8GS – 8BE

What we are learning this term:

A. Organisms in an ecosystem
B. Organisms affected by the environment
C. Variation by natural selection
D. Genes
E. Maintaining biodiversity

3 Key Words for this term

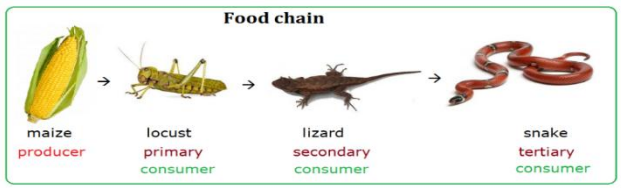
1. Pesticide
2. Herbivore
3. Biomass

A. What are food chains and what is an example of one?

All food chains start with a green plant, producers. Arrows point to the eater and show the flow of energy in a food chain. Each stage is called a trophic level

mahogany tree → caterpillar → song bird → hawk

maize → locust → lizard → snake

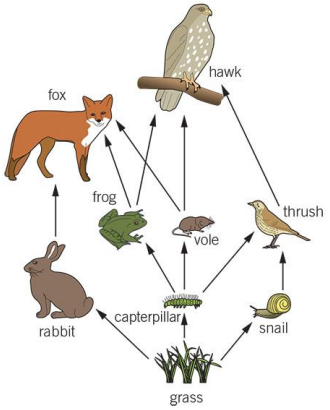


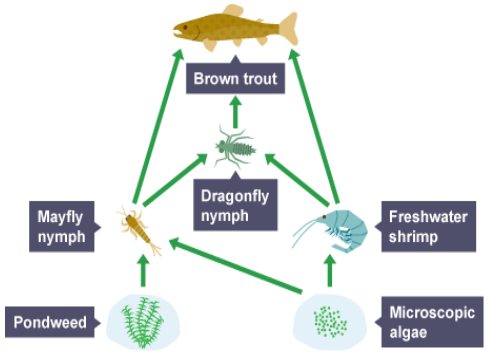
B. What is extinction?

When all the individuals of a species die.

A. What is a food web and what is an example of a food web?

Organisms eat more than 1 food so food chains link together to make **food webs**





A. How does the accumulation of toxic materials happen in food (using food webs/chains)?

Some poisonous materials stay in the environment and do not break down. These substances accumulate in the food chain and damage the organisms in it, particularly in the predators at the end of the chain. This is because accumulating compounds cannot be excreted.

A. How do insects help with plant reproduction?

Through POLLINATION (The process in which the pollens produced by anther, the male part of a flower is transferred to stigma, the female part of the flower).

B. What might happen to the individuals in a species if there is a big change in their environment?

Extinction.

B. How are organisms affected by their environment?

- climate change;
- natural disaster like an asteroid striking Earth;
- new diseases in the environment;
- a new predator in the environment;
- new competing species in the environment.

B. How do organisms affect their environment?

- By eating plants/other animals
- From their waste
- Pollination
- Competition for light & space

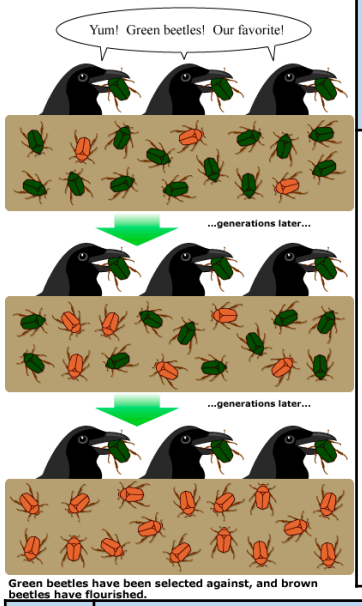
8GS – 8BE

C.	What are adaptations?
When an organism or species becomes better suited to its environment.	

C.	What is an example of adaptations?
Kangaroo rats never have to drink water, they get all the water they need from seeds.	

C.	What is natural selection?
The process whereby organisms better adapted to their environment tend to survive and produce more offspring	

Natural selection, in a nutshell:



Green beetles have been selected against, and brown beetles have flourished.

C	How does this diagram show natural selection?
1.The red beetles are adapted to be less favourable to the birds. 2.The red beetles survive and breed. The green ones do not. 3.As this goes on for generations, there are more red than green beetles.	

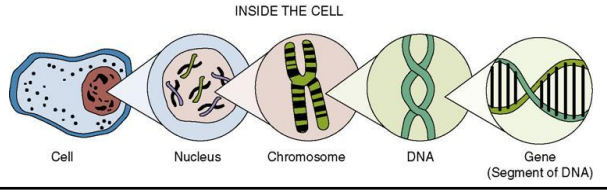
E.	How is biodiversity maintained?
1. Conserve the environment to protect ecosystems. 2. Conserve the genetic material of organisms that might be endangered using a **gene bank**.	

