. Explore the use of new drama techniques
B. Take part in a variety of workshops using the techniques discussed in lessons.
C. Create a Crimewatch using/creating key characters from the dead man's life and highlighting what they think happened the night of our victims demise.

A- Key Words for this term

1. Characterisation –
2. - a movement of part of the body, especially a hand or the head, to express an idea or meaning.
3. Mime-
4. -sounds that are created or used in a theatrical production to enhance the action, mood, or atmosphere of a scene.
5. - adding a spoken commentary for the audience about the action onstage.
6. Stimulus- The starting point in a piece of devised drama. This could be in the form of…
7. Hot seating-
8. - a scene in a film, novel, etc. set in a time earlier than the main story
9. Cross cutting-
10. D - Creation of an original performance in response to a stimulus.

B — Evidence Pack! What do we already know about our victim

NAME: What was our victims name?

6512 ? What do these numbers mean?

Evidence Case 3192.

Footprint- found next to body near the lake.

Lake where body was found.

What size was the work book?

Where was this found and what was inside?

C- Thinking questions.

1. Who are you?
2. What do we need to know?
3. Who needs to be interviewed?
4. What is the key point of the story?
5. How does a flashback emphasise the story?
6. How does hot seating help you to understand your character?
7. Why do we use Narration?
8. How does Narration work?

SWINDON ACADEMY READING CANON

Year 7

- The Canterbury Tales
- War Horse
- Adventures of a Young Naturalist
- A Monster Calls
- The Pearl
- Number the Stars
- The Hunger Games
- Chinese Cinderella
- Sir Gawain and the Green Knight

Year 8

- The Dark Lady
- Trash