D.	What makes up DNA?
• DNA has a **double helix** structure with two sugar-phosphate backbones wound around each other. • Pairs of complementary **bases** connect the two backbones (strands)	

What are the 4 bases and how are they paired?
• The bases are **adenine**, **thymine**, **cytosine** and **guanine** (A, T, C, and G) • A has a **complementary shape** to T • C has a **complementary shape** to G

What are Chromosomes?
DNA wound up tightly. There are 23 pairs in human cells (but a different number of pairs in other species)

What are Genes?
A short section of DNA which codes for characteristics



E.	How do populations of species change over time, using the ideas of adaptation, competition and reproduction?
1.	In a population of a **species**, the individuals vary: they have different **adaptations**.
2.	The individuals with adaptations that help them compete in their environment do survive. The individuals with adaptations that don't help them compete die.
3.	The individuals with adaptations that help them compete in their environment do survive. The individuals with adaptations that don't help them compete die.
4.	The surviving individuals have the chance to **reproduce**.
5.	When they have offspring, they pass on the useful adaptations in their genes.

E.	What is a gene bank?
If scientists think a species might become extinct, they can preserve them for the future using a gene bank.	

E.	Why is it important to maintain biodiversity?
It keeps ecosystems going. Prevents extinction of many species. Humans use the plants as resources so need to be maintained.	

E.	What are the 4 different types of gene bank?
1. Frozen seeds of plants that could be used in the future 2. Plant tissue bank – where small parts of plants are kept alive in containers of nutrients 3. Frozen sperm cells and egg cells from animals, or pollen and ova from plants, that can be used to produce offspring in the future 4. A field gene bank: land is used to grow many species of plants and keep them alive for the future.

B. What were the religious policies/beliefs of these Tudor monarchs and what changes did they make?

1. Edward VI	2. Mary I	3. Elizabeth I
• Strong Protestant • Two very strongly Protestant advisors (Dukes of Northumberland and Somerset) that influenced him • He allowed priests to be married (1549) • Introduced a new prayer book written in English (1549) so common folk could understand it • Made a change to the line of succession and was succeeded by Lady Jane Grey (ruled for 9 days) who was a Protestant	• Strong Catholic • Changed language back to Latin • Reverted churches back to how they looked before (colourful, images, statues) • Made the Pope head of the church once again. • Made priests choose between the church and their families • Burned nearly 300 people at the stake – majority were Protestants (heretics) • Burned the Archbishop of Canterbury at the stake (Thomas Cranmer) as he refused to convert to Catholicism.	• Protestant (mild/moderate) • Did not want any more major religious change and upheaval. • She introduced the Middle Way – this was a comprise of both Catholic and Protestant features • The Middle Way leaned more towards Protestantism as this was Elizabeth's own belief. • Tolerant of Catholics at the start of her reign but after numerous plots to depose and kill her and the threat of Mary Queen of Scots her toleration of Catholics lessened. • Known as the 'Virgin Queen'- never married/ never had an heir.

D. Was the Elizabethan Period a Golden Age?

YES	NO
Renaissance – a high point, or a renaissance in drama, art, music and literature. - Elizabeth's Golden Age opened up the arts to every class of society e.g. the theatre.	**Rising population** – led to an increase in poverty ad growing social problems especially in towns.
Victory, exploration and expansion – the defeat of the Spanish armada in 1588, expansion of the British empire into the New World, the founding of Virginia	**Religious division returned** – recusants and Catholic threats to Elizabeth
Religious settlement – very little religious tension during this period. Elizabeth was able to avoid the religious strife and political turmoil that had dominated the reigns of her siblings.	**Four poor harvests** in a row paired with changes in farming (enclosures) led to a **rise in unemployment and homelessness**.
Improvement in quality of life – Business and industry developed and it was possible for merchants to become extremely wealthy and rise in social status (gentry class). Life improved for the lower classes - **Elizabethan Poor Laws**.	**Intense rivalry at court** led to an **unsuccessful rebellion-** Essex Rebellion (1601)- Earl of Sussex tries to take over the privy council.

E.	What was life like for the poor in Elizabethan England?		
No welfare state – if you were out of a job you had to beg, steal or starve	Dissolution of the Monasteries – after this life became harder for the poor and these places had looked after people in times of hardship or distress.	Vagrancy – some homeless and jobless people roamed around in gangs stealing or bulling people into giving them alms	Punishments for vagrancy, begging or stealing were brutal e.g. flogging, branding, whipping and hanging.
The Poor Laws (1597 and 1601) helped to ease the lives of the poor by making sure that each Parish looked after their poor e.g. a poor relief tax was collected, food, money and clothes were donated and dispensed, work or apprenticeships were provided etc.

Stencil design	Step up card	Accordion card	Key words	Evaluation

A | Stencil design

List 3 health and safety rules for using a cutting knife

Three health and safety rules to consider that could be considered when using a craft knife are to hold the knife in the correct way with finger and thumb on base of knife to support the blade, to cut pushing the blade away from you, to tuck tie in and tie hair up.

List the materials you need to create a stencil

 Cutting Mat

 Craft Knife

 Stencil design

 Card

B | Draw the inside of the pop up card

Annotate the different steps, materials you need to make the card

2 pieces of card, both folded in half
A ruler to measure the cut out
A pencil to draw the guidelines
Scissors to make the incisions

Coloured paper to add to the design
Cut any incisions

C | Draw the inside of an accordion card

Annotate the different steps, materials you need to make the card

2 pieces of card, one folded in half
A ruler to measure the folds
Second card folded to create the accordion

Coloured paper to add to the design

D| Key words

Material	The matter from which a thing can be made. E.g. a pop-up card would be made from paper and card
Stencil	a thin sheet of card, plastic, or metal with a pattern or letters cut out of it, used to produce the cut design on the surface below by the application of ink or paint through the holes.
Design	a plan or drawing produced to show the look and function or workings of a building, garment, or other object before it is made

E | Evaluation

Evaluation: To judge or give an opinion

Designers will evaluate their products to see what works well and what doesn't. This way they can make any improvements on their current designs to ensure a high-quality product.

When writing an evaluation it is important to include the following three things:

1. Positives – what works well
2. Negatives – what doesn't work well
3. Possible improvements – how could you make it better?

For example:

My tote bag looks great, the colours are bright which appeals to the audience of the festival. However, I have not designed a combined logo. One improvement I could make is to use images and text to create a combined logo.

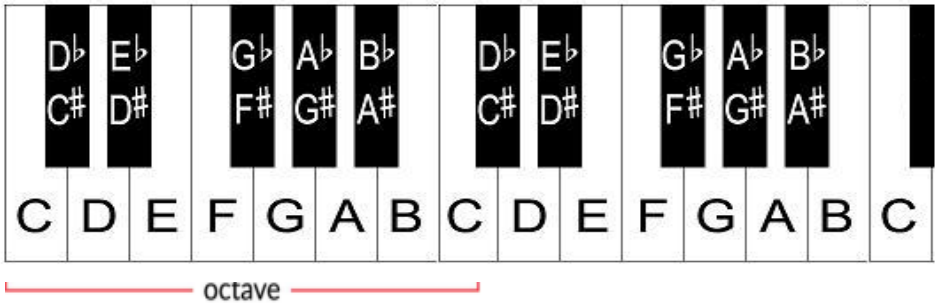
C — Layout of a Keyboard



A piano or keyboard is laid out with **WHITE KEYS** and **BLACK KEYS** (as above). **C** is to the left of the two **BLACK KEYS** and the notes continue to **G** when they go back to **A** again. Notes with the same letter name/pitch are said to be an **OCTAVE** apart. **MIDDLE C** is normally in the centre of a piano keyboard.

D — Treble Clef & Treble Clef Notation

A **STAVE** or **STAFF** is the name given to the five lines where musical notes are written. The position of notates on the stave or staff shows their **PITCH** (how high or low a note is). The **TREBLE CLEF** is a symbol used to show high-pitched notes on the stave and is usually used for the right hand on a piano or keyboard to play the **MELODY** and used by high pitched instruments such as the flute and violin. The stave or staff is made up of 5 **LINES** and 4 **SPACES**.

Every Green Bus Drives Fast. Notes in the **SPACES** spell **"FACE"**

Notes from **MIDDLE C** going up in pitch (all of the white notes) are called a **SCALE**.

E — Black Keys and Sharps and Flats

There are five different black notes or keys on a piano or keyboard. They occur in groups of two and three right up the keyboard in different pitches. Each one can be a **SHARP** or a **FLAT**. The **#** symbol means a **SHARP** which raises the pitch by a semitone (e.g. C# is higher in pitch(to the right) than C). The *b* symbol means a **FLAT** which lowers the pitch by a semitone (e.g. B*b* is lower in pitch(to the left) than B).

Each black key has two names – C# is the same as D*b* – there's just two different ways of looking at it!

Remember, black notes or keys that are to the **RIGHT** of a white note are called **SHARPS** and black notes to the **LEFT** of a white note are called **FLATS**.
